

WisdomTree house-view model portfolios: blending the strategic and tactical outlook

Published 20 March 2025

Luca Berlanda

Associate Director, Quantitative Research at WisdomTree in Europe

Key Takeaways

- Our long-term strategic philosophy emphasises stable, profitable companies (Quality Dividend Growth), global diversification (including Japan and India), and a structural role for commodities, all with the goal of balancing returns and managing risk.
- We have identified five near-term tactical bets—a Value-Growth barbell, Japanese equities, EM small caps, silver, and bitcoin—that aim to boost returns while maintaining alignment with our strategic framework.
- Our house-view model portfolios integrate these tactical insights into our long-term strategic portfolios, allowing us to adjust to market shifts without sacrificing diversification or long-term objectives.

WisdomTree has been involved in model portfolios for more than a decade. Currently, the assets under management for our model portfolio business sits at more than \$3 billion US dollars¹. For clients considering model portfolios for their practice, WisdomTree's model portfolios stand out for their innovative approach, marrying the performance potential of active strategies with the discipline of passive investments.

Our house-view model portfolios integrate our long-term strategic perspectives with near-term tactical positions informed by our latest [market outlook](#).

Strategic asset allocation

WisdomTree's strategic asset allocation framework reflects a disciplined, long-term investment philosophy designed to balance risk and reward across diverse economic cycles. Our guiding principle is that robust diversification across asset classes—including equities, fixed income, commodities, and alternative investments—can enhance a portfolio's overall resilience to market volatility while seeking strong risk-adjusted returns. At the start of 2025, WisdomTree's exchange-traded fund (ETF) model portfolios' strategic positioning pivots around the following ideas:

- Within equities, the core allocation revolves around WisdomTree's [Quality Dividend Growth strategies](#), which emphasise high-quality, dividend-growing companies. By blending global and US variants of this strategy, we achieve broad geographic diversification and a focus on stable, profitable firms that tend to exhibit lower volatility and consistent earnings growth. To capture additional upside, the portfolio also tilts toward high-growth, high-quality large-cap stocks through vehicles such as the [WisdomTree US Quality Growth UCITS ETF \(QGRW\)](#). This dynamic approach is intended to harness the potential of growth-oriented companies while limiting exposure to unprofitable or highly speculative segments of the market.
- International diversification is integral to our strategic framework. Although US equities represent a major component of our portfolios, we maintain deliberate exposure to other regions that present distinct growth drivers. Japan, for instance, is increasingly attractive due to ongoing corporate governance reforms, supportive macroeconomic policies, and potential currency advantages tied to a weaker yen. India, on the other hand, is poised to benefit from favourable demographics, rapid infrastructure development, and pro-business initiatives that foster private-sector expansion. This combination provides our portfolios with exposure to a broad set of growth opportunities beyond the US
- Thematic Equities: The [WisdomTree Megatrends UCITS ETF \(WMGT\)](#) is employed as a strategic building block that provides targeted exposure to transformative long-term themes—such as artificial intelligence, cybersecurity, blockchain, and cloud computing—which we believe are integral to achieving sustainable capital appreciation, despite their higher potential volatility.
- Commodities also play a structural role in our investment process, as they provide diversification benefits and can act as a hedge against inflation or unpredictable macro shocks. Our research supports allocations of up to 15% in broad commodities and 10–15% in gold, which is often viewed as a safe-haven asset. We implement these views via a combined allocation of around 20% in the [WisdomTree Enhanced Commodity UCITS ETF \(WCOA\)](#) and in [WisdomTree Core Physical Gold \(WGLD\)](#).

Tactical asset allocation

Our five highest-conviction tactical bets based on our latest outlook are as follows:

Value-Growth barbell

In the current environment, we favour a barbell strategy that balances US large-cap quality growth equities ([WisdomTree US Quality Growth UCITS ETF \(QGRW\)](#)) with value stocks ([WisdomTree US Equity](#)

[Income \(DHSA\)](#)). High-quality growth companies typically demonstrate strong balance sheets, consistent earnings, and solid secular growth trends, making them an appealing choice for investors looking to preserve some defensive characteristics while capturing potential equity market upside. Value stocks, by contrast, have historically fared well during periods of rising interest rates and cyclical rebounds, helping to cushion the portfolio and ensure broader exposure to different stages of the economic cycle.

Japan equities

Japan remains both a strategic allocation and a key tactical focus, thanks to several converging tailwinds. Corporate governance reforms have led many Japanese companies to improve capital efficiency and boost shareholder returns, often through dividends and share buybacks. At the same time, modest wage increases, and ongoing policy support, are energising domestic demand. Although Japanese equities have seen substantial gains in recent years, valuations remain below long-term averages, suggesting room for further growth. Moreover, a persistently accommodative stance by the Bank of Japan may keep the yen relatively weak, supporting export competitiveness. The [WisdomTree Japan Equity UCITS ETF \(DXJZ\)](#) is designed to capitalise on these developments.

Emerging market small-cap equities

Emerging market small caps have emerged as a tactical opportunity for investors seeking higher growth potential alongside diversification benefits. These smaller-cap companies tend to have a more domestic revenue focus, making them less exposed to global trade tensions or currency shifts. In an environment where many global central banks are expected to maintain or resume accommodative monetary policies, EM small caps stand to benefit from better liquidity conditions, reduced borrowing costs, and resilient local demand. Through the [WisdomTree Emerging Markets Small Cap Dividend UCITS ETF \(DGSE\)](#), we incorporate a dividend-weighted methodology that aims to mitigate volatility while enhancing total return potential.

Silver

Silver offers an intriguing opportunity, fuelled by both its role as a monetary metal—often moving in tandem with gold—and its growing industrial applications. Rapid expansion in solar technology and other clean energy sectors increases the industrial demand for silver, while constrained supply growth could drive price support. In addition, investors commonly view silver as a way to potentially hedge geopolitical risks, benefiting from flight-to-safety flows. [WisdomTree Core Physical Silver \(WSLV\)](#) can offer this exposure.

Bitcoin

Digital assets, notably bitcoin, also occupy a modest but meaningful place within our tactical allocation. As institutional acceptance grows and innovative use cases for blockchain technology proliferate, an allocation of 1–3% to bitcoin can enhance the portfolio's return potential without significantly increasing overall risk. [WisdomTree Physical Bitcoin \(BTCW\)](#) can offer this exposure.

Blending it all together

Our suite of core, multi-asset portfolios range from conservative to aggressive, offering five portfolios with increasing risk levels:

- The **Illustrative House-View Conservative Portfolio** and the **Illustrative House-View Moderately Conservative Portfolio** invest most of their assets in lower volatility assets and aim to deliver some growth with controlled risks to investors.
- The **Illustrative House-View Moderate Portfolio** invests about half its assets in fixed income and half in riskier assets. It aims to deliver a balanced risk-return profile to investors.
- The **Illustrative House-View Aggressive Portfolio** invests most of its assets into higher-growth/higher-risk assets. However, the portfolio aims to improve diversification to limit those risks.
- The **Illustrative House-View Equity Portfolio** invests solely in risk-on assets. However, the portfolio is still risk-managed through the use of diversifiers.

While the portfolios are built with European-based investors in mind, the equity and alternative sleeve would not change significantly for other base currencies.

Figure 3: Fundamental characteristics of the equity sub-portfolio

Source: WisdomTree, FactSet, Bloomberg. As of 31 December 2024.

Overall, the equity portion of our sub-portfolio exhibits a clear overweight to Japan and a small one to emerging markets, while European equities are clearly underweighted. Through our investment in small cap directly, but also indirectly in thematic equity, the proportion of mid and small caps is higher in our portfolio.

The portfolio's fundamentals reflect our continued focus on high-quality, highly profitable companies with increased returns on equity and return on assets.

Sector-wise, the portfolios exhibit only small overweight or underweights to the market. Financials is the biggest underweight across all the portfolios. The underweight is also net in Communication Services and

Utilities. Energy is also underweighted for the most conservative portfolio. Consumer Staples is the biggest overweight.

Figure 4: Sector allocation in the equity sub-portfolio (vs MSCI All Country World)

Source: WisdomTree, FactSet, Bloomberg. As of 31 December 2024.

Conclusion

Our current tactical stance seeks to capitalise on near-term market opportunities while reinforcing our strategic pillars of quality, diversification, and long-term growth. Specifically, we balance Large-Cap Value with High-Quality Growth in a barbell approach to navigate today's rate environment and economic backdrop. We also emphasise Japanese equities, driven by corporate governance reforms, policy support, and valuation advantages, as well as emerging market small caps for their local revenue focus and growth potential. Outside of equities, we see silver and bitcoin as targeted diversifiers that can offer upside potential amid structural and technological shifts.

By integrating these tactical overlays with our core strategic allocations, WisdomTree's model portfolios remain positioned to adapt to evolving market conditions and capture multiple sources of alpha. We continue to monitor macroeconomic developments, policy changes, and global investment themes, all with the aim of delivering consistent risk-adjusted returns across a range of market scenarios.

WisdomTree Issuer ICAV

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares.

The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

WisdomTree Enhanced Commodity UCITS ETF

The methodology of and rules governing the index (the "Index Methodology" and the "Index") are proprietary and shall not be reproduced or disseminated without the prior written consent of the "Index Sponsor" (as defined in the "Index Rules" **available on [http: //www.wisdomtree.eu/home](http://www.wisdomtree.eu/home)**). None of the Index Sponsor, the index calculation agent (where such party is not also the Index Sponsor, the "Index Calculation Agent") nor, where applicable, the index Investment Advisor (the "Index Investment Advisor") guarantee that there will be no errors or omissions in computing or disseminating the Index. The Index Methodology is based on certain assumptions, certain pricing models and calculation methods adopted by the Index Sponsor, the Index Calculation Agent and, where applicable, the Index Investment Advisor, and may have certain inherent limitations. Information prepared on the basis of different models, calculation methods or assumptions may yield different results. You have no authority to use or reproduce the Index Methodology in any way, and neither the Index Sponsor nor any of its affiliates shall be liable for any loss whatsoever, whether arising directly or indirectly from the use of the Index or Index Methodology or otherwise in connection therewith. The Index Sponsor reserves the right to amend or adjust the Index Methodology from time to time in accordance with the rules governing the Index and accepts no liability for any such amendment or adjustment. Neither the Index Sponsor nor the Index Calculation Agent are under any obligation to continue the calculation, publication or dissemination of the Index and accept no liability for any suspension or interruption in the calculation thereof which is made in accordance with the rules governing the Index. None of the Index Sponsor, the Index Calculation Agent nor, where applicable, the Index Investment Advisor accept any liability in connection with the publication or use of the level of the Index at any given time. The Index Methodology embeds certain costs in the strategy which cover amongst other things, friction, replication and repo costs in running the Index. The levels of such costs (if any) may vary over time in accordance with market conditions as determined by the Index Sponsor acting in a commercially reasonable manner. The Index Sponsor and its affiliates may enter into derivative transactions or issue financial instruments (together, the "Products") linked to the Index. The Products are not in any way sponsored, endorsed, sold or promoted by the sponsor of any index component (or part thereof) which may comprise the Index (each a "Reference Index") that is not affiliated with BNP Paribas (each such sponsor, a "Reference Index Sponsor"). The Reference Index Sponsors make no representation whatsoever, whether express or implied, either as to the results to be obtained from the use of the relevant Reference Index and/or the levels at which the relevant Reference Index stands at any particular time on any particular date or otherwise.

No Reference Index Sponsor shall be liable (whether in negligence or otherwise) to any person for any error in the relevant Reference Index and the relevant Reference Index Sponsor is under no obligation to advise any person of any error therein. None of the Reference Index Sponsors makes any representation whatsoever, whether express or implied, as to the advisability of purchasing or assuming any risk in connection with the Products. The Index Sponsor and its affiliates have no rights against or recourse to any Reference Index Sponsor should any Reference Index not be published or for any errors in the calculation thereof or on any other basis whatsoever in relation to any Reference Index, its production, or the level or constituents thereof. The Index Sponsor and its affiliates shall have no liability to any party for

any act or failure to act by any Reference Index Sponsor in connection with the calculation, adjustment or maintenance of the relevant Reference Index and have no affiliation with or control over any Reference Index or the relevant Reference Index Sponsor or the computation, composition or dissemination of any Reference Index. Although the Index Calculation Agent will obtain information concerning each Reference Index from publicly available sources that it believes reliable, it will not independently verify this information. Accordingly, no representation, warranty or undertaking (express or implied) is made and no responsibility is accepted by the Index Sponsor or any of its affiliates nor the Index Calculation Agent as to the accuracy, completeness and timeliness of information concerning any Reference Index. The Index Sponsor and/or its affiliates may act in a number of different capacities in relation to the Index and/or products linked to the Index, which may include, but not be limited to, acting as market-maker, hedging counterparty, issuer of components of the Index, Index Sponsor and/or Index Calculation Agent. Such activities could result in potential conflicts of interest that could influence the price or value of a Product.
