*Screening date occurs after the market close on the last trading day of the month.

**If a security's volume factor falls below \$200 million at the annual screening, but is currently in the Index, it will remain in the Index. The securities' weight will be adjusted downward by an adjustment factor equal to its volume factor divided by \$400 million.

***Regional adjustment factor: The regional weights will be adjusted by a regional factor such that the regional weights are equal to the float-adjusted market capitalization weight of the universe of dividend and nondividend payers of the regional allocations of the U.S., developed and emerging markets that meet the general liquidity and market cap criteria for the base Index.

Common stocks, REITs, tracking stocks and holding companies are eligible for inclusion. ADRs, GDRs and EDRs¹ are excluded, as are limited partnerships, limited liability companies, royalty trusts, business development companies (BDCs) and mortgage REITs. Preferred stocks, closed-end funds, exchange-traded funds and derivative securities such as warrants and rights are not eligible. Passive foreign investment companies (PFICs) are excluded, unless stated otherwise. The publicly traded security for WisdomTree Investments, Inc., ticker WETF, is not eligible for inclusion in any of the WisdomTree equity Indexes.

¹ Exceptions apply. A depository receipt may be included in cases where the depository receipt is trading on the local exchange and the trading volume is higher than in the ordinary local listings.

² Prior to June 30, 2017, the WisdomTree U.S. Dividend Index, the WisdomTree U.S. High Dividend Index, the WisdomTree U.S. LargeCap Dividend Index, the WisdomTree U.S. MidCap Dividend Index, the WisdomTree U.S. SmallCap Dividend Index and the WisdomTree U.S. Dividend ex-Financials Index were known as the WisdomTree Dividend Index, the WisdomTree High Dividend Index, the WisdomTree LargeCap Dividend Index, the WisdomTree MidCap Dividend Index, the WisdomTree SmallCap Dividend Index and the WisdomTree Dividend ex-Financials Index, respectively.

Prior to June 30, 2017, the WisdomTree U.S. Earnings Index, the WisdomTree U.S. Earnings 500 Index, the WisdomTree U.S. MidCap Earnings Index, the WisdomTree U.S. SmallCap Earnings Index, the WisdomTree U.S. LargeCap Value Index were known as the WisdomTree Earnings Index, the WisdomTree Earnings 500 Index, the WisdomTree MidCap Earnings Index, the WisdomTree SmallCap Earnings Index, the WisdomTree LargeCap Value Index, respectively.

³ At the annual rebalance in December, the aggregate equity exposure will rebalance back to 60% and the fixed income exposure will rebalance back to 40%. Within the annual rebalance, if the exposure drifts above or below a 2% band, it will trigger a rebalance back to the target weights at calendar quarter end, i.e. December, March, June, September.

Within the equity exposure, at the annual rebalance date, the ETFs will be weighted by the following principles:

- Regional weights of U.S. vs. ex-U.S. should be within 4% relative to their market cap weight. If the exposures drift beyond a 4% band, it will trigger a rebalance back to the target weight set during the annual rebalance at calendar quarter end. This check will be done approximately 5 days before the calendar quarter end.
- Within regional classifications, ETFs that offer higher yields than the targeted benchmark will typically be included, while maintaining diversified country and sector exposure.

Within the fixed income exposure, at the annual rebalance date, the ETFs (or underlying exposure) will be weighted by the following principles:

- Aggregate duration for the index will be set within 1 year of the duration of the Barclays U.S. Aggregate Index at the annual rebalance date. The duration difference will be checked approximately 5 days before each calendar quarter end. If the difference drifts beyond a 0.5 year duration tolerance, it will trigger a readjustment to the targeted difference at quarter end. This adjustment will consist of a rebalance to target weights and then a supplemental shift of weight between higher and lower duration core positions until the target is achieved.

⁴ Chinese domestic listed equities were added during the special reconstitution in August 2017, in lieu of the annual reconstitution in October

Dividend Indexes: Indexes will apply a Dividend Stream® adjustment for constituents with dividend yields greater than 12% at the screening date. The Dividend Stream of these capped securities will be their market cap multiplied by 12%.

Gross cash dividends are based on dividends paid over the latest annual cycle as determined by the ex-date of the dividends. In the case of Australia, gross dividends do not reflect the franking credit for Australian investors. The currency rate used to translate the dividends to U.S. dollars is the exchange on the screening date. Shares outstanding for the total dividend calculation are based on the shares outstanding at the time of each dividend payment. Liquidity and market cap screens are based on the shares outstanding of the security in question for each company. The specified revenue filter is derived from all readily available sources at the time of screening, including recent publicly available annual company reports. In the event that revenue data is determined to be unavailable or incomplete, WisdomTree reserves the right to exclude them from the index.

Should any company achieve a weighting equal to or greater than 24.0% of the Index, its weighting will be reduced to 20.0% at the close of the current calendar quarter, and all other components in the Index will be rebalanced. Moreover, should the "collective weight" of Index component securities whose individual current weights equal or exceed 5.0% of the Index, when added together, equal or exceed 50.0% of the Index, the weightings in those component securities will be reduced so that their collective weight equals 40.0% of the Index at the close of the current calendar quarter, and other components in the Index will be rebalanced to reflect their relative weights before the adjustment. Further iterations of these adjustments may occur until no company or group of companies violates these rules.

WisdomTree applies a foreign investment screen to exclude companies that are not available to be purchased or transacted in by foreign investors (or certain segments of foreign investors) or cannot continue to be reasonably purchased or transacted in by foreign investors (or certain segments of foreign investors), as determined by the third-party independent index calculation agent and a data point referred to as "Degree of Open Freedom" (DOF) or by WisdomTree based generally on the guiding principles set forth below. The first test of a stock's investability is determining whether the market is open to foreign institutions. The third-party independent calculation agent determines the extent to which and the mechanisms foreign institutions can use to buy and sell shares on local exchanges and repatriate capital, capital gains and dividend income without undue constraint. Once determined that a market is open to foreign investors, the calculation agent then investigates each security that may be a candidate for inclusion. Each class of share is reviewed to determine whether there are any corporate bylaw, corporate charter or industry limitations on foreign ownership of the stock. The DOF is a variable that ranges from zero to one and indicates the amount of the security foreigners may legally own (0.00 indicates that none of the stock is legally available; 1.00 indicates that 100% of the shares are available). Any company with a DOF of 0 will not be eligible for the WisdomTree Indexes.

Effective with the October 2017 reconstitution, the "Cash Dividend Factor" will be multiplied by an "Investability Weighting Factor" (IWF) for all emerging markets securities within Global Dividend Indexes to account for foreign ownership restriction limits. The Cash Dividend Factor is derived by multiplying the U.S. dollar value of the security's annual dividend per share by the number of common shares outstanding for that security. The Investability Weighting Factor was developed by Standard & Poor's to reflect only those shares that are available to investors rather than all outstanding shares of a company. For Emerging Markets Consumer Growth Index, the "Earnings Factor" will be multiplied by an Investability Weighting Factor. The Earnings Factor is net income over the last four quarters.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. To obtain a prospectus containing this and other important information, please call 866.909.WISE (9473), or visit wisdomtree.com to view or download a prospectus. Read the prospectus carefully before you invest. Past performance does not guarantee future results.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effects of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region, which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Due to the investment strategy of certain Funds, they may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

You cannot invest directly in an index. Index performance does not represent actual fund or portfolio performance. A fund or portfolio may differ significantly from the securities included in the index. Index performance assumes reinvestment of dividends but does not reflect any management fees, transaction costs or other expenses that would be incurred by a portfolio or fund, or brokerage commissions on transactions in fund shares. Such fees, expenses and commissions could reduce returns. WisdomTree, its affiliates and their independent providers are not liable for any informational errors, incompleteness or delays or for any actions taken in reliance on information contained herein.
