

WisdomTree

CBOE S&P 500 PutWrite Strategy Fund

PUTW

Fund Overview

The WisdomTree CBOE S&P 500 PutWrite Strategy Fund seeks to track the performance, before fees and expenses, of the CBOE S&P 500 PutWrite Index (PUT), a collateralized put write strategy on the S&P 500 Index.

Investment Strategy Description

The strategy is designed to receive a premium from the option buyer by selling a sequence of one-month, at-the-money, S&P 500 Index puts (SPX puts). If, however, the value of the S&P 500 Index falls below the SPX Put's strike price, the option finishes in-the-money and the Fund pays the buyer the difference between the strike price and the value of the S&P 500 Index. The Fund's strategy of selling cash-secured SPX Puts serves to partially offset a decline in the value of the S&P 500 Index to the extent of the premiums received.

All Data As of 09/30/2018

S&P 500 Index	7.71%	10.56%	17.91%	17.31%	13.95%	11.97%	19.58%

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Fund Dividend Distribution and Capital Gains

Disclosures

This information must be preceded or accompanied by a prospectus. We advise you to consider the Fund's objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 866.909.9473 or visit WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. The Fund will invest in derivatives, including S&P 500 Index put options ("SPX Puts"). Derivative investments can be volatile, and these investments may be less liquid than securities, and more sensitive to the effects of varied economic conditions. The value of the SPX Puts in which the Fund invests is partly based on the volatility used by market participants to price such options (i.e., implied volatility). The options values are partly based on the volatility used by dealers to price such options, so increases in the implied volatility of such options will cause the value of such options to increase, which will result in a corresponding increase in the liabilities of the Fund and a decrease in the Fund's NAV. Options may be subject to volatile swings in price influenced by changes in the value of the underlying instrument. The potential return to the Fund is limited to the amount of option premiums it receives; however, the Fund can potentially lose up to the entire strike price of each option it sells. Due to the investment strategy of the Fund, it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

The S&P 500 Index is a capitalization-weighted index of 500 stocks selected by the Standard & Poor's Index Committee designed to represent the performance of the leading industries in the U.S. economy.
