Japan Hedged Quality Dividend Growth Fund

JHDG

Fund Overview

The WisdomTree Japan Hedged Quality Dividend Growth Fund seeks to provide exposure to dividend-paying companies with growth characteristics in Japan while hedging exposure to fluctuations between the U.S. dollar and the yen.

Investment Strategy Description

The WisdomTree Japan Hedged Quality Dividend Growth Index is a fundamentally weighted index that measures the performance of dividend-paying common stocks with growth characteristics selected from the WisdomTree International Equity Index while at the same time neutralizing exposure to fluctuations between the Yen and the U.S. dollar.

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Funds focusing their investments on certain sectors increase their vulnerability to any single economic, regulatory or sector-specific development. This may result in greater share price volatility. The Fund focuses its investments in Japan, which can be impacted by the events and developments in Japan that can adversely affect performance. Dividends are not guaranteed and a company currently paying dividends may cease paying dividends at any time. The Fund uses various strategies to attempt to minimize the impact of changes in the Japanese yen against the U.S. dollar, which may not be successful. Investments in derivative investments can be volatile, may be less liquid than securities and may be more sensitive to the effect of varied economic conditions. As this Fund can have a high concentration in some issuers, the Fund can be adversely impacted by changes affecting those issuers. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit and the Fund does not attempt to outperform its Index or take defensive positions in declining markets. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund’s prospectus for specific details regarding the Fund’s risk profile.
