NYSE Arca's all-electronic platform is the single largest liquidity pool for ETFs in the U.S. and presents a compelling value proposition for all market participants. In the first half of 2007, NYSE Arca handled 43% of all ETF shares traded in the U.S., representing an average daily volume of approximately 231.96 million shares per day.

All existing NYSE ETF specialist firms are already acting as lead market makers in primary listings on NYSE Arca and will continue to provide value for investors and issuers while ensuring liquidity and reducing volatility.
