

# Carbon Capture: the missing link for decarbonising the world

Published 26 February 2024

## Key Takeaways

- Close to 300 million tonnes of CO<sub>2</sub> has already been safely and successfully injected underground.
- The number of CCS projects being proposed or under development is expected to reach over 300 million tonnes per annum by 2030, up from around 45.9 million tonnes in 2022.
- The CCS market, estimated at \$3.28 billion in 2022, is projected to grow at a compound annual growth rate of 7.1% to 2030.
- Carbon capture and storage is a vital aid in helping develop a circular economy.

Carbon Capture and Storage (CCS) refers to the process of capturing carbon dioxide (CO<sub>2</sub>) emissions and storing them safely so that they do not harm the environment. This term encapsulates technologies that capture emissions at the source as well as those that capture CO<sub>2</sub> from the atmosphere.

Source: Global CCS Institute, 2024.

According to the CCS Institute, CCS is already happening around the world using a wide range of technologies to capture emissions, depending on their source. The Institute states that there are currently 29 facilities, with a cumulative capacity of around 40 million tonnes per annum – the equivalent of taking nearly eight million cars off the road. Close to 300 million tonnes of CO<sub>2</sub> has already been safely and successfully injected underground.

## WisdomTree Recycling Decarbonisation UCITS ETF (WRCY)

The [WisdomTree Recycling Decarbonisation UCITS ETF \(WRCY\)](#), built in partnership with experts TortoiseEcofin, is founded on two key pillars. The first pillar is waste to energy, which is the process of generating energy from waste such as household waste, animal manure, agriculture products and/or animal fats. This theme includes companies engaged in the production of renewable fuels, such as sustainable jet fuel, as well as ethanol and other biomass, like wood pellets. The second pillar is recycling. These companies are engaged in recycling business activities including traditional recycling activities like plastic recycling, where plastic is recycled into original materials such as polypropylene for re-use, and lithium-ion battery recycling, as well as companies engaged in carbon capture and sequestration.

WRCY is classified as SFDR Article 93.

## The tailwinds for adoption

Firstly, heavy industries that are difficult to decarbonise are embracing carbon capture. Cement manufacturing is one such example. Heidelberg Cement, a global cement manufacturer, is developing eight carbon capture initiatives around the world. Steel manufacturer, ArcelorMittal, has also integrated carbon capture within its multi-billion-dollar investment program. The production of blue hydrogen (made from natural gas and emissions subjected to CCS) also benefits from the technology. Aramco, the world's largest oil company, is employing this tool to produce sustainable hydrogen<sup>4</sup>.

Secondly, policy support is also helping with CCS adoption. The Inflation Reduction Act includes tax credits of \$85/tonne for CCS projects that reduce emissions from fossil fuels<sup>5</sup>. In Europe, European Union Allowances (EUAs), which put a price on the emissions of entities regulated within the Emissions Trading Scheme (ETS), are meant to incentivise the adoption of clean technologies. The higher the price of emitting CO<sub>2</sub>, the more companies will be incentivised to turn towards solutions like renewable energy and CCS.

We know that no single solution can help us fully decarbonise the world. Renewable energy, electrification, recycling, etc must all play a role – and so must carbon capture. Fortunately, the adoption of this technology is on the rise. The number of CCS projects being proposed or under development is expected to reach over 300 million tonnes per annum by 2030, up from around 45.9 million tonnes in 2022<sup>6</sup>. The CCS market, estimated at \$3.28 billion in 2022, is projected to grow at a compound annual growth rate of 7.1% to 2030<sup>7</sup>.

## Companies at the forefront

As the space develops, business models are also evolving. Aker has established itself as a leading player in the industry offering a carbon capture service as a one-stop solution. Instead of businesses incurring large capital expenditure to reduce or eliminate their emissions, they can employ Aker and pay per tonne of CO<sub>2</sub> captured, letting Aker take care of the full value chain of CCS, from capture through to transportation and storage.

NET Power is another player in the industry, which produces energy by combusting natural gas and either injecting the CO<sub>2</sub> back into the process for energy generation or capturing and storing it safely. The company claims that its technology captures over 97% of CO<sub>2</sub> emissions from power generation.

LanzaTech presents yet another business model while still operating in the same industry. The company takes it a step further by transforming the captured carbon into something valuable and useful at scale. This helps reduce the need for fossil carbon in consumer goods and sustainable aviation fuels.

## The circular economy

Carbon capture and storage is a vital aid in helping develop a circular economy. Our traditional model of utilising natural resources has historically been linear: take, make, and dispose. A circular model, in contrast, is one in which we take, make, and recycle. And when recycling is not possible, a circular model aims to minimise the detrimental impact on the environment, like storing carbon safely underground.

### **WisdomTree Issuer ICAV**

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as

an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund. Investors should read the prospectus of WT Issuer ("WT Prospectus") before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares.

### **WisdomTree Recycling Decarbonisation UCITS ETF**

The Tortoise Recycling Decarbonization UCITS IndexSM (the "Index") is the exclusive property of TIS Advisors, LLC. TIS Advisors, LLC makes no express or implied representation, guarantee or assurance with regard to (a) the advisability in investing in the Fund; and/or (b) the results obtained or to be obtained by any person or entity from the use of the Fund. The Index is calculated by Solactive AG ("Solactive"). The financial instruments that are based on the Index are not sponsored, endorsed, promoted or sold by Solactive in any way, and Solactive makes no express or implied representation, guarantee or **assurance with regard to:** (a) the advisability in investing in the financial instruments; (b) the quality, accuracy and/or completeness of the Index or the calculations thereof; and/or (c) the results obtained or to be obtained by any person or entity from the use of the Index. It is not possible to invest directly in an index.

### **Notice to Investors in Switzerland – Qualified Investors**

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus and the key investor information documents (KIID) are available from WisdomTree¼s website: **https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports**

Some of the sub-funds referred to in this document may not be registered with the Swiss Financial Market Supervisory Authority (“FINMA”). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

### **For Investors in France**

The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public. The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

### **For Investors in Malta**

This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

### **For Investors in Monaco**

This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco
