

Fund Overview

The WisdomTree International Efficient Core Fund seeks total return by investing in international equity securities and U.S. Treasury futures contracts.

Why NTSI?

- Gain enhanced exposure to international equities with added bond futures diversification to potentially lower volatility.
- Use to help boost capital efficiency in asset allocation allowing for increased exposure to non-core/diversifying investments.
- Use to help satisfy demand for overlay strategies that remain highly correlated to common portfolio benchmarks.

MSCI EAFE Index	5.78%	5.78%	15.32%	N/A	N/A	N/A	3.53%

Performance of less than one year is cumulative. You cannot invest directly in an index.
Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments.
WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Disclosures

This information must be preceded or accompanied by a prospectus or, if available, the summary prospectus. We advise you to consider the Fund’s objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contains this and other important information about the Fund. Read the prospectus or, if available, the summary prospectus carefully before you invest. Call 866.909.WISE (9473) or go to [WisdomTree.com/investments](https://www.wisdomtree.com/investments) for more information.

There are risks associated with investing, including possible loss of principal. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, foreign securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. While the Fund is actively managed, the Fund’s investment process is expected to be heavily dependent on quantitative models and the models may not perform as intended. Equity securities, such as common stocks, are subject to market, economic and business risks that may cause their prices to fluctuate. The Fund invests in derivatives to gain exposure to U.S. Treasuries. The return on a derivative instrument may not correlate with the return of its underlying reference asset. The Fund’s use of derivatives will give rise to leverage and derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. Interest rate risk is the risk that fixed income securities, and financial instruments related to fixed income securities, will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer’s creditworthiness. Diversification does not eliminate the risk of experiencing investment losses. Please read the Fund’s prospectus for specific details regarding the Fund’s risk profile.

The MSCI EAFE Index is a market cap-weighted index composed of companies representative of the developed market structure of developed countries in Europe, Australasia and Japan.
