The **Fund Distribution Yield** is the annual yield a Fund investor would receive in income distributions if the most recent income distribution stayed consistent going forward. It is calculated by annualizing the most recent income distribution and dividing by the Fund's NAV as of the date of this report. The distribution yield represents annualized income distributions from the Fund and does not represent the total returns of the Fund. Due to the seasonality and timing of the dividend income received from the underlying securities held by the equity Funds, the equity Funds' annualized distribution yield based on the most recent income distribution may not be representative of the distribution yield over the course of a full year.

The **SEC Standardized Yield** is a standard yield calculation developed and required by the Securities and Exchange Commission (SEC). The calculation is based on the most recent 30-day period prior to the date of this report and is designed to determine an approximate amount of theoretical current income generated by the securities in a Fund's portfolio, net of all Fund expenses and expressed as an annualized rate of return based on NAV. Unsubsidized yield reflects what the SEC Standardized Yield would have been had no fee waivers been in effect during the 30-day period. Without fee waivers, the SEC Standardized Yield would be lower.

The **Trailing 12-Month Distribution Yield** is calculated by dividing the sum of the Fund's income distributions during the last 12 months by the Fund's NAV as of the date of this report. This measure represents the yield over the prior twelve months if the investor had purchased the Fund and held it for a year, assuming no change in NAV. It may not be an accurate reflection of the actual return an investor may have received because the Fund's NAV is constantly changing due to market factors.

There are risks associated with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, real estate, currency, fixed income and alternative investments include additional risks. Investments in commodities may be affected by overall market movements, changes in interest rates and other factors such as weather, disease, embargoes and international economic and political developments. **Commodities and futures are generally volatile and are not suitable for all investors.** Please see prospectus for a discussion of risks.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. Eastern time net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

*Performance less than one year is cumulative.
