## **Key Takeaways**

- Tariff shocks, fears of fiscal dominance and worries over currency debasement are all providing strong catalysts for precious metals.
- Sweden's move to restart uranium mining and invest in small modular reactors highlights the global resurgence of nuclear energy to meet soaring power demand.
- MP Materials' deal with the US and Saudi Arabia highlights the push to build non-Chinese rare earth supply chains amid rising strategic demand.
- The long-term thesis for European Defence is underpinned by enduring geopolitical and budget backed tailwinds.
- Japanese equities poised for broader 2026 earnings aided by governance reform, Takaichi's stimulus and lower trade uncertainty.
- Related Products WisdomTree Physical Precious Metals, WisdomTree Uranium and Nuclear Energy UCITS ETF - USD Acc, WisdomTree Strategic Metals and Rare Earths Miners UCITS ETF - USD Acc, WisdomTree Europe Defence UCITS ETF - EUR Acc, WisdomTree Japan Equity UCITS ETF - USD Acc Find out more

The best performers this year are not simply those aided by cyclical catalysts; they are the beneficiaries of major structural shifts that could sustain performance for years to come.

On what is known as 'Liberation Day' (April 2, 2025), US tariffs surged to their highest levels in nearly a century. In parallel, the Trump administration signalled a strategic re-prioritisation of foreign policy, scaling back US security commitments to Europe. Many expected such shocks to trigger an economic contraction as supply chains adjusted, alongside financial-market turbulence as companies digested higher import costs. Yet the S&P 500 is up 17.5% year-to-date (YTD)<sup>1</sup>, and there is no sign of recession in any major economy. While the cyclical backdrop remains firm, the events of 2025 have reshaped several sectors, propelling them to new highs.

## Precious metals

Precious metals have excelled in 2025. Gold, up 67% year-to-date (YTD), initially led the rally before being overtaken by other metals. The Liberation Day shock sent investors seeking defensive assets, and gold benefitted as the Economic Policy Uncertainty Index<sup>2</sup> surged to record highs. Yet trade uncertainty was only one driver. President Trump's public criticism of the Federal Reserve (Fed) Chair and Governor Cook, the removal of the Head of the Bureau of Labor Statistics (BLS), and hints of a politically aligned successor all unsettled markets. Rising and potentially unsustainable government debts in the United States and Europe have also heightened concerns about fiscal dominance, where fiscal needs constrain monetary policy and raise the risk of currency debasement. Central banks, wary of these dynamics and of potential fiat currency 'weaponisation', have been major buyers, further supporting prices.

Silver, up 164% YTD, has gained from its high correlation with gold and a persistent supply deficit. Its inclusion on the US Geological Survey's Critical Minerals list in November 2025 has tightened non-US inventories as traders shifted metal into the United States ahead of possible tariffs.

Platinum and palladium, up 147% and 92% YTD respectively, remain supported by structural supply deficits and resilient demand from internal combustion engine and hybrid vehicles. These underlying forces suggest precious-metal strength could extend into 2026.

## Nuclear energy

In November, the Swedish government announced it was lifting its ban on uranium mining that had been in effect since 2018. Sweden is believed to possess 27% of Europe's known uranium reserves<sup>3</sup>, making this decision not just economically consequential for the country, but meaningful for the global supply of this very powerful rock. Sweden has also, like many other countries, announced its decision to invest in small modular reactors.

Sweden is worth highlighting because it is not just countries like the US and China that are turning to nuclear to power technologies like artificial intelligence (AI). Many countries around the world are rekindling their interest in nuclear energy in the face of rapidly rising energy needs. Tech companies building power-hungry data centres are striking long-term deals to secure nuclear energy. Most forecasts, see figure below, point to rapid global expansion of nuclear energy in the years ahead.

The [WisdomTree Uranium and Nuclear Energy UCITS ETF](#), a strong performer in 2025, provides investors with thoughtful exposure across the value chain that stands to benefit from the nuclear energy renaissance. This includes upstream miners of uranium, midstream companies serving the nuclear industry, and innovators developing advanced technologies like small modular reactors.

## Figure 1: IAEA, IEA, and World Nuclear Association nuclear capacity scenarios 2030 onwards

Source: World Nuclear Association, December 2025, IAEA and World Nuclear Association scenario figures are net electrical capacity. IEA scenario figures are gross electrical capacity. IAEA is International Atomic Energy Agency, IEA is the International Energy Agency. The Stated Policies Scenario (STEPS) aims to describe the prevailing direction of the energy system, based on a sector-by-sector and country-by-country assessment of energy-related policies that are in place and under development. The Announced Pledges Scenario (APS) assumes that all climate commitments made by governments and industries around the world will be met in full and on time. Gigawatt-electric (GWe). **Forecasts are not an indicator of future performance and any investments are subject to risks and uncertainties.**

## Rare earths

In November, MP Materials struck a major three-way deal with the US Department of Defence and Saudi miner Maaden to build a rare earth processing plant in Saudi Arabia. The US and MP will hold up to 49% of the venture, with Maaden owning at least 51%. The agreement is strategically important because it creates a non-Chinese supply chain for critical rare earths, supporting defence, energy, and technology industries in both countries.

This development signifies how the US is looking to contend with China's dominance in rare earths, which are essential for technologies across virtually every modern industry. This includes AI hardware, electric

vehicles, consumer electronics, renewable energy systems, and advanced defence equipment. China produces around 70% of the world's rare earths (see figure below) and processes around 90%. Building new supply chains will take time and any disruption in supply could cause prices to rise. Meanwhile, rapidly rising demand for these materials in new technologies will keep the market focus high.

The [WisdomTree Strategic Metals and Rare Earths Miners UCITS ETF](#), another strong performer in 2025, provides investors access to ten different strategic metals including rare earths, with companies selected by industry experts Wood Mackenzie across the respective value chains of each metal.

## Figure 2: Distribution of rare earths production worldwide as of 2024, by country

## European defence

European defence captivated investors in 2025 as the theme shifted from headlines to hard orders and delivered strong equity market performance, up 80.2%<sup>5</sup>. Three forces did the heavy lifting. First, policy clarity. The North Atlantic Treaty Organisation (NATO) set higher targets for defence and security spending set a durable glide path, while the EU's financing tools and national budgets made it actionable, as discussed [here](#). Most notably, Germany loosened its debt brake, exempting defence and security outlays

above roughly 1% of GDP. That decision was transmitted into procurement plans, advance payments and multi-year framework contracts.

Second, operating momentum. Across defence primes the average backlog to monthly sales ratio remained robust.

### Figure 3: Average backlog to monthly sales ratio of holdings in the WisdomTree Europe Defence UCITS Index

Source: WisdomTree, Bloomberg. For each holding, backlog to monthly sales ratio calculated as Order Backlog Value / (Trailing 12M Net Sales/12). Data as of 21 November 2025. All holdings in the WisdomTree Europe Defence UCITS Index with available data are included in the calculation. **You cannot invest directly in an index. Historical performance is not an indication of future performance and any investments may go down in value.**

Third, expected long term growth in earnings. The WisdomTree Europe Defence UCITS Index is positioned for strong earnings growth, with earnings per share expected to rise by 19.65% in 2026 and 19.08% in 2027. This reflects expanding market share, multi-year procurement cycles, and increasing defence budgets across Europe. While cash flow per share is expected to increase as companies scale operations, debt levels are projected to decline, ensuring financial stability.

## Japanese equities

Japan stood out in 2025 as cyclical improvement met structural change. The Tokyo Stock Exchange's governance drive prompted companies to utilise excess cash, enhance their return on equity, and address low price-to-book valuations. Political developments added further support. Sanae Takaichi's election victory pointed to targeted fiscal expansion, particularly in strategic areas such as semiconductors, energy security and defence. These priorities supported domestic demand while remaining consistent with a commitment to fiscal discipline. Trade-related uncertainty also eased. The introduction of a 15% tariff ceiling, alongside ongoing efforts by exporters to localise production, improved visibility and planning across global supply chains.

Monetary policy is expected to shift from supportive to moderately restrictive. The Bank of Japan (BOJ) has prepared the ground to raise rates again, while emphasising a gradual pace that keeps financial conditions accommodative. A careful path higher for the policy rate can anchor inflation expectations, support corporate earnings and still leave the yen contained enough to favour exporters' margins and translation.

The outlook remains optimistic. Governance reforms are raising the quality of earnings, expected stimulus should support consumption and a moderate yen supports global manufacturers. With lower trade risk and a measured BOJ path, Japanese equities enter 2026 positioned for broader earnings growth across exporters and domestic companies as real wages improve.

### **WisdomTree Issuer ICAV**

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at [www.wisdomtree.eu](http://www.wisdomtree.eu). Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares.

The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

## **WisdomTree Metal Securities Limited**

The products discussed in this document are issued by WisdomTree Metal Securities Limited (the "Issuer"). The Issuer is regulated by the Jersey Financial Services Commission. Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of HSBC Bank plc and JP Morgan Chase Bank, N.A. any of their affiliates or anyone else or any of their affiliates. Each of HSBC Bank plc and JP Morgan Chase Bank, N.A. disclaims all and any liability whether arising in tort, contract or otherwise which it might have in respect of this document or its contents otherwise arising in connection herewith.

### **Notice to Investors in Switzerland – Qualified Investors**

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus and the key investor information documents (KIID) are available from WisdomTree¼s website: <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports>

Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

### **For Investors in France:**

The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public.

The distribution of the Prospectus and

the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard

Hausmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

**For Investors in Malta:** This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.
