Performance of less than one year is cumulative. You cannot invest directly in an index.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [wisdomtree.com](http://wisdomtree.com).**

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Heightened sector exposure increases the Fund’s vulnerability to any single economic, regulatory or other development impacting that sector. This may result in greater share price volatility. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit, and the Fund does not attempt to outperform its Index or take defensive positions in declining markets. Due to the investment strategy of this Fund, it may make higher capital gain distributions than other ETFs. Please read the Fund’s prospectus for specific details regarding the Fund’s risk profile.

The WisdomTree International Quality Dividend Growth Index is a fundamentally weighted Index designed to provide exposure to dividend paying developed market companies. The Index is comprised of the top 300 companies from the WisdomTree International Equity Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. Companies are weighted in the Index based on annual cash dividends paid.

MSCI EAFE Local Currency Index: A market cap-weighted index composed of companies representative of the developed market structure of developed countries in Europe, Australasia and Japan, with performance measured in local currency terms
