

WISDOMTREE EUROPE HEDGED EQUITY FUND MAKES IT TO THE TOP OF THE CLASS

Jeremy Schwartz — Global Head of Research
12/15/2014

We believe that when a fund ranks number one in a particular investment category, it deserves some attention. This is particularly true when the fund category is generating a lot of attention as a valuation opportunity relative to the United States. As of October 31, 2014 The [WisdomTree Europe Hedged Equity Fund \(HEDJ\)](#), was ranked the number one fund, by MorningStar, out of 109 Europe-focused [open-ended \(OE\) mutual funds](#) and exchange-traded funds (ETFs) over the past year based on total return.¹ HEDJ is alone at the top, in our view illustrating the impact that a depreciating euro has had on [unhedged](#) investment options within this category. Given the policies being discussed and employed by the European Central Bank (ECB), it is hard to imagine a stronger euro compared to the U.S. dollar in the near future. So given this low euro environment, why layer the currency risk on your European equity investments? What if the problem with Europe isn't its equity market but rather the euro? HEDJ's performance indicates that its constituents at the equity level may have a chance to hold up even in the face of a depreciating currency. **HEDJ vs. the Morningstar Europe**

Stock	Peer			Group			(9/1/12–10/31/14)		
As of 10/31/2014									
Peer Group: Morningstar ETF & OE Europe Stock									
Fund Name	Return	1-Year		Return	2-Year		Return	Since 9/1/2012	
		Percent of Peer Group Beaten	Rank in Peer Group		Percent of Peer Group Beaten	Rank in Peer Group		Percent of Peer Group Beaten	Rank in Peer Group
WisdomTree Europe Hedged Equity Fund	4.89%	100%	1	15.85%	86%	14	15.52%	74%	25
Number of Managers		109		94		94		94	
Euro Currency Performance (vs. USD, Ann.)	-7.80%			-1.69%			-0.20%		

Periods shown correspond to rankings of HEDJ vs. the Morningstar Europe Stock peer group. Prior to 9/1/12, HEDJ was not in this Morningstar category and hence does not have a rank. Past performance is not indicative of future results. Source: Morningstar Direct. 2014 Morningstar, Inc. All rights reserved. Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. You cannot invest directly in an index.

Returns, as of 9/30/14 HEDJ is designed to track the returns of the [WisdomTree Europe Hedged Equity Index](#) after costs, fees and expenses. **The WisdomTree Europe Hedged Equity Index:** • [Hedges](#) the impact of the euro's return versus the U.S. dollar, such that the return experience is that of the local European equities. • Requires constituents to generate at

least 50% of their revenues outside of Europe, tilting the exposure toward multinational exporters that have the potential to benefit, over time, from a weakening euro. • [Rebalances](#) back to a measure of relative value—[dividends](#) paid—on an annual basis, such that the road to greater constituent representation runs through increasing dividends over time and not through increasing [market capitalization](#) **HEDJ & the Beauty of a “Plain Vanilla” Approach** ECB president Mario Draghi has stated that returning the ECB’s balance sheet to March 2012 levels—an expansion of 1 trillion euros from current levels—is a primary policy goal.² Since this policy, along with any other designed to stoke [inflationary](#) potential, should encourage a weakening of the euro, we think that hedging the currency risk and focusing on plain-vanilla exposure solely to European equities is an important consideration. We’ve seen from HEDJ’s results that it can have a big impact on the returns experienced over time. ¹Source: Morningstar. Refers to period 10/31/13–10/31/14.

Open-End Mutual Funds : Type of mutual fund that does not have restrictions on the amount of shares the fund will issue, so if demand is high enough the fund will continue to issue shares. These funds buy back shares when investors wish to sell.

Unhedged : Strategy that includes the performance of both the underlying asset as well as the currency in which it is denominated. The performance of the currency can either help or hurt the total return experienced.

Hedge : Making an investment to reduce the risk of adverse price movements in an asset. Normally, a hedge consists of taking an offsetting position in a related security, such as a futures contract.

Rebalance : An index is created by applying a certain set of selection and weighting rules at a certain frequency. WisdomTree rebalances, or re-applies its rules based selection and weighting process on an annual basis.

Dividend : A portion of corporate profits paid out to shareholders.

Market Capitalization : Market cap = share prices x number of shares outstanding. Firms with the highest values receive the highest weights in approaches designed to weight firms by market cap.

Inflation : Characterized by rising price levels.
