Fund Overview
The WisdomTree U.S. ESG Fund seeks to achieve its investment objective by integrating factor-based investing with U.S. companies who screen favorably on environmental, social, and governance (ESG) standards.

Why RESP?
- Use as the U.S. sleeve of a globally diversified ESG portfolio
- Boost exposure to higher rated environmental, social, and governance (ESG) companies without necessarily sacrificing performance
- Combines the societal benefits of ESG with the potential outperformance benefits of an actively managed / factor-based approach

Performance of less than one year is cumulative. You cannot invest directly in an index. Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Investors should read the prospectus carefully before investing.

There are risks associated with investing, including possible loss of principal. The Fund’s ESG investment strategy limits the types and number of investment opportunities available to the Fund and, as a result, the Fund may underperform other funds that do not have an ESG focus. Companies selected for inclusion in the Fund may not exhibit positive or favorable ESG characteristics at all times and may shift into and out of favor depending on market and economic conditions. While the Fund is actively managed, the Fund’s investment process is expected to be heavily dependent on quantitative models and the models may not perform as intended. Please read the Fund’s prospectus for specific details regarding the Fund’s risk profile.

The MSCI Extended ESG Focus Indexes (the ‘Indexes’) are designed to maximize their exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the underlying market capitalization weighted index.

The MSCI USA Extended ESG Focus Index is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the MSCI USA Index, its parent index.

The S&P 500 Index is a capitalization-weighted index of 500 stocks selected by the Standard & Poor’s Index Committee designed to represent the performance of the leading industries in the U.S. economy.
