WisdomTree Trust

WisdomTree International Hedged Equity Fund (HEDJ)

THE SECURITIES AND EXCHANGE COMMISSION ("SEC") HAS NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

WisdomTree Trust

WisdomTree Trust (the “Trust”) is a registered investment company that consists of separate investment portfolios called “Funds.” This prospectus describes the **WisdomTree International Hedged Equity Fund**. The Fund seeks investment results that closely correspond to the price and yield performance, before fees and expenses, of the WisdomTree DEFA International Hedged Equity Index (the “Index”). The Index and the Fund are designed to provide exposure to equity securities in Europe, Far East Asia and Australasia, while at the same time hedging exposure to fluctuations between the value of the U.S. dollar and selected non-U.S. currencies in these regions. The Index is created using proprietary methodologies developed by WisdomTree Investments, Inc.

The Fund is an exchange traded fund (“ETF”). This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. The market price for the Fund’s shares may be different from its net asset value per share (“NAV”). The Fund has its own CUSIP number and exchange trading symbol.

The Fund described in this Prospectus issues and redeems shares at NAV only in large blocks of shares (“Creation Units”). These transactions are usually in exchange for a basket of securities and an amount of cash. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, shares of the Fund are not redeemable securities.

A NOTE TO RETAIL INVESTORS

Shares can be purchased directly from the issuing Fund only in exchange for a basket of securities that is expected to be worth several million dollars. Most individual investors, therefore, will not be able to purchase shares directly from a Fund. Instead, these investors will purchase shares in the secondary market through a brokerage account or with the assistance of a broker. Thus, some of the information contained in this Prospectus – such as information about purchasing and redeeming shares from a Fund and references to transaction fees imposed on purchases and redemptions – is not relevant to most individual investors. Shares purchased or sold through a brokerage account or with the assistance of a broker may be subject to brokerage commissions and charges.

WisdomTree International Hedged Equity Fund

Ticker Symbol: HEDJ

Cusip Number: 97717X701

Overview

This Prospectus provides the information you need to make an informed decision about investing in the Fund. It contains important facts about the Trust as a whole and the Fund in particular. The Fund is an exchange-traded fund (“ETF”). ETFs are funds whose shares are listed on a stock exchange and traded like equity securities at market prices. ETFs, such as the Fund, allow you to buy or sell shares that represent the collective performance of a selected group of securities. ETFs are designed to add the flexibility, ease and liquidity of stock-trading to the benefits of traditional fund investing.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management”) is the investment adviser to the Fund.

WisdomTree Investments, Inc. (“WisdomTree Investments”) is the parent company of WisdomTree Asset Management.*

Investment Objective

The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree DEFA International Hedged Equity Index. As described in more detail below, the Fund seeks to provide international equity returns while mitigating or “hedging” against currency fluctuations. The Index and the Fund are designed to have higher returns than an equivalent non-currency hedged investment when the U.S. dollar is going up in value relative to foreign currencies (e.g., the U.S. dollar is rising relative to the euro). Conversely, the Index and Fund are designed to have lower returns than an equivalent non-hedged investment when the U.S. dollar is falling in value relative to foreign currencies (e.g., the euro is rising relative to the U.S. dollar). Of course, there can be no guarantee that the Index or Fund will achieve its respective objective. Since the Fund’s investment objective has been adopted as a non-fundamental investment policy, the Fund’s investment objective may be changed without a vote of shareholders.

To be included in the WisdomTree DEFA International Hedged Equity Index, companies must be incorporated and listed for trading in one of 16 developed-market European countries (Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom), Japan, Hong Kong, Singapore, or Australasia. The Index currently includes a relatively large percentage of companies organized in France and the United Kingdom. This may change from time to time based on the amount of dividends paid by companies in the Index. Companies must have paid at least \$5 million in cash dividends on their common stock in the annual cycle prior to the most recent Index measurement date and must also satisfy specified liquidity and other requirements. Companies are weighted in the Index based on regular cash dividends paid. The Index applies an applicable published WM/Reuters one-month currency forward rate to the total equity exposure of each country in the Index to adjust the value of each currency against the U.S. dollar.

Primary Investment Strategies

The Fund employs an investment approach designed to track the performance of the WisdomTree DEFA International Hedged Equity Index. The Index and the Fund are designed to provide exposure to equity securities in Europe, Far East Asia and Australasia, while at the same time hedging exposure to fluctuations between the value of the U.S. dollar and selected non-U.S. currencies in these regions. For U.S. investors, international equity investments include two components of return. The first is the return attributable to stock prices in the non-U.S. market or markets in which an investment is made. The second is the return attributable to the value of non-U.S. currencies in these markets relative to the U.S. dollar. The Index and the Fund seek to track the performance of equity securities in these developed markets that is attributable solely to stock prices.

* “WisdomTree” is a registered mark of WisdomTree Investments, Inc. and has been licensed for use by the Trust.

The Fund intends to enter into forward currency contracts or futures contracts designed to offset the Fund's exposure to non-U.S. currencies. A forward currency contract is a contract between two parties to buy or sell a specific currency in the future at an agreed-upon rate. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. The amount of forward contracts and futures contracts in the Fund is based on the aggregate exposure of the Fund and Index to each non-U.S. currency. While this approach is designed to minimize the impact of currency fluctuations on Fund returns, this does not necessarily eliminate exposure to all currency fluctuations. The return of the forward currency contracts and currency futures contracts may not perfectly offset the actual fluctuations of non-U.S. currencies relative to the U.S. dollar.

The Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of investments suggested by its name. The Fund also may invest its assets in cash and cash equivalents, as well as in shares of other investment companies, forward contracts, futures contracts, options on futures contracts, options, and swaps. WisdomTree Asset Management expects that, over time, the correlation between the Fund's performance and that of its Index, before fees and expenses, will be 95% or better.

Principal Risk Factors

The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Investment Risk

As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or even long periods of time.

Market Risk

The trading price of equity securities fluctuates in response to a variety of factors. These factors include events impacting a single issuer, as well as political, market and economic developments that affect specific market segments and the market as a whole. The Fund's NAV and market price, like stock prices generally, will fluctuate within a wide range in response to these factors. As a result, an investor could lose money over short or even long periods. Events in the financial sector and other markets have resulted, and may continue to result, in an unusually high degree of volatility in the worldwide stock markets. Both domestic and foreign fixed income and equity markets experienced extreme volatility and turmoil in late 2008 and throughout most of 2009. Well-known financial and other institutions have experienced significant liquidity and other problems and issuers that have exposure to the real estate, mortgage and credit markets have been particularly affected. Some of these institutions have declared bankruptcy or defaulted on their debt. It is uncertain whether or for how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Investment Style Risk

The returns from the types of securities in which the Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause the Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.

Foreign Securities Risk

Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S.

issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Foreign Currency Risk

The Fund uses various strategies to attempt to minimize the impact of changes in the value of the non-U.S. currencies included in its underlying Index against the U.S. dollar. These strategies may not be successful. In order to minimize transaction costs or for other reasons, the Fund's exposure to the currencies included in the Index may not be fully hedged at all times. For example, the Fund may not hedge against exposure to currencies that represent a relatively smaller portion of the Index. Changes in currency exchange rates and the relative value of non-U.S. currencies may affect the value of the Fund's investment and the value of your Fund shares. To the extent the Fund's hedging strategies are not successful, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include: interest rates, national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in a Fund may also go up or down quickly and unpredictably and investors may lose money.

Derivative Investment Risk

The Fund intends to invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate, such as a forward currency contracts, and swaps. The Fund intends to invest in forward currency contracts, non-deliverable forward currency contracts, currency swaps and currency futures contracts. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. Non-deliverable forward currency contracts are contracts where there is no physical settlement of two currencies at maturity. Rather, based on the movement of the currencies, a net cash settlement will be made by one party to the other. A currency swap is an agreement between two parties to exchange one currency for another at a future rate. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. Derivatives are subject to a number of risks described elsewhere in this section, such as interest rate risk, market risk, capacity risk and management risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities.

Interest Rate Risk

The underlying Index, and therefore the Fund, may be more heavily weighted than other types of investments in market sectors that are sensitive to interest rate fluctuations (such as the financial and real estate sectors). The Fund therefore may be

more sensitive to fluctuations in interest rates than other types of investments. In particular, increases to prevailing interest rates could have a negative impact on the performance of the Fund.

Concentration Risk

To the extent that the Fund's Index concentrates in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index. A fund that concentrates, or otherwise invests a large portion of its assets in a single industry or group of industries, may be more susceptible to any single economic, market, political or regulatory occurrence affecting that industry or group of industries. To the extent the Fund concentrates its investments, it may be more volatile than funds based on broader or less volatile market segments.

Geographic Investment Risk

To the extent the Fund invests a significant portion of its assets in the securities of a single country or region it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance.

Financial Sector Investing

The Fund may invest a percentage of its assets in securities in the financial industry and therefore the performance of the Fund may be impacted by events affecting the Financial industry. This industry can be significantly affected by changes in interest rates, the rate of corporate and consumer debt defaulted, price competition, the availability and cost of capital funds and fallout from the housing and sub-prime mortgage crisis. This sector was significantly impacted by bankruptcies and consolidations of major financial firms in 2008 and 2009. These events have had, and may continue to have, a significant negative impact on the valuation and stock price of companies in this sector and have increased the volatility of investments in this sector.

Small and Mid-Capitalization Investing

The Fund may invest a portion of its assets in securities of small and mid-capitalization companies. The securities of small and mid-capitalization companies may be subject to more unpredictable price changes than securities of larger companies or the market as a whole.

Non-Diversification Risk

The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Capacity Risk

The Fund may invest in derivative instruments as a substitute for taking a position in an underlying asset in an attempt to create a position economically similar to a direct investment. As a result, the Fund may experience the risk that the market for derivative instruments used to achieve such exposure has limited liquidity or volume. This may be due to foreign government restrictions or regulations on such use of derivative instruments, or because the Fund may be unable to obtain a sufficient amount of derivative instruments necessary to create the required exposure. This could have a negative effect on the Fund's ability to achieve its investment objective.

Issuer-Specific Risk

Changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less-well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of a Fund.

Investment Approach Risk

The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the U.S. or foreign market segments relating to its Index.

Non-Correlation Risk

The performance of the Fund and its Index may vary somewhat for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by its Index. In addition, the Fund may not be fully invested in the securities of its Index at all times and may not fully hedge against exposure to all currencies represented in the Index. The use of sampling techniques with respect to investments in securities as well as currency hedging strategies may affect the Fund's ability to achieve close correlation with its Index. A Fund using a Representative Sampling strategy generally can be expected to have a greater non-correlation risk.

Cash Redemption Risk

Because the Fund invests a portion of its assets in foreign currency forward contracts, the Fund intends to pay out a portion of its redemption proceeds in cash rather than through the in-kind delivery of portfolio securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have incurred if it had made a redemption in-kind. As a result the Fund may pay out higher annual capital gains distributions than if the in-kind redemption process was used.

Market Trading Risk

Although Fund shares are listed on national securities exchanges, there can be no assurance that an active trading market for Fund shares will develop or be maintained. If an active market is not maintained, investors may find it difficult to buy or sell Fund shares. Trading of shares of the Fund on a stock exchange may be halted if exchange officials deem such action appropriate, if the Fund is delisted, or if the activation of marketwide "circuit breakers" halts stock trading generally. If the Fund's shares are delisted, the Fund may seek to list its shares on another market, merge with another ETF or traditional mutual fund, or redeem its shares at NAV. WisdomTree Asset Management believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities.

Shares of the Fund May Trade at Prices Other Than NAV

As with all ETFs, Fund shares are bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, you may pay more than NAV when you buy shares of the Fund in the secondary market, and you may receive less than NAV when you sell those shares in the secondary market. The market price of Fund shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade the Fund shares. The bid/ask spread on ETF shares is likely to be wider on ETFs that are traded less frequently and also may be wider at certain times of the day, such as immediately after the market opens and just before closing time. When this occurs you may pay more to buy Fund shares, or receive less on the sale of Fund shares, than you might receive at other times. In addition, in times of severe market disruption, the bid/ask spread can increase significantly. At those times, Fund shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of shares is falling fastest, which may be the time that you most want to sell your shares. You may wish to discuss ETF trading strategies, such as the use of limit orders and stop orders, with your broker.

Lack of Governmental Insurance or Guarantee

An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Fees and Expenses

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets. You may also incur customary brokerage charges when buying or selling Fund shares.

Shareholder Fees (fees paid directly from your investment, but see the Creation and Redemption Transaction Fees for Creation Units section herein)	None
Annual Fund Operating Expenses (expenses deducted from Fund assets)	
Management Fees	0.48%
Other Expenses	0.10%
Distribution and/or Service (12b-1) Fees	None
Total Annual Fund Operating Expenses^(a)	0.58%

(a) WisdomTree Asset Management has contractually agreed, through March 31, 2010, to pay certain operating expenses of the Fund to the extent necessary to maintain the Fund’s Annual Fund Operating expenses at 0.58%.

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they invest \$10,000 in the Fund for the time periods indicated and then redeemed all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commission that retail investors may pay to buy and sell shares of the Fund. The cost under the 1 year example reflects WisdomTree Asset Management’s agreement to waive fees and/or reimburse expenses to the level specified in the fee table. The cost under the 3 year example does not reflect this agreement. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years
	\$59	\$186

You would pay the following expenses if you did not redeem your shares:

	1 Year	3 Years
	\$59	\$186

Management

Investment Adviser

As investment adviser, WisdomTree Asset Management has overall responsibility for the portfolio management of the Trust. WisdomTree Asset Management provides an investment program for the Fund. WisdomTree Asset Management arranges for transfer agency, custody, fund administration, and all other non-distribution related services necessary for the Fund to operate.

The basis for the Board of Trustees' approval of the Investment Advisory Agreement for the Fund will be available in the Trust's Annual Report to Shareholders for the period ending March 31, 2009.

WisdomTree Asset Management expects to receive fees from the Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table:

Name of Fund	Management Fee
WisdomTree International Hedged Equity Fund	0.48%

WisdomTree Asset Management has contractually agreed, through March 31, 2010, to pay certain operating expenses of the Fund to the extent necessary to maintain the Fund's Annual Fund Operating Expenses at 0.58%. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of CCO services with respect to the Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of the Fund's assets for providing such services and paying such expenses. As of October 1, 2009, WisdomTree Asset Management provides CCO services to the Trust.

WisdomTree Asset Management is a registered investment adviser with offices located at 380 Madison Avenue, 21st Floor, New York, NY 10017 and is a leader in ETF management.

WisdomTree Asset Management, as the investment adviser for the Fund, may hire one or more sub-advisers to oversee the day-to-day activities of the Fund. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust are seeking an exemptive order from the SEC that will permit WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for the Fund without submitting the sub-advisory agreement to a vote of the Fund's shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Fund due to its responsibility to oversee each sub-adviser and recommend their hiring, termination and replacement. If the exemptive relief is obtained, WisdomTree Asset Management will not be required to disclose fees paid to sub-advisers.

Sub-Adviser

Mellon Capital Management Corporation ("Mellon Capital" or the "Sub-Adviser") serves as the sub-adviser for the Fund. Mellon Capital is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors with its principal office located at 50 Fremont Street, San Francisco, CA 94105. As of September 30, 2009, Mellon Capital had assets under management totaling approximately \$170 billion.

The Sub-Adviser chooses the Fund's portfolio investments and places orders to buy and sell the Fund's portfolio investments.

WisdomTree Asset Management pays the Sub-Adviser the fees indicated below for providing sub-advisory services to the Fund:

- 7.5 basis points (0.075%) of the first \$1 billion in combined daily net assets of all WisdomTree International Equity Funds;

- 5 basis points (0.05%) of the next \$1 billion in combined daily net assets of all WisdomTree International Equity Funds; and
- 3 basis points (0.03%) of the next \$3 billion in combined daily net assets of all WisdomTree International Equity Funds; and
- 2 basis points (0.02%) of the combined daily net assets of all WisdomTree International Equity Funds in excess of \$5 billion.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Index Strategies Portfolio management team. The individual members of the team responsible for the day-to-day management of the Fund's portfolios are described below.

Ms. Karen Q. Wong is a Managing Director, Equity Index Strategies, West Coast. Ms. Wong has been with Mellon Capital since June, 2000. Ms. Wong heads a team of portfolio managers covering domestic and international passive equity funds. She is also responsible for the refinement and implementation of the equity portfolio management process. Ms. Wong is a Chartered Financial Analyst. She graduated with a BA from San Francisco State University, and obtained an MBA from San Francisco State University.

Mr. Richard A. Brown is a Director, Equity Portfolio Management. Mr. Brown has been with Mellon Capital since August, 1995. Mr. Brown heads a team of portfolio managers covering domestic and international passive equity funds. He is also responsible for the refinement and implementation of the equity portfolio management process. Mr. Brown is a Chartered Financial Analyst. He obtained an MBA from California State University at Hayward.

Mr. Thomas J. Durante is a Director, Senior Portfolio Manager, Equity. Mr. Durante has been with Mellon Capital since January, 2000. Mr. Durante heads a team of portfolio managers covering domestic and international indexed portfolios. He is also responsible for the refinement and implementation of the equity portfolio management process. Mr. Durante is a Chartered Financial Analyst. He graduated with a BA from Fairfield University.

The Trust's Statement of Additional Information ("SAI") provides additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares in the Funds for which they are Portfolio Managers.

Portfolio Holdings Information

Information about the Fund's daily portfolio holdings is available at www.wisdomtree.com. In addition, the Fund discloses its complete portfolio holdings as of the end of its fiscal year (March 31) and its second fiscal quarter (September 30) in its reports to shareholders. The Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (June 30 and December 31, respectively) with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, www.sec.gov. A summarized description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the SAI.

Buying and Selling Shares

Most investors will buy and sell shares of the Fund through brokers. Shares of the Fund trade on national securities exchanges and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly-traded securities. When buying or selling shares through a broker, most investors will incur customary brokerage commissions and charges.

Shares of the Fund may be acquired or redeemed directly from the Fund only in Creation Units or multiples thereof, as discussed in the Creation and Redemption section. Once created, shares of the Fund trade in the secondary market in amounts less than a Creation Unit.

Share Trading Prices

As with other types of securities, the trading prices of shares in the secondary market can be affected by market forces such as supply and demand, economic conditions and other factors. The price you pay or receive when you buy or sell your shares in the secondary market may be more or less than the NAV of such shares.

The approximate value of Fund shares is disseminated every fifteen seconds throughout the trading day by the national securities exchange on which the Fund is listed or by other information providers. This approximate value should not be viewed as a “real-time” update of the NAV, because the approximate value may not be calculated in the same manner as the NAV, which is computed once per day. The approximate value generally is determined by using current market quotations and/or price quotations obtained from broker-dealers that may trade in the portfolio securities held by the Fund. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and makes no warranty as to its accuracy.

Determination of Net Asset Value

The NAV of the Fund’s shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time (the “NAV Calculation Time”). NAV per share is calculated by dividing the Fund’s net assets by the number of Fund shares outstanding.

Stocks held by the Fund are valued at their market value when reliable market quotations are readily available. Certain short-term debt instruments, which may be used to manage the Fund’s cash, are valued on the basis of amortized cost. The values of any foreign securities held by the Fund are converted into U.S. dollars using an exchange rate deemed appropriate by the Fund.

When reliable market quotations are not readily available, securities are priced at their “fair value”, which is the price a security’s owner might reasonably expect to receive upon its sale. The Fund may also use fair-value pricing if the value of a security it holds has been materially affected by events occurring before the Fund’s pricing time but after the close of the primary markets or exchanges on which the security is traded. For example, this may occur with foreign securities, which may trade on foreign exchanges that close many hours before the Fund’s pricing time.

Intervening events might be company-specific (e.g., earnings report, merger announcement), country-specific (e.g., natural disaster, economic or political news, act of terrorism, interest rate change), or global. Intervening events may include price movements in U.S. markets that are deemed to affect the value of foreign securities. Fair-value pricing also may be used if, for example, trading in a security is halted and does not resume before the Fund’s pricing time or if a security does not trade in the course of a day.

Fair-value prices are determined by the Fund according to procedures adopted by the Board of Trustees. When fair-value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from a Fund in Creation Units. Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV.

Dividends and Distributions

The Fund pays out dividends, if any, to investors at least annually. The Fund distributes its net realized capital gains, if any, to investors annually. The Fund may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Book Entry

Shares of the Fund are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding shares of the Fund.

Investors owning shares of the Fund are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Fund. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book entry or “street name” form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

Delivery of Shareholder Documents-Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Frequent Purchases and Redemptions of Fund Shares

The Fund has adopted policies and procedures with respect to frequent purchases and redemptions of Creation Units of Fund shares. Since the Fund is an ETF, only a few institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly with the Fund. Because purchase and redemption transactions with Authorized Participants are an essential part of the ETF process and help keep ETF trading prices in line with NAV, the Fund accommodates frequent purchases and redemptions by Authorized Participants. Frequent purchases and redemptions for cash may increase index tracking error and portfolio transaction costs and may lead to realization of capital gains. Frequent in-kind creations and redemptions do not give rise to these concerns. The Fund reserves the right to reject any purchase order at any time. The Fund reserves the right to impose restrictions on disruptive, excessive, or short-term trading and may reject purchase or redemption orders in such instances.

Investments by Registered Investment Companies

Section 12(d)(1) of the Investment Company Act of 1940 restricts investments by registered investment companies in the securities of other investment companies, including shares of the Fund. Registered investment companies generally are permitted to invest in the WisdomTree Funds beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the WisdomTree Trust, including that such investment companies enter into an agreement with the Fund.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year as a regulated investment company (“RIC”). A RIC is not subject to tax at the fund level on income and gains from investments that are distributed to shareholders. The Fund’s failure to qualify as a RIC would result in Fund-level taxation, and consequently a reduction in income available for distribution to shareholders. Unless your

investment in shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions;
- You sell shares; and
- You purchase or redeem Creation Units (institutional investors only).

Taxes on Distributions

For federal income tax purposes, distributions of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains are determined by how long the Fund owned the investments that generated them, rather than how long you have owned your Fund shares. Distributions of net capital gains (the excess of net long-term capital gains from the sale of investments that the Fund owned for more than one year over net short-term capital losses) that are properly designated as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains. Long-term capital gain rates have been temporarily reduced – in general, to 15%, with lower rates applying to taxpayers in the 10% and 15% rate brackets – for taxable years beginning before January 1, 2011. Distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income. For the taxable years beginning before January 1, 2011, distributions of investment income designated by the Fund as derived from “qualified dividend income” are taxed to individuals at rates applicable to long-term capital gains, provided holding period and other requirements are met at both the shareholder and the Fund level.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the price you paid for your shares).

Dividends, interest, and gains received by the Fund with respect to foreign securities may be subject to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may in some cases reduce or eliminate such taxes. Because more than 50% of the total assets of the Fund are expected to consist of foreign stocks or securities, the Fund may elect to “pass through” to you certain foreign income taxes (including withholding taxes) paid by the Fund. In such a case, you would be considered to have received as an additional dividend your share of such foreign taxes, but you could be entitled, subject to certain limitations, to either a corresponding tax deduction or a credit in calculating your federal income tax.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, dividends (other than Capital Gain Dividends and certain interest-related dividends and short-term capital gain dividends for tax years prior to December 31, 2009 (unless extended)) paid to you by the Fund will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies. Foreign persons should consult the SAI for further information.

The Fund (or financial intermediaries, such as brokers, through which a shareholder owns Fund shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Taxes When Fund Shares are Sold

Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than one year. Any capital gain or loss realized upon a sale of Fund shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such shares. The ability to deduct capital losses may be limited.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the cash component paid. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities and the amount of cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities for Creation Units should consult their own tax advisors with respect to whether the wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon a redemption (or creation) of Creation Units is generally treated as long-term capital gain or loss if the Fund shares (or securities surrendered) have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many shares you purchased or sold and at what price. Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

Creation and Redemption

The shares that trade in the secondary market are "created" at NAV. The Fund issues and redeems shares at NAV only in large blocks of shares, typically 50,000 shares or more ("Creation Units"). Only institutional investors who have entered into an authorized participant agreement may purchase or redeem Creation Units. Creation Units generally are issued and redeemed in exchange for a specified basket of securities approximating the holdings of the Fund and a designated amount of cash. Each business day prior to the opening of trading the Fund publishes the specific securities and designated amount of cash included in that day's basket for the Fund through the National Securities Clearing Corporation ("NSCC") or other method of public dissemination. The Fund reserves the right to accept or pay out a basket of securities or cash that differs from the published basket. The prices at which creations and redemptions occur are based on the next calculation of NAV after an order is received in proper form.

Creations and redemptions must be made by an Authorized Participant or through a firm that is either a member of the Continuous Net Settlement System of the NSCC or a DTC participant, and in each case, must have executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit aggregations. Information about the procedures regarding creation and redemption of Creation Units is included in the Trust's SAI.

Authorized Participants and the Continuous Offering of Shares

Because new shares may be created and issued on an ongoing basis, at any point during the life of the Fund, a "distribution," as such term is used in the Securities Act of 1933 ("Securities Act"), may be occurring. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner that could render them statutory underwriters and subject to the prospectus-delivery and liability provisions of the Securities Act. Nonetheless, any determination of whether one is an underwriter must take into account all the relevant facts and circumstances of each particular case.

Broker-dealers should also note that dealers who are not "underwriters," but are participating in a distribution (as contrasted to ordinary secondary transactions), and thus dealing with shares that are part of an "unsold allotment" within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national securities exchange.

Creation and Redemption Transaction Fees for Creation Units

The Fund may impose a creation transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units of shares. The standard creation and redemption transaction fees are listed below. The standard creation and redemption transaction fee is on a per Creation Unit basis. Purchasers and redeemers of Creation Units for cash (when cash creations and redemptions are permitted) will also be subject to an additional charge shown below under “Maximum Creation/Redemption Transaction Fee” to offset the transaction cost to the Fund of buying portfolio securities. In addition, purchasers and redeemers of shares in Creation Units are responsible for payment of the costs of transferring securities to or out of the Fund. From time to time, WisdomTree Asset Management may cover the cost of any transaction fees.

The following table also shows the approximate value of one Creation Unit per Fund, including the standard creation and redemption transaction fee. These fees are payable only by investors who purchase shares directly from the Fund. Retail investors who purchase shares through their brokerage account will not pay these fees.

Name of Fund	Approximate Value of One Creation Unit	Standard Creation/Redemption Transaction Fee	Maximum Creation/Redemption Transaction Fee
WisdomTree International Hedged Equity Fund	\$2,500,000	\$500	\$15,000

Distribution

ALPS Distributors, Inc. (the “Distributor”) serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in shares of the Fund. The Distributor’s principal address is 1290 Broadway, Suite 1100, Denver, Colorado 80203.

The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund.

Additional Notices

Shares of the Trust are not sponsored, endorsed, or promoted by any listing exchange (“Exchange”). The Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Fund or any member of the public regarding the ability of the Fund to track the total return performance of the Index or the ability of the Index identified herein to track stock market performance. The Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Index, nor in the determination of the timing of, prices of, or quantities of the shares of the Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Exchange has no obligation or liability to owners of the shares of the Fund in connection with the administration, marketing, or trading of the shares of the Fund.

The Exchange does not guarantee the accuracy and/or the completeness of the Index or any data included therein. The Exchange makes no warranty, express or implied, as to results to be obtained by the WisdomTree Trust on behalf of its Funds, owners of the shares, or any other person or entity from the use of the subject Indexes or any data included therein. The Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to any Index or any data included therein. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

WisdomTree Investments, WisdomTree Asset Management and the Fund make no representation or warranty, express or implied, to the owners of shares of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the Index to track general stock market performance. WisdomTree Investments is the licensor of certain trademarks, service marks and trade names of the Fund. WisdomTree Investments has no obligation to take the needs of the Fund or the owners of shares of the Fund into consideration in determining, composing,

or calculating the Index. WisdomTree Investments is not responsible for, and has not participated in, the determination of the timing of, prices at, or quantities of shares of the Fund to be issued or in the determination or calculation of the equation by which the shares of the Fund are redeemable.

The Fund, WisdomTree Investments and WisdomTree Asset Management do not guarantee the accuracy, completeness, or performance of the Index or the data included therein and shall have no liability in connection with any Index or Index calculation. WisdomTree Investments has contracted with Standard & Poor's ("S&P") to maintain and calculate each Index. S&P shall have no liability for any errors or omissions in calculating any Index.

Financial Highlights

Financial Statements and Annual Reports will be available after the Fund has completed a fiscal year of operations.
