*Past performance is not indicative of future returns. Total Return NAV is calculated based on re-investing dividend at the net asset value on the ex-dividend date. The ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to be paid the most recently declared dividend. It is also on this date that an amount roughly equal to the dividend paid is removed from the Fund's net asset value once declared. Benchmark indices are Net Total Return indices, which assume the reinvestment of net dividends and exclude management fees, transaction costs and expenses. You cannot invest directly in an index.
