

Notification of Sources of Distribution
Pursuant to Section 19(a) of the Investment Company Act of 1940

WisdomTree Barclays U.S. Aggregate Bond Enhanced Yield Fund
(Fund Ticker: AGGY; CUSIP: 97717X511)

Ex-Date: January 25, 2016

Record Date: January 27, 2016

Payable Date: January 29, 2016

The following table provides estimates of the sources of the Fund's distribution. These are only estimates and are subject to change based on the Fund's investment activity. These estimates are based on the Fund's fiscal year-to-date activity according to U.S. generally accepted accounting principles. These accounting principles may vary from those under federal tax law and, accordingly, may change the estimated characterization in the table below.

This information is being provided pursuant to Section 19(a) of the Investment Company Act of 1940, as amended, and should not be used for tax reporting purposes. In early 2017, after definitive information is available, the shareholders of the Fund will receive a Form 1099-DIV specifying how the distributions paid by the Fund during calendar year 2016 have been characterized for purposes of reporting the distributions on shareholders' tax returns.

Per Share Distribution	Source of Distribution				Fiscal Year End
	Net Investment Income	Short-Term Capital Gains	Long-Term Capital Gains	Return of Capital	
\$0.1200	\$0.04000	\$0.0000	\$0.0000	\$0.0800	August 31 st

On January 21, 2016, four days prior to the distribution ex-date, the number of shares outstanding of the Fund increased six-fold, to 600,000 from 100,000. As the additional Fund assets related to the new shares only earned net investment income for a short period of time prior to the distribution ex-date, the large increase in shares outstanding shortly before the distribution ex-date caused the per-share amount of net investment income of the distribution (\$0.04) to be significantly smaller than would have been the case absent the late-in-period increase in share count (prior to the late-in-period increase in share count it was estimated that net investment income per share would have been approximately \$0.12). The amount and source of future distributions, if any, may vary.
