This information must be preceded or accompanied by a prospectus or, if available, the summary prospectus. We advise you to consider the Fund's objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contains this and other important information about the Fund. Read the prospectus or, if available, the summary prospectus carefully before you invest. Call 866.909.WISE (9473) or go to wisdomtree.com/investments for more information.

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. High-yield or "junk" bonds have lower credit ratings and involve a greater risk to principal. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Please read the Fund's prospectus for specific details regarding the Fund's risk profile

WisdomTree Funds are distributed by Foreside Fund Services, LLC., in the U.S.

While the Fund may invest in bonds denominated in foreign currencies (such as pounds or euros), the foreign currency exposures for those securities are hedged into U.S. dollars through positions in forward currency contracts. Forward currency contracts are agreements to buy or sell a specific currency at a future date at a price set at the time of the contract. Market Value of Securities refers to the weight of all stocks, bonds, and money market or collateral securities in the portfolio while Market Value of Currency Contracts refers to the weight of the forward currency contract hedges overlaid on the securities. Credit Ratings represent the highest of each portfolio constituent as currently rated by Standard and Poor's, Moody's, or Fitch. Ratings are generally measured on a scale that ranges from AAA (highest) to D (lowest). Ratings from AAA to BBB are considered investment-grade. Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price.

Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions.
