

Two new themes enter WisdomTree multi-thematic strategy: the WisdomTree Global Megatrends Equity quarterly rebalance

Published 7 May 2024

Pierre Debru

Head of Research, WisdomTree Europe.

Key Takeaways

- Multi-thematic strategies offer a better way to invest in growth than traditional growth funds, but it takes a lot of expertise to construct those strategies well
- At the latest rebalance WisdomTree added two themes to its multi-thematic strategy: Nuclear and Energy Transition Materials
- The strategy remains overweight Tech but Nuclear is also overweight
- WisdomTree's multi-thematic strategy has outperformed the Nasdaq-100 and the MSCI AC World since launch thanks to strong performance in Q4 and thanks to the tactical overlay
- Related Products WisdomTree Megatrends UCITS ETF - USD Acc [Find out more](#)

Thematic investing allows investors to access growth stocks in completely novel and targeted ways. However, with 46 potential themes to choose from (listed in the WisdomTree Thematic Classification, as of the end of March 2024), many investors do not have enough time to invest in selecting themes and then selecting single-theme strategies. This is why \$54.8 billion¹ are invested in multi-thematic exchange-traded funds (ETFs) and open-ended funds in Europe, representing 20% of all assets invested in thematic investments in Europe. This trend is accelerating, in the last 12 months¹, despite outflows in the thematic space, multi-thematic strategies have gathered \$2.9 billion of inflows.

Multi-thematic strategies can help investors delegate many of the decisions necessary for the success of an investment in thematic growth:

- the selection of the most relevant themes
- the capital allocation between themes strategically and tactically
- the stock selection in each theme

After years of thematic research, two whitepapers, and many single-theme ETFs, WisdomTree launched our own multi-thematic strategy on 27 October 2023, the WisdomTree Global Megatrends Equity index. Our approach combines a curated portfolio of themes, a quantitative tactical overlay to adapt to current

market environments, and expert-driven stock selection (you can find more information on the strategy [here](#)).

Nuclear and Energy Transition Metals are coming in

On April 19 2024, the WisdomTree Global Megatrends Equity strategy underwent its quarterly rebalancing in which we reviewed:

- The selection of theme
- The tactical allocation to the selected themes
- The stock selection

Every year, the theme selection focuses on high-conviction themes with high diversification potential and alignment with the US Sustainable Development Goals (SDGs). In 2023, the strategy was launched with 14 themes: seven in Technological Shifts, four in Environmental Pressures and three in Demographic and Social Shifts. Following this year's review, the strategy will continue to invest in those 14 themes, but two new themes are also being added to the mix:

Nuclear

We are witnessing a renaissance for nuclear energy. With the political focus on the energy transition coupled with the rise of geopolitical tensions with Russia and China, nuclear power is increasingly seen to have a significant role to play in the future energy mix. Nuclear offers a reliable source of base-load power with minimal carbon emissions that could complement renewable energy sources. Political support is increasing for this source of energy – with its inclusion in the EU Taxonomy, for example – as is renewed investments across the world. From a more technical perspective, Nuclear is a diversifying theme for our multi-thematic strategy, with low correlation to the rest of the theme. The theme is also showing strong tailwinds with \$260m inflows in 2023 and a performance of 42.5% over the year.

Energy Transition Metals

Green energy generation is infrastructure intensive. It requires more metals and minerals and, thus, more mining than our current setup. Enabling clean energy technologies to grow is dependent on the rate at which critical minerals can be found and mined. This is why energy transition metals mining plays a focal role in supporting the energy transition. This theme is also very interesting from a diversification point of view as it is highly correlated to the commodities themselves, leading to decorrelation with other 'green themes' in the portfolio. This was quite evident in Q1 2024. While almost all climate-change-related themes suffered underperformances and outflows during the quarter, energy transition metals gathered \$139 million during the period. In March, it was also the best theme for performance with 9.4% compared to 3.1% for the MSCI All Country World.

Figure 1: Strategic thematic asset allocation

Moving on to our tactical thematic asset allocation, Figure 2 highlights that:

- Artificial Intelligence, Blockchain, Cybersecurity, Cloud and Semiconductors remain overweighted
- Nuclear entered the portfolio with an overweight
- All remaining themes are underweights

Figure 2: Thematic tactical signals

Theme	Positioning	Tactical Signal
Aging Population	Underweight	50%
Artificial Intelligence & Big Data	Overweight	150%
Blockchain	Overweight	150%
Cloud Computing	Overweight	150%
Cybersecurity	Overweight	136%
Digital Infrastructure	Underweight	50%
Energy Transition Materials	Underweight	50%
HealthTech	Underweight	50%
Nuclear	Overweight	150%
Rise of EM Consumer	Underweight	50%
Rise of the Middle Class	Underweight	50%
Semiconductors	Overweight	150%
Sustainable Energy Production	Underweight	50%
Sustainable Energy Storage	Underweight	50%
Sustainable Food	Underweight	50%
Sustainable Resource Management	Underweight	50%

Outperforming the MSCI All Country World (MSCI ACWI) and the Nasdaq-100

Since its launch, the WisdomTree Megatrends Global Equity index has returned 20.8%². This is a 1.9% outperformance to the MSCI ACWI and 0.3% outperformance to the Nasdaq-100.

Figures 4 and 5 below detail the contribution of the different parts of the strategy to this outperformance. In Figure 4, we observe that the strategy performed very strongly in the first rebalance period, outperforming by 5.9% the MSCI ACWI. The theme selection created 1.15% of outperformance, the tactical overlay added 4.62%, and the stock selection added 0.12%. Looking at themes: Semiconductors, Cybersecurity and Blockchain added around 2% each.

Figure 4: Performance attribution in the first rebalance period (27 Oct 2023 to 19 Jan 2024)

	Strategic Weights	Effective Weights	Theme Benchmark Performance	WisdomTree Theme Performance	Relative Contribution of Strategic Allocation (vs MSCI ACWI)	Relative Contribution of Tactical Allocation (vs MSCI ACWI)	Relative Contribution of Stock Selection (vs MSCI ACWI)	Total Relative Contribution (vs MSCI ACWI)
Ageing Population	3.33%	2.53%	16.72%	12.34%	0.04%	-0.01%	-0.14%	-0.11%
Artificial Intelligence & Big Data	7.14%	11.97%	24.61%	25.63%	0.66%	0.44%	-0.03%	1.07%
Blockchain	7.14%	14.79%	32.46%	29.98%	1.22%	1.30%	-0.56%	1.96%

Performance in the second rebalance period was a bit more difficult with an underperformance of 3.5%. The theme selection created -2.8% underperformance, mainly due to some of the Tech themes that had done well previously (Cloud Computing and Cybersecurity). The tactical overlay continued to deliver with a contribution of .9%. Finally, the stock selection was detrimental by -1.6%. Overall, Blockchain was a very positive investment with +2.5% while AI, Cloud Computing and Cybersecurity created significant negative contributions.

Conclusion

A multi-thematic strategy is the result of many difficult decisions from the theme selection, the selection of the relevant companies in each of the themes and including the capital allocation to the different components. In the first six months of its existence WisdomTree Megatrends Global Equity has outperformed both the MSCI ACWI and the Nasdaq-100. With the inclusion of two new themes, Nuclear and Energy Transition Materials, the strategy is well positioned for the rest of the year.
