*SEC 30D Yield represents SEC 30 Day Yield as of previous month end. Expense Ratios are net ratios, net of waivers

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information. Past performance is not indicative of future results.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The most recent month end performance can be found at www.wisdomtree.com

SEC 30-day Yield reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses. The unsubsidized yield reflects the 30-Day yield if investment advisor were not waiving all or part of its fee or reimbursing the fund for part of its expenses.

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. Investing in mortgage- and asset-backed securities involves interest rate, credit, valuation, extension and liquidity risks and the risk that payments on the underlying assets are delayed, prepaid, subordinated or defaulted on. Due to the investment strategy of the Fund, it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

WisdomTree Funds are distributed by Foreside Fund Services, LLC., in the U.S. only.

While the Fund may invest in bonds denominated in foreign currencies (such as pounds or euros), the foreign currency exposures for those securities are hedged into U.S. dollars through positions in forward currency contracts. Forward currency contracts are agreements to buy or sell a specific currency at a future date at a price set at the time of the contract. Market Value of Securities refers to the weight of all stocks, bonds, and money market or collateral securities in the portfolio while Market Value of Currency Contracts refers to the weight of the forward currency contract hedges overlaid on the securities. Credit Ratings represent the highest of each portfolio constituent as currently rated by Standard and Poor's, Moody's, or Fitch. Ratings are generally measured on a scale that ranges from AAA (highest) to D (lowest). Ratings from AAA to BBB are considered investment-grade. Effective Duration measures the responsiveness of a bond's price

Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. Duration: A measure of a bond's sensitivity to changes in interest rates. The weighted average accounts for the various durations of the bonds purchased as well as the proportion of the total government bond portfolio that they make up.

WisdomTree Yield Enhanced U.S. Short-Term Aggregate Bond Fund - SHAG

as of December 14, 2018

As of the close of business Friday, December 14, 2018, the Fund had the following aggregate exposures.

The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. Securities with floating rates can be less sensitive to interest rate changes than securities with fixed interest rates, but may decline in value. The issuance of floating rate notes by the U.S. Treasury is new and the amount of supply will be limited. Fixed income securities will normally decline in value as interest rates rise. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. A Futures contract is an exchange traded contract that reflects the expected future value of a commodity, currency or Treasury security

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

WisdomTree Funds are distributed by Foreside Fund Services, LLC., in the U.S. only.

While the Fund may invest in bonds denominated in foreign currencies (such as pounds or euros), the foreign currency exposures for those securities are hedged into U.S. dollars through positions in forward currency contracts. Forward currency contracts are agreements to buy or sell a specific currency at a future date at a price set at the time of the contract. Market Value of Securities refers to the weight of all stocks, bonds, and money market or collateral securities in the portfolio while Market Value of Currency Contracts refers to the weight of the forward currency contract hedges overlaid on the securities. Credit Ratings represent the highest of each portfolio constituent as currently rated by Standard and Poor's, Moody's, or Fitch. Ratings are generally measured on a scale that ranges from AAA (highest) to D (lowest). Ratings from AAA to BBB are considered investment-grade. Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price.

Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions.

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. High-yield or "junk" bonds have lower credit ratings and involve a greater risk to principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. The Fund seeks to mitigate interest rate risk by taking short positions in U.S. Treasuries, but there is no guarantee this will be achieved. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effects of varied economic conditions.

Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. The Fund may engage in "short sale" transactions where losses may be exaggerated, potentially losing more money than the actual cost of the investment and the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Due to the investment strategy of certain Fund's they may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. A Futures contract is an exchange traded contract that reflects the expected future value of a commodity, currency or Treasury security.

Duration: A measure of a bond's sensitivity to changes in interest rates. The weighted average accounts for the various durations of the bonds purchased as well as the proportion of the total government bond portfolio that they make up.

Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. A Futures contract is an exchange traded contract that reflects the expected future value of a commodity, currency or Treasury security. Duration: A measure of a bond's sensitivity to changes in interest rates. The weighted average accounts for the various durations of the bonds purchased as well as the proportion of the total government bond portfolio that they make up.

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. The Fund seeks to mitigate interest rate risk by taking short positions in U.S. Treasuries, but there is no guarantee this will be achieved. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effects of varied economic conditions.

Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. The Fund may engage in "short sale" transactions of U.S. Treasuries where losses may be exaggerated, potentially losing more money than the actual cost of the investment and the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Investing in mortgage- and asset-backed securities involves interest rate, credit, valuation, extension and liquidity risks and the risk that payments on the underlying assets are delayed, prepaid, subordinated or defaulted on. Due to the investment strategy of certain Fund's they may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effects of varied economic conditions.

Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. Unlike typical exchange-traded funds, there is no index that the Fund attempts to track or replicate. Thus, the ability of the Fund to achieve its objective will depend on the effectiveness of the portfolio manager. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

WisdomTree Funds are distributed by Foreside Fund Services, LLC., in the U.S. only.

Effective Duration measures the responsiveness of a bond's price to interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. Supranational entities are regional or international organizations comprised of member countries that exist for the purpose of global economic development and financial stability. FX Forwards represent forward currency contracts - agreements to buy or sell a specific currency at a future date at a price set at the time of the contract.

This information must be preceded or accompanied by a prospectus. We advise you to consider the Funds' objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund. Please read the prospectus carefully before you invest. Call 1-866-909-9473 or go to WisdomTree.com for more information.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. The Fund focuses its investments in specific regions or countries, thereby increasing the impact of events and developments associated with the region or country which can adversely affect performance. Investments in emerging or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments.

Investments in currency involve additional special risks, such as credit risk and interest rate fluctuations. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As this Fund can have a high concentration in some issuers the Fund can be adversely impacted by changes affecting such issuers. Unlike typical exchange-traded Funds, there are no indexes that the Fund attempts to track or replicate. Thus, the ability of the Fund to achieve its objectives will depend on the effectiveness of the portfolio. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

WisdomTree Funds are distributed by Foreside Fund Services, LLC., in the U.S. only.

Embedded Income Yield represents the annualized rate of return generated by a Fund's investments in securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the next year given current holdings and market conditions. Forward currency contracts are agreements to buy or sell a specific currency at a future date at a price set at the time of the contract.

As of the close of business Friday, December 14, 2018, the Fund had the following aggregate exposures.

	Currency	Maturity	Weight (%)	Contribution		Individual	
				Embedded Income Yield (%)	Days to Maturity	Embedded Income Yield (%)	Days to Maturity
