What's Hot: Time for action

Head of Commodities and Macroeconomic Research, WisdomTree Europe

Key Takeaways

- The Fed raised rates 25 basis points to 3.75%–4.00%, validating bond-market expectations as persistent inflation pushed Chair Warsh to finally 'walk the walk' on his hawkish rhetoric.
- With core PCE inflation expected to remain near 3% and markets pricing another increase by year-end, September's hike may not be the Fed's last if growth stays firm and inflation remains sticky.
- Higher funding costs, driven by the Fed and by a rising term premium, will do most of the tightening work, leaving the consumer and housing sectors most exposed.

MARKETING COMMUNICATION – Please refer to the prospectus and KID of the relevant fund before making any final investment decisions.

Patience Over

The US Federal Reserve (Fed) found itself backed into a corner ahead of its much-publicised hawkish pivot. While some in the Fed had argued for patience in the face of energy supply shocks, the writing was already on the wall after Kevin Warsh, through his Jackson Hole speech, admitted that core measures of inflation were higher than desired. The US economy is seeing strength in capex and manufacturing activity. The hope was that consumer and labour market weakness would provide enough of an offset for the Fed to wait and monitor pass-through effects. Increased volatility in long-term bond yields, with a rising term premium, meant that patience was no longer a policy option.

The Fed's actions mark the first of one, maybe two rate hikes to reverse last year's cuts, rather than the start of a new tightening cycle, that will slow down the US economy and tighten financial conditions through credit channels. Whether one or two hikes will depend on two unconnected but highly consequential drivers. The first is the conflict in the Middle East and its impact on global energy prices. The fact that bond markets, and in particular shorter-term bond yields, have seen increased volatility has been largely driven by the sharp increase in oil prices. This backdrop is more unsettling given shortages developing in refined products such as diesel and jet fuel. The other driver worth mentioning is the resurgence in US capex and manufacturing activity backed by the AI buildout.

The multi-year nature of this spend helps support economic growth, corporate earnings and increased issuance of largely investment grade debt.

Given the tailwinds this spending creates, the Federal Reserve may have felt more comfortable addressing the inflation half of its dual mandate as labour market weakness has started to reverse. While the Fed's actions today may not provide a clear antidote for supply-side inflation via energy prices, they will help limit concerns that the new Chair was not aware of the risks in getting back to the 2% target. The press conference, unlike the one in July, was well handled, and a unanimous vote allayed fears of an acrimonious path under new leadership. All eyes will now turn to upcoming data around possible pass-through of pricing pressure and all-important oil prices.

Growth, the Curve and Funding Costs

A quarter-point move will not slow the economy on its own, but one or two hikes, on top of higher energy prices, is another matter. Most of the tightening will come through credit channels, as banks tighten lending standards and borrowing costs reset higher for small businesses and households. Housing, autos and commercial real estate usually slow first. Working in the other direction is the AI buildout, which is contracted over several years, is relatively insensitive to a 100-basis move in policy rates.

The Bottom Line

The Fed took its first steps under new leadership to start moving the economy back towards its target inflation level. While the hope will be that offsetting strength in parts of the economy limits the damage, the consumer and housing sectors will remain under pressure. We anticipate a recalibration of 2027 earnings and GDP growth estimates, and a test to the unbridled enthusiasm seen particularly in cyclical sectors.

Positioning with WisdomTree

The backdrop favours short-duration debt instruments, which are less impacted by concerns around Fed policy uncertainty, inflation risks and varying term premia. The WisdomTree USD Floating Rate Treasury Bond UCITS ETF (**Ticker: USFR LN**) provides exposure to US Treasury floating-rate notes and may therefore be considered in a short-duration allocation, tracking the Bloomberg Barclays U.S. Treasury Floating Rate Bond Index for diversified exposure to newly issued US government floating rate notes (FRNs). Because the yield on FRNs is designed to reflect changes in US short-term interest rates, USFR offers lower duration exposure than fixed-coupon Treasuries, while its government-backed coupons reduce the corporate credit risk that comes with standard floating-rate products. As the Fed reverses last year's rate cuts, the strategy has lower interest-rate duration than conventional longer-maturity fixed-rate Treasury exposure. This does not eliminate market, interest-rate or other investment risks.

Within equities, the WisdomTree US Quality Dividend Growth UCITS ETF (**Ticker: DGRW LN**) tracks a strategy that has lagged the sharper rally in growth and momentum names this year. The underlying index screens out the weakest-quality dividend payers by return on equity and return on assets, ranks the remainder on long-term earnings growth, and weights the survivors by their projected cash dividend stream. That combination provides exposure to companies selected using quality and dividend-growth

characteristics. The strategy remains exposed to equity-market and strategy-specific risks and may underperform other investment styles.

Past performance does not predict future returns.

Commodities have been the standout asset class in 2026, outperforming both equities and bonds. The Bloomberg Commodity Index (BCOM) returned 32.8% Year to Date, well ahead of the S&P 500's 11.4% and the near-flat -0.2% delivered by the US Aggregate Bond index over the same period[1]. With concerns building around fiscal and debt sustainability, and interest rates moving higher rather than lower, commodities' inflation-hedging qualities and low correlation to traditional assets could keep the asset class attractive on a relative basis. The WisdomTree Enhanced Commodity UCITS ETF (**Ticker: WCOA LN**) provides diversified commodity exposure through an enhanced commodity index methodology: its multi-factor index tilts commodity weights away from the standard Bloomberg Commodity Index basedon price momentum, cross-sectional backwardation, and slope momentum. This approach has continued to add value – WCOA returned 41.1% Year to Date, ahead of BCOM's 32.8%[2].The methodology may perform differently from the broader commodity market as leadership rotates across sectors and may underperform it.

Risks to consider: Investments in these products involve the risk of loss and their value may fall. Floating-rate Treasury exposure remains subject to interest-rate, market and currency risks, and yields may decline if short-term US interest rates fall. Equity strategies such as DGRW remain exposed to equity-market and strategy-specific risks and may underperform other investment styles. Commodity investments can be highly volatile and are affected by commodity prices, futures curves and broader market conditions. WCOA's enhanced methodology may underperform the broader commodity market. Investors should refer to the relevant prospectus and KID for full details of the risks.

Conclusion

Our house view remains for one, maybe two further hikes, not the three or four some in the market are pricing – a shallower path that still tightens financial conditions through credit channels, but leaves more room for the AI-driven capex cycle to keep supporting growth. Against this backdrop, short-duration fixed income, quality-oriented equities and broad commodities are three areas that may be relevant when considering the implications of higher rates and persistent inflation. USFR provides exposure to US Treasury floating-rate notes; DGRW follows a quality and dividend-growth-oriented US equity strategy; and WCOA provides diversified commodity exposure through an enhanced commodity index methodology. Each is exposed to different risks and may perform differently as economic and market conditions evolve. The key swing factor to watch is upcoming labour market and inflation data: a clear rollover in core PCE would support our one-or-two-hike call, while another sticky print would raise the risk of the deeper tightening cycle the market is currently pricing.

WisdomTree Issuer ICAV

Certain funds referred to in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an open-ended, umbrella-type Irish Collective Asset-management Vehicle with segregated liability between sub-funds and is authorised by the Central Bank of Ireland ("CBI") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under Irish law. Each fund is represented by a separate class of shares (the "Shares") issued by WT Issuer.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled 'Risk Factors' for further details of risks associated with an investment in the Shares.

The summary of investor rights associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

WisdomTree Enhanced Commodity UCITS ETF

The base weightings for each commodity in the WisdomTree Enhanced Commodity Index are determined by reference to Bloomberg® Commodity Indices. "BLOOMBERG®" and the Bloomberg indices listed as index components therein (the "Bloomberg Indices") are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the Bloomberg Indices (collectively, "Bloomberg") and have been licensed for use for certain purposes by WisdomTree Issuer ICAV as the umbrella Irish collective asset-management vehicle of the Fund (the "Licensee"). Bloomberg is not affiliated with Licensee, and Bloomberg does not approve, endorse, review, or recommend the Fund. For Investors in Switzerland:

This document/constitutes/an advertisement of the financial product(s) mentioned/herein.

The prospectus (in English only) and the key investor information documents (KID) (in German, French and Italian) are available from WisdomTree’s website:/https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports

For WisdomTree UCITS products only: the representative and paying agent of the ETPs in Switzerland is Société Générale Paris, Zurich Branch,/Talacker/50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of/jurisdiction/and performance is at the registered seat of the representative and paying agent. Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority (“FINMA”). In Switzerland, such sub-funds that have not been registered with FINMA may only be available to Qualified Investors.

FOR INVESTORS IN FRANCE:

Further information regarding the WisdomTree exchange-traded product(s) detailed herein, such as a detailed list of the underlying investments and the indicative net asset value, can be obtained by visiting the WisdomTree website at (www.wisdomtree.eu).

The product is intended for retail investors who: (i) can withstand capital loss, are not seeking to preserve capital and are not seeking a capital guarantee; (ii) have specific knowledge or experience in investing in similar products and in the financial markets; and (iii) are looking for a product that provides exposure to the performance of the underlying asset(s) and have an investment horizon in line with the recommended holding period indicated in the KID.

In addition, the indicative net asset value is shown on the Reuters and Bloomberg pages of the product and may also be mentioned on the websites of the product's listing venues.

Units in a listed exchange-traded product purchased on the secondary market generally cannot be sold directly back to the listed exchange-traded product. For investors who are not authorised participants, the purchase and sale of units must be done on a secondary market with the help of an intermediary (e.g., a broker), and may therefore be subject to additional fees and taxes. In addition, it is possible that investors

may pay more than the current net asset value when purchasing units and receive less than the current net asset value when selling them.

Investors should carefully read the specific risks detailed under the section entitled 'What are the risks and what could I get in return?' in the Key Information Document for Packaged Retail and Insurance-based Investment Products (PRIIPs KID) and under the section entitled 'Risk Factors' in the Prospectus of the Issuer for further details of risks associated with an investment in the product detailed herein.

Investors are advised that the prospectus is available in French and English.

This document is a promotional material relating to the financial product(s) mentioned herein. The prospectus and the Key Investor Information Document (KIID) are available on the WisdomTree website: https://www.wisdomtree.eu/resource-library/prospectus-and-regulatory-reports

The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Central Bank of Ireland as UCITS compliant with European regulations although it may not have to comply with the same rules as those applicable to a similar product approved in France.

The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, any supplements or addenda thereto, the Key Information Document, the latest annual reports and the instrument of incorporation) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this UCITS presents disproportionate communication on the consideration of non-financial criteria in its management.

For Investors in Malta: This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

For Investors in Monaco: This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.

For Investors in Israel: Offering materials for the offering of the Shares and securities have not been filed with or approved or disapproved by the United States Securities and Exchange Commission or any other state or federal regulatory authority, nor has any such regulatory authority passed upon or endorsed the merits of this offering or passed upon the accuracy or completeness of any offering materials. Any representation to the contrary is unlawful. The products mentioned herein have not been approved by the Israel Securities Authority and will only be distributed to Israeli residents in a manner that will not constitute "an offer to the public" under sections 15 and 15a of the Israel Securities Law, 5728-1968 ("the

Securities Law") or section 25 of the Joint Investment Trusts Law, 5754-1994 ("the Joint Investment Trusts Law "), as applicable. The products are being offered to a limited number of investors (35 investors or fewer during any given 12 month period) and/or those categories of investors listed in the First Addendum ("the Addendum") to the Securities Law, "Sophisticated Investors") who in each case have provided written confirmation that they qualify as Sophisticated Investors, and that they are aware of the consequences of such designation and agree thereto; in all cases under circumstances that will fall within the private placement or other exemptions of the Joint Investment Trusts Law, the Securities Law and any applicable guidelines, pronouncements or rulings issued from time to time by the Israel Securities Authority.

This prospectus or this document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Any offeree who purchases a product is purchasing such product for its own benefit and account and not with the aim or intention of distributing or offering such product to other parties (other than, in the case of an offeree which is a Sophisticated Investor by virtue of it being a banking corporation, portfolio manager or member of the Tel-Aviv Stock Exchange, as defined in the Addendum, where such offeree is purchasing a product for another party which is a Sophisticated Investor).

Nothing in this document should be considered investment advice or investment marketing as defined in the Regulation of Investment Counselling, Investment Marketing and Portfolio Management Law, 5755-1995. Investors are encouraged to seek competent investment counselling from a locally licensed investment counsel prior to making the investment. A recipient of this document may be required to provide confirmation that it is a Sophisticated Investor purchasing a product for its own account or, where applicable, for other Sophisticated Investors.
