

# ‘Time is of the essence’: Rheinmetall’s message on the Next Big Thing

Publié le 9 juillet 2025

**Mobeen Tahir**

Director, Research

## Points clés

- Rheinmetall is rapidly expanding production to meet record defence demand across Europe.
- Partnerships with firms like Anduril and Nokia highlight the growing role of tech in defence.
- Time is critical – Rheinmetall warns Europe must be ready for potential conflict by decade’s end.

“Time is of the essence. We need to build capacity now to be ready by the end of the decade – because if what the intelligence services are saying is true, an attack might happen by the end of the decade.”

Chris Gannatti, WisdomTree’s Global Head of Research, and I recently had the pleasure of speaking with Dirk Winkels, Head of Investor Relations at Rheinmetall – the European defence giant that the world has become quickly familiar with in recent years. As geopolitical tensions rise and military budgets grow across the continent, Rheinmetall has found itself at the centre of Europe’s rearmament story.

In this blog, we outline some of the key messages Dirk shared during our podcast. To hear the full episode, [click here to listen](#).

## Why WisdomTree spoke with Rheinmetall

In addition to being a company in the spotlight these days, given its prominent position in the European defence industry, Rheinmetall is also currently the top holding in [WisdomTree Europe Defence UCITS ETF \(WDEF\)](#). The exchange-traded fund was launched in March this year and received a very warm response from investors, surpassing \$3.2 billion in assets as of 02 July 2025.

WDEF is the world’s first pure-play ETF for the European defence sector. But, in keeping with its approach to offer smart thematic exposures aligned with the underlying megatrend, WisdomTree weights its components based on their revenue exposure to the defence theme, an approach that has been endorsed by our investors.

## **What we learned from the conversation**

### **What defines Rheinmetall's core focus?**

Rheinmetall's business is now almost entirely focused on defence. Around 85% of sales are directed toward army-related needs – from ammunition and vehicles to artillery systems and tanks. Crucially, Rheinmetall isn't just a supplier of hardware – it also provides digital systems to help modernise battlefield operations and improve the sensor-to-shooter chain.

### **What does Zeitenwende mean for European defence?**

Dirk highlighted the scale of underinvestment in European defence over the past 30 years. Germany, for example, went from 12 army divisions in the 1980s to just three today. Zeitenwende – the turning point triggered by Russia's invasion of Ukraine – marked a moment of awakening. As military equipment was sent to Ukraine, gaps emerged in domestic stockpiles. Rheinmetall responded quickly with ready-made proposals, and demand has since accelerated across the continent.

### **Repurposing car plants for military production?**

One of the most symbolic moves has been Rheinmetall's effort to repurpose former civil plants – including those from the automotive sector. Dirk noted that Rheinmetall has already begun transforming sites in Berlin and Neuss. Rather than relying on highly automated lines like those used for cars, building tanks and technical vehicles is far more manual – and that's where skilled labour is the real asset. For workers with strong foundational training, the transition is very achievable.

### **What is “tanknology”?**

Rheinmetall's concept of “tanknology” reflects how traditional military platforms like tanks are evolving. It's not just about armour and firepower anymore – it's about digitisation, connectivity, and integrated sensors. Dirk explained how modern tanks like the KF-51 Panther offer enhanced mobility, protection, and lethality – all while embedding digital intelligence, night vision, radar, and more to support modern combat environments.

### **What's driving Rheinmetall's work on autonomy?**

From unmanned ground vehicles to autonomous logistics convoys, Rheinmetall is investing heavily in autonomy. Its Mission Master platforms are designed for harsh, unmapped terrain – the kind of environments no Google car has seen. These systems are already being tested by armies around the world for tasks ranging from soldier evacuation to automated supply chains. Demographics, Dirk said, are forcing militaries to think more efficiently about how personnel are deployed.

### **How is AI being applied to defence manufacturing?**

Rheinmetall already inspects its ammunition using dozens of data points. As volumes scale up, Dirk expects greater use of AI and automation to support quality control and defect detection. Beyond manu-

facturing, AI is also used in products – for object recognition, threat detection, and more. The idea is to bring greater efficiency not only in combat, but across production workflows too.

## **Why partner with Anduril?**

The partnership with Anduril stands out. Dirk described the US startup as a disruptive force – not just in product development but also in how it approaches production. Given Europe's goal to retain 65% of defence spending within the continent, partnerships like this enable non-European firms to access the market through local platforms. In Rheinmetall's view, it's a win-win for speed, industrialisation, and access to cutting-edge solutions.

## **Why partner with Nokia?**

Connectivity is becoming just as important as firepower. Rheinmetall's partnership with Nokia – and others like Iceye and Blackned – supports its drive to dominate the digital battlefield. With Western armies often working with limited troop numbers, efficiency becomes essential. Dirk made it clear that integrating external technologies is crucial to Rheinmetall's future product roadmap.

## **What does the Leonardo joint venture represent?**

The JV with Leonardo reflects a broader trend: European defence firms working together to accelerate delivery and avoid duplication. It's also a strategic tool in Rheinmetall's broader M&A and partnership toolkit. Dirk pointed out that while some expansions are done via acquisition – such as the purchase of Expal and US-based L3Harris businesses – joint ventures are often faster and more flexible for industrial collaboration.

## **How is Rheinmetall scaling to meet rising demand?**

With over €60 billion in backlog and expectations to surpass €100 billion by year-end, Rheinmetall is expanding fast. Dirk shared that a major artillery plant in Unterlüß went from groundbreaking to production in just 15 months – an impressive pace. By 2027, the plant aims to produce 1.5 million rounds annually. The goal, he said, is not to win market share, but to honour contracts backed by prepayments and long-term demand.

## **How are European investors thinking about ESG and defence?**

Investor sentiment has shifted. Previously excluded from ESG portfolios, defence firms like Rheinmetall are now seeing policy changes across Europe – allowing Article 8 funds to invest. As Dirk noted, conversations with ESG investors are now about ethics, portfolios, and values – not exclusions.

There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements. The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund. The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in

English at [www.wisdomtree.eu](http://www.wisdomtree.eu). Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares. The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe¼s website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification. Notice to Investors in Switzerland – Qualified Investors This document constitutes an advertisement of the financial product(s) mentioned herein. The prospectus and the key investor information documents (KIID) are available from WisdomTree¼s website <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports> Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

For Investors in France: The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public. The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto. **For Investors in Malta:** This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority. **For Investors in Monaco:** This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.
