

**FUND INVESTMENT OBJECTIVE**

WisdomTree India Earnings Fund seeks investment results that correspond to the price and yield performance, before fees and expenses, of the WisdomTree India Earnings Index.

**INDEX DESCRIPTION**

The WisdomTree India Earnings Index is a fundamentally weighted index that measures the performance of profitable companies as of the annual index screening date incorporated and traded in India that are eligible to be purchased by foreign investors. Companies are weighted in the Index based on their earnings in their fiscal year prior to the Index measurement date adjusted for a factor that takes into account shares available to foreign investors. For these purposes, earnings are determined using a company's net income.

**Average Annual Total Returns** [as of 12/31/2011]

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [wisdomtree.com](http://wisdomtree.com).** WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

**Index Statistics Since WT Underlying Index Inception Date**

	WT India Earnings Index	MSCI India Index
Annualized Returns	-11.49%	-12.25%
Annualized Volatility	39.55%	39.30%
Beta	1.12	1.11
Sharpe Ratio	-0.31	-0.33
Correlation	0.87	0.86

Annualized volatility is a statistical measure of the dispersion of returns. High volatility results from wide fluctuations in past index values. Beta is another measure of volatility that compares how an index moves relative to another index, typically the MSCI Emerging Markets Index. A beta of 1.0 implies the index has moved proportionally with the MSCI Emerging Markets Index. A beta less than 1.0 implies less movement; greater than 1.0 implies more. Sharpe Ratio is a measure calculated to determine reward per unit of risk, using standard deviation and excess returns in an index, typically the MSCI Emerging Markets Index. A higher Sharpe Ratio indicates a higher risk-adjusted return.

You cannot invest directly in an index.

**Index Correlation Matrix Since WT Underlying Index Inception Date**

	WT India Earnings Index	MSCI India Index	MSCI Emerging Markets Index	MSCI EAFE Index
WT India Earnings Index	1.00	0.99	0.87	0.78
MSCI India Index	0.99	1.00	0.86	0.78
MSCI Emerging Markets Index	0.87	0.86	1.00	0.93
MSCI EAFE Index	0.78	0.78	0.93	1.00

Correlation is a statistical measure of how indexes move in relation to each other. A correlation ranges from -1 to 1. A correlation of 1 means the two indexes have moved in lockstep with each other. A correlation of -1 means the two indexes have moved in exactly the opposite direction.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. To obtain a prospectus containing this and other important information, call 1-866-909-WISE (9473) or visit wisdomtree.com. Read the prospectus carefully before you invest.

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. This Fund focuses its investments in India, thereby increasing the impact of events and developments associated with the region which can adversely affect performance.

Investments in emerging, offshore or frontier markets such as India are generally less liquid and less efficient than developed markets and are subject to additional risks, such as of adverse governmental regulation and intervention or political developments. As this Fund has a high concentration in some sectors the Fund can be adversely affected by changes in those sectors. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.
