7 high-conviction investment ideas for Q4 2026 and beyond

Published 28 September 2026

Pierre Debru
Head of Research, Europe

Key Takeaways

- High dividend equities: Income and valuation discipline can help diversify portfolios away from expensive market leaders.
- Japan, yen hedged: Governance reform and earnings growth support the market.
- Emerging markets ex state-owned enterprises: Removing state-owned enterprises targets the companies most likely to convert growth into shareholder returns.
- AI infrastructure: Frontier model providers have scaled to substantial revenues, while hyperscaler capex is accelerating massive infrastructure buildout and intensifying bottlenecks across chips, data centres and power.
- Quantum computing: Public investment, security deadlines, corporate roadmaps and faster hardware progress are building momentum across the ecosystem and bringing commercialisation closer.
- Broad commodities: Rotating leadership across energy, metals and agriculture argues for diversified exposure.
- Solana: Rising network use makes it an investment in on-chain adoption rather than monetary scarcity.

Since we published our September outlook, markets have reinforced its core message: earnings growth is broadening, emerging markets and Japan remain well supported, and investors are becoming more selective within artificial intelligence (AI). At the same time, higher bond yields in the US and continued energy price volatility leave portfolios exposed to abrupt shifts in leadership.

Our response is to broaden exposure to the structural growth themes that have driven markets. A barbell approach could fit this moment: on one side, targeted exposure to AI and other emerging technologies, and on the other, cheaper, income-focused equities alongside real assets. The following seven investment ideas translate that view into practical exposures for the next six months and beyond. Read the full Autumn Outlook here.

1. High dividend equities as a stabiliser in volatile markets

Dividend investing has been around for a long time. Over time, it has shown that investing directly in companies that pay dividends in cash each year works as an income-generating approach. It's one of the simplest ideas in investing: pay less for a set of future cash flows and expect more in return. High dividend equities offer attractive income, downside protection and inflation resilience, qualities that matter acutely in today's volatile, inflationary environment.

WisdomTree has been a global pioneer in dividend-weighted equity strategies for over two decades and offers a range of exchange-traded funds (ETFs) focused on income: WisdomTree's US, Europe, emerging-market and global High Dividend UCITS ETFs (Tickers: DHS, EEI, DEM and WDIV). The investment process begins with dividend-paying, liquid companies, uses quality and momentum measures to remove higher-risk businesses and potential value traps, selects the top 30% by dividend yield, and weights by the cash dividends paid. The regional range allows investors to target the markets that best fit their allocation.

2. Japan reform and reflation with the yen hedged

Japan remains one of our preferred developed-market exposures. Tokyo Stock Price Index (TOPIX) reached record highs in the first half of 2026 and aggregate earnings for the year to March rose 27%[1]. AI-linked demand, a tentative return to positive real wages and continued governance reform support the longer-term case. The revised Corporate Governance Code should keep pressure on companies to use cash more productively and improve shareholder returns. The near-term complication is the volatility on the yen as domestic inflation could lead to a narrowing of the rate gap with the US.

The WisdomTree Japan Equity UCITS ETF - USD Hedged (DXJ) fits this combination. It invests in dividend-paying Japanese exporters, requiring companies to generate at least 20% of revenue outside Japan, then applies quality and momentum screens and weights constituents by their dividend stream. Exporters can benefit from the domestic growth drivers in Japan and from a still competitive yen, while the currency-hedged share class seeks to reduce the effect of yen moves on US dollar returns. Over the last 12 months, from the point of view of a euro-based investor, the WisdomTree Japan Equity UCITS ETF has gained 41.31% when the MSCI Japan unhedged would have risen only 27.3%[2]. The main risks are a stronger yen, weaker global demand and Japan's dependence on imported energy. Past performance is not a reliable indicator of future performance. The value of an investment may go down as well as up.

3. Emerging markets: strip out the state

Emerging markets combine structural growth, relatively cheap currencies, reasonable valuations and improving earnings revisions. Yet strong economic growth has not consistently reached minority share-holders. Governance is a central reason: state-owned enterprises may allocate capital to policy objectives rather than maximise shareholder value and can be more exposed to state-directed intervention. Excluding them tilts an allocation towards commercially run companies where growth is more likely to translate into earnings and distributions.

The WisdomTree Emerging Markets ex-State-Owned Enterprises UCITS ETF (XSOE) systematically excludes companies in which government ownership exceeds 20%. That creates a growth-tilted core

exposure to private-sector businesses while reducing a distinct governance risk embedded in broad emerging-market indices. It also complements the outlook's emphasis on Asia's privately owned technology and semiconductor franchises. The screen does not remove the wider political, regulatory, currency or liquidity risks associated with emerging markets.

4. Quantum computing moves towards commercial readiness

Quantum computing has become a national and corporate priority. US policy has moved beyond research grants towards direct investment, while deadlines for federal systems to migrate to post-quantum cryptography create a near-term procurement need. Leading quantum hardware developers are also publishing detailed roadmaps, with several pointing to the period around 2030 as a critical milestone for large-scale fault-tolerant systems. The opportunity therefore extends well beyond hardware, encompassing post-quantum cryptography, networking, software and enabling infrastructure, as companies and governments are preparing for the potential start of the quantum era. Importantly, the timing and eventual leaders remain highly uncertain.

The WisdomTree Quantum Computing UCITS ETF (WQTM), developed with quantum software specialist Classiq, approaches the theme as an ecosystem. Companies are assessed on the relevance and purity of their quantum activities, then weighted to balance focused pure plays with diversified technology leaders. That is preferable, in our view, to choosing one hardware architecture before the industry has settled. Since its launch on 27 August 2025, the ETF has returned 42.4%, 19% more than the Nasdaq 100[3]. Past performance is not a reliable indicator of future performance. The value of an investment may go down as well as up.

5. AI infrastructure as spending begins to show returns

The debate around AI is shifting from adoption to economics and scale. Leading frontier model providers have already grown revenues into the billions, demonstrating substantial commercial demand for AI applications and inference. At the same time, hyperscalers continue to commit significant capital to the AI infrastructure required to support that growth. Bottlenecks are forming across data centres, power generation and the broader value chains that support them. Meanwhile, software is benefiting from a clear revival after markets overshot on the downside in Q1 this year. Together, these dynamics reinforce our preference for exposure across the AI value chain.

The WisdomTree Artificial Intelligence UCITS ETF (WTAI) is designed for that broader opportunity. Its index allocates 50% to ‘Enablers’ that supply components and infrastructure, 40% to ‘Engagers’ whose products and services are built around AI, and 10% to ‘Enhancers’ that use AI within a wider business. This structure gives meaningful weight to semiconductors, hardware, software and applications without allowing current market capitalisation alone to determine exposure. Year to date, the ETF is outperforming a classic technology benchmark like the Nasdaq 100 by 18.9% (33.9% compared to 15%)[4]. Of course, AI investment risks remain: demanding valuations, technological disruption and a slowdown in AI capital spending. Past performance is not a reliable indicator of future performance. The value of an investment may go down as well as up.

6. Broad commodities as leadership keeps rotating

Commodity leadership has rotated repeatedly in 2026. Precious metals moved first, energy repriced around conflict in the Middle East, and industrial metals benefited from AI infrastructure, electrification and defence demand meeting constrained supply. Agriculture has become more important as El Nino and fragile fertiliser supply chains threaten crops. Given the next shock and its beneficiaries are difficult to predict, a broad allocation is the most resilient way to stay invested across the full opportunity set.

The WisdomTree Enhanced Commodity UCITS ETF (WCOA) starts from the same commodity universe as the Bloomberg Commodity Index but adjusts weights using price momentum, cross-sectional backwardation and changes in futures-curve slope. It also selects contracts to reduce negative carry or maximise roll yield, while limiting deviations from the broad benchmark. The result is diversified exposure that can adapt as leadership changes. Over the last year alone, the ETF has outperformed the Bloomberg Commodity Index by 3.7%, returning 48.6%[5]. Past performance is not a reliable indicator of future performance. The value of an investment may go down as well as up. Commodity investments can be volatile and are sensitive to geopolitical events, weather, supply and demand conditions and movements in futures curves.

7. Solana is powering the on-chain economy

Digital-asset prices have weakened over the past year even as regulation and network use have advanced. Solana's case differs from bitcoin's scarcity-based proposition: its value depends on economic activity across payments, stablecoins, tokenisation and decentralised finance. The network processed around one-third of decentralised exchange volume in the first half of 2026, while high throughput and low transaction costs have attracted firms including Visa and Stripe. Stronger adoption alongside lower valuations does not guarantee a near-term recovery, but it improves the long-term risk-reward discussion.

WisdomTree Physical Solana (SOLW) provides direct, physically backed exposure without requiring investors to manage wallets or private keys. The underlying assets are held through institutional-grade custody, in cold storage, and the exchange-traded product (ETP) earns staking rewards from Solana's proof-of-stake mechanism. This makes WisdomTree Physical Solana a practical way to access the network's adoption thesis through established infrastructure. Solana and other crypto assets are highly volatile. The ETP also carries risks associated with staking, custody, regulation, technology and the Solana network itself.

Conclusion

These seven ideas share one portfolio objective: participate in structural change without depending on a narrow group of winners. AI infrastructure and quantum computing retain exposure to technological growth; Japan, emerging markets and high dividend equities broaden the equity engine; commodities and Solana add distinct sources of return and risk.

WisdomTree Issuer ICAV

Certain funds referred to in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an open-ended, umbrella-type Irish Collective Asset-management Vehicle with segregated liability between sub-funds and is authorised by the Central Bank of Ireland ("CBI") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under Irish law. Each fund is represented by a separate class of shares (the "Shares") issued by WT Issuer.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled 'Risk Factors' for further details of risks associated with an investment in the Shares.

The summary of investor rights associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

WisdomTree Enhanced Commodity Index

The base weightings for each commodity in the WisdomTree Enhanced Commodity Index are determined by reference to Bloomberg® Commodity Indices. "BLOOMBERG®" and the Bloomberg indices listed as index components therein (the "Bloomberg Indices") are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the Bloomberg Indices (collectively, "Bloomberg") and have been licensed for use for certain purposes by WisdomTree Issuer ICAV as the umbrella Irish collective asset-management vehicle of the Fund (the "Licensee"). Bloomberg is not affiliated with Licensee, and Bloomberg does not approve, endorse, review, or recommend the Fund. Bloomberg does not guarantee the timeliness, accuracy, or completeness of any data or information relating to the Fund.

WisdomTree Issuer X Limited

The products discussed in this document are issued by WisdomTree Issuer X Limited (the “Issuer”). Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled “Risk Factors” for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Swissquote Bank Ltd (“Swissquote”), Coinbase Custody Trust Company LLC (“Coinbase”), BitGo Trust Company, Inc (“BitGo”) any of their affiliates or anyone else or any of their affiliates. Each of Swissquote, Coinbase and BitGo disclaims all and any liability whether arising in tort, contract or otherwise which it might have in respect of this document or its contents otherwise arising in connection herewith.

The product discussed in this document is an unregulated ETP, approved to trade on certain regulated exchanges within Europe and the UK. Cryptocurrencies are a high-risk investment and may not be suitable for all types of investors. Prospective investors should be aware that the price of the underlying asset(s) by which the securities are secured can demonstrate higher volatility than other asset classes and consequently the value of the securities may be extremely volatile. You must ensure that the nature, complexity and risks associated with cryptocurrencies are suitable for your objectives in light of your circumstances and financial position.

Don’t invest unless you’re prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong.

The digital assets underlying WisdomTree’s exchange traded products are held using secure, institutional-grade custody solutions that prevent unauthorised access or movement. Digital assets are primarily stored offline in cold wallets and their transfer requires authorisation from multiple independent parties with a redundancy of locations, communication methods and authentication devices.

Our operational processes are regularly updated to protect against evolving threats and are kept confidential for security reasons.

SOLW Index Disclaimer

COINDESK® and CoinDesk Solana Benchmark London Settlement Rate (the “**Index**”) are trade or service marks of CoinDesk Indices, Inc. (“**CDI**”), the administrator of the Index, and/or its licensors. CDI or CDI's licensors own all proprietary rights in the Index.

CDI is not affiliated with/WisdomTree Issuer X Limited (the "**Issuer**") and does not approve, endorse, review, or recommend WisdomTree Physical Solana (the "**Product**"). CDI does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the Index and shall not be liable in any way to the Issuer, investors in or holders of the Product or other third parties in respect of the use or accuracy of the Index or any data included therein.

For Investors in Switzerland:

This document/constitutes/an advertisement of the financial product(s) mentioned/herein.

The prospectus (in English only), a summary of the WIXL prospectus (in German, French and Italian) and the key investor information documents (KID) (in German, French and Italian) are available from WisdomTree's website: https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports

For WisdomTree UCITS products only: the representative and paying agent of the ETPs in Switzerland is Société Générale Paris, Zurich Branch,/Talacker/50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of/jurisdiction/and performance is at the registered seat of the representative and paying agent. Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA may only be available to Qualified Investors.

FOR INVESTORS IN FRANCE:

Further information regarding the WisdomTree exchange-traded product(s) detailed herein, such as a detailed list of the underlying investments and the indicative net asset value, can be obtained by visiting the WisdomTree website at (www.wisdomtree.eu).

The product is intended for retail investors who: (i) can withstand capital loss, are not seeking to preserve capital and are not seeking a capital guarantee; (ii) have specific knowledge or experience in investing in similar products and in the financial markets; and (iii) are looking for a product that provides exposure to the performance of the underlying asset(s) and have an investment horizon in line with the recommended holding period indicated in the KID.

In addition, the indicative net asset value is shown on the Reuters and Bloomberg pages of the product and may also be mentioned on the websites of the product's listing venues.

Units in a listed exchange-traded product purchased on the secondary market generally cannot be sold directly back to the listed exchange-traded product. For investors who are not authorised participants, the purchase and sale of units must be done on a secondary market with the help of an intermediary (e.g., a broker), and may therefore be subject to additional fees and taxes. In addition, it is possible that investors may pay more than the current net asset value when purchasing units and receive less than the current net asset value when selling them.

Investors should carefully read the specific risks detailed under the section entitled 'What are the risks and what could I get in return?' in the Key Information Document for Packaged Retail and Insurance-based Investment Products (PRIIPs KID) and under the section entitled 'Risk Factors' in the Prospectus of the Issuer for further details of risks associated with an investment in the product detailed herein.

Investors are advised that the prospectus is available in French and English.

This document is a promotional material relating to the financial product(s) mentioned herein. The prospectus and the Key Investor Information Document (KIID) are available on the WisdomTree website: https://www.wisdomtree.eu/resource-library/prospectus-and-regulatory-reports

The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Central Bank of Ireland as UCITS compliant with European regulations although it may not have to comply with the same rules as those applicable to a similar product approved in France.

The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, any supplements or addenda thereto, the Key Information Document, the latest annual reports and the instrument of incorporation) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this UCITS presents disproportionate communication on the consideration of non-financial criteria in its management.

For Investors in Malta: This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

For Investors in Monaco: This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.

For Investors in Israel:

Offering materials for the offering of the securities have not been filed with or approved or disapproved by the United States Securities and Exchange Commission or any other state or federal regulatory authority, nor has any such regulatory authority passed upon or endorsed the merits of this offering or passed upon the accuracy or completeness of any offering materials. Any representation to the contrary is unlawful. The products mentioned herein have not been approved by the Israel Securities Authority and will only be distributed to Israeli residents in a manner that will not constitute “an offer to the public” under sections 15 and 15a of the Israel Securities Law, 5728-1968 (“the Securities Law”) or section 25 of the Joint Investment Trusts Law, 5754-1994 (“the Joint Investment Trusts Law “), as applicable. The products are being offered to a limited number of investors (35 investors or fewer during any given 12 month period) and/or those categories of investors listed in the First Addendum (“the Addendum”) to the Securities Law, “Sophisticated Investors”) who in each case have provided written confirmation that they qualify as Sophisticated Investors, and that they are aware of the consequences of such designation and agree thereto; in all cases under circumstances that will fall within the private placement or other exemptions of the Joint Investment Trusts Law, the Securities Law and any applicable guidelines, pronouncements or rulings issued from time to time by the Israel Securities Authority.

This prospectus or this document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Any offeree who purchases a product is purchasing such product for its own benefit and account and not with the aim or intention of distributing or offering such product to other parties (other than, in the case of an offeree which is a Sophisticated Investor by virtue of it being a banking corporation, portfolio manager or member of the Tel-Aviv Stock Exchange, as defined in the Addendum, where such offeree is purchasing a product for another party which is a Sophisticated Investor).

Nothing in this document should be considered investment advice or investment marketing as defined in the Regulation of Investment Counselling, Investment Marketing and Portfolio Management Law, 5755-1995. Investors are encouraged to seek competent investment counselling from a locally licensed investment counsel prior to making the investment. A recipient of this document may be required to provide confirmation that it is a Sophisticated Investor purchasing a product for its own account or, where applicable, for other Sophisticated Investors.
