Effective Duration	5.78

Performance

Average Annual Total Returns as of 12/31/2023

Name	QTR	YTD	1-Year	3-Year	5-Year	10-Year	Since Fund Inception
UNIY NAV Returns	6.90%	N/A	N/A	N/A	N/A	N/A	3.79%
UNIY Market Price Returns	6.89%	N/A	N/A	N/A	N/A	N/A	3.78%
Bloomberg US Universal Enhanced Yield Index	7.02%	N/A	N/A	N/A	N/A	N/A	4.15%

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Yields

Yield To Maturity	4.82%
Embedded Income Yield	4.98%
SEC 30 Day Yield	4.52%
SEC 30 Day Yield Unsubsidized	4.52%
Distribution Yield	5.78%

Time To Maturity

The Bloomberg US Universal Enhanced Yield index is a rules-based index that seeks to provide both exposure and potential yield enhancement across the broad universe of U. S. Dollar-denominated market.

Effective Duration is a measure of the sensitivity of the Fund's price to changes in interest rate changes and is calculated as the weighted average of the individual bond durations. For each bond, it also addresses that interest rate changes can alter expected bond future cash flows through embedded options. The calculation is also expanded to incorporate the contribution of derivatives to the overall interest rate risk sensitivity to the portfolio.

Embedded Income Yield: The annualized rate of return generated by a Fund's investment in both fixed income securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the following year given current holdings and market conditions. The embedded income yield will differ from the portfolio's yield to maturity, due to the incorporation of derivatives in the embedded income yield. Embedded income yield and portfolio yield to maturity may differ from a Funds actual distribution and SEC yield and do not reflect Fund expenses.

Credit ratings apply to the underlying holdings of the Fund, not to the Fund itself. Standard & Poor's and Moody's study the financial condition of an entity to ascertain its creditworthiness. The credit ratings reflect the rating agency's opinion of the holdings' financial condition and histories. The ratings displayed are based on the highest of each portfolio constituent as currently rated by Standard & Poor's and Moody's. Long-term ratings are generally measured on a scale ranging from AAA (highest) to D (lowest), while short-term ratings are generally measured on a scale ranging from A-1 to C.

Fund Distribution Yield: is calculated by annualizing the most recent Fund distribution and dividing by the Fund's current NAV. The yield represents a single distribution from the Fund and does not represent the total returns of the Fund.

SEC 30-Day Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses. This is also referred to as the "standardized yield." **Unsubsidized SEC-30 day yield** does not reflect fee waivers in effect.

Yield To Maturity: Portfolio Yield to Maturity represents the weighted average yield to maturity of a Fund's investments in money market securities and short-term fixed income securities as of a specified date. Yield to maturity is the rate of return generated on a fixed income instrument assuming interest payments and capital gains or losses as if the instrument is held to maturity. The weighted average yield is calculated based on the market value of each fixed-income investment. The calculation does not incorporate yield from any currency forward contracts that might be part of the Fund's investments.
