

# WisdomTree Megatrends: Outperforming while thematic are struggling

Published 25 November 2024

**Pierre Debru**

Head of Research, WisdomTree Europe.

## Key Takeaways

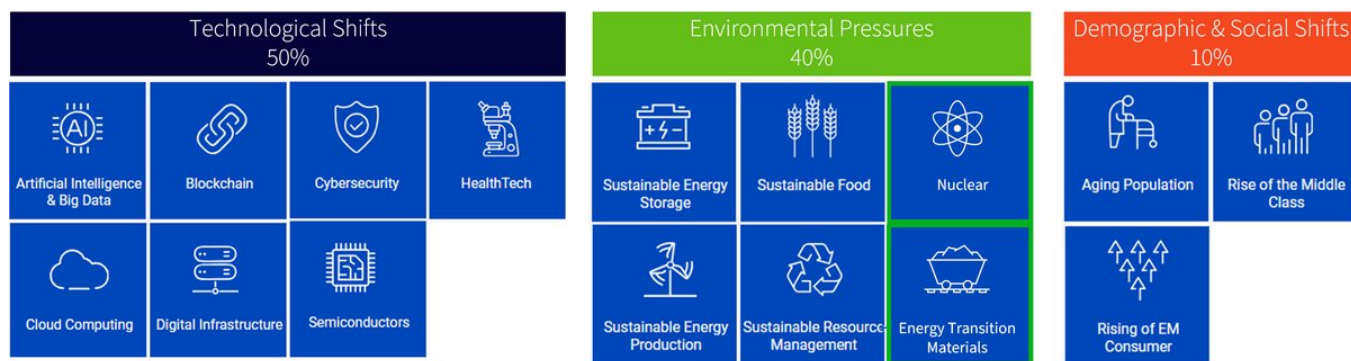

- WisdomTree Megatrends strategy provides a one-stop solution to invest in thematic equities that includes a theme-based tactical overlay to benefit from short-term moves.
- At the latest rebalance, Blockchain was the most favoured theme followed by Semiconductors
- Data centre providers looking to deliver energy independence to their servers could lead to a resurgence in renewable energy, batteries and energy transition materials (miners)

The re-election of Donald Trump in early November sent shockwaves through financial markets, reminiscent of his 2016 victory. As investors digest the implications of Trump's second term, certain thematic equities are already emerging as clear winners. Blockchain equities, for example, delivered strongly in line with President-elect Trump's expected friendliness to the space. Defence stocks are also benefitting from expectations of pressure on NATO's countries to spend more. Conversely, ESG-focused companies have seen declines amid concerns over reduced environmental priorities.

Thanks to its quarterly tactical allocation, the [WisdomTree Megatrends Global Equity Index](#) always aims to be positioned to benefit from variations in sentiment around thematic. To do so, the strategy's portfolio is constructed using three successive steps that seek to add value:

- The strategic thematic asset allocation focuses yearly on the most relevant themes in the medium to long term. Currently, the portfolio invests in 16 themes:

## Figure 1: WisdomTree global megatrends equity – theme selection

Source: WisdomTree. November 2024

- The tactical asset allocation run quarterly and overweights and underweights themes to position the portfolio to best benefit from periods of exuberance and sluggishness in the various themes.
- The stock selection in each theme leverages WisdomTree thematic investment philosophy, which focuses on:
  - Expertise: WisdomTree partners with external experts when constructing their thematic portfolios.
  - Purity: Stocks in our thematic portfolios have a business focused principally on one theme.
  - Differentiation: Our thematic portfolios are very different from market indices (the overlap between the WisdomTree Multi thematic strategy and the MSCI AC World or the Nasdaq is less than 20%) and very different between themes as well.

## WisdomTree thematic tactical overlay: How are we positioned?

As of the latest rebalancing on 18 October, we saw significant changes in the tactical positioning of the portfolio based on our quantitative momentum and mean reversion signals:

- Blockchain remained the most overweighted theme this quarter after delivering strong performance year long. This overweight is already paying off, considering the US election result in early November.
- Semiconductors was the second and only theme to remain overweighted but less so than last quarter. Almost two years into the latest Artificial Intelligence (AI) wave, mean reverting signals have kicked in and led to a reduced overweight.
- AI moved to underweight after moving to neutral last time (mid-July). After strong performance in 2023 and H1, the theme has shown some signs of abating, with some underperformance and outflows in the last few months.
- Nuclear also moved to underweight.
- It is worth noting that quite a few themes that have been underweight for a while moved back closer to neutral. They are still underweight but are showing signs of life. This is the case with Digital Infrastructure, Energy Transition Miners, the Rise of EM Consumers, Sustainable Energy Storage and Sustainable Food.

- This slight rebound in renewable energy-related themes, which suffered from a certain disinterest from the investment community since late 2022, is due to development in the data centre world. Large Language Models consume vast quantities of energy, for example, a ChatGPT request consumes 10 times more than a Google search. Data Center operators are therefore looking for more and more energy while striving to create an independent energy supply that would insulate them from grid issues. This translates into the need for local energy production, i.e. solar, wind and local storage, i.e. batteries and, by extension, energy transition materials, even if this drive is unrelated to climate change.
- All remaining themes continue to suffer from headwinds and remain underweight.

### Outperforming the market since inception thanks to its three-layer approach

Looking back, the strategy continues to deliver above-market performance. As of the time of writing (11 November 2024), the strategy had returned 47.2% since its inception on 27 October 2023<sup>1</sup>. This means that the strategy outperformed the MSCI AC World by 7.9% over the period.

Focusing only on the period up to the rebalancing (18 October 2024), the strategy had outperformed by 1.15%. Figure 3 shows how that performance was created.

- First, the strategic asset allocation was detrimental. Overall, 2024 has been challenging for thematic, with 11 themes underperforming the market. This led to -6.96% of relative underperformance from this layer.
- Second, the tactical asset allocation performed very well, creating 6.23% of outperformance. The tactical allocation to Blockchain (overweighted), AI (mostly overweighted), Cybersecurity (oscillating between overweight and underweight) and Semiconductors (overweighted) was particularly positive.
- Finally, our expertise-driven, pure-play stock selection led to a contribution of +1.89% versus the benchmark.

So, overall, despite headwinds in thematic equities, the strategy managed to outperform thanks to the layers used in the portfolio construction.

## What is happening now?

Since the rebalancing, the strategy's relative performance has been very strong. It created 4.8% of outperformance over the MSCI ACWI and 3.1% over the Nasdaq 1002. This is the result of good positioning in light of the US Election results. The rally in blockchain equity was particularly positive for the strategy.

Overall, equities are benefiting from the 'certainty effect' (US election results are now in, and uncertainty is reduced), the 'Trump effect', the 'earnings effect' (as of 7 November, 75 companies in the Nasdaq-100 index had reported their Q3 earnings, with 68% delivering positive revenue surprises), the 'Fed effect' (the US Federal Reserve is continuing to cut interest rates) and the 'inflation effect' (inflation remain in check). All of these combined could continue to push equities and in particular small cap and tech equities upwards.

### **WisdomTree Issuer ICAV**

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at [www.wisdomtree.eu](http://www.wisdomtree.eu). Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares. The summary of investor rights associated with an investment in the fund is available in English on WisdomTree Europe¼s website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

### **Notice to Investors in Switzerland – Qualified Investors**

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus and the key investor information documents (KIID) are available from WisdomTree's website: <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports>

**For Investors in France:**

The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public. The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto. Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

**For Investors in Malta:** This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

**For Investors in Monaco:** This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.
