

Fund Overview

The WisdomTree Bianco Total Return Fund seeks to track the price and yield performance, before fees and expenses, of the Bianco Research Fixed Income Total Return Index.

Why WTBN?

- Gain access to a strategic fixed income portfolio driven by the insights of Bianco Research.
- Use to complement equity investments within a diversified portfolio.
- Combine the efficiency of ETFs with a robust factor-based investment process.

Performance

Average Annual Total Returns as of 03/31/2024

Name	QTR	YTD	1-Year	3-Year	5-Year	10-Year	Since Fund Inception
WTBN NAV Returns	-0.53%	-0.53%	N/A	N/A	N/A	N/A	-0.03%
WTBN Market Price Returns	-0.61%	-0.61%	N/A	N/A	N/A	N/A	0.01%
Bianco Research Fixed Income Total Return Index	-0.42%	-0.42%	N/A	N/A	N/A	N/A	0.10%
Bloomberg U.S. Aggregate Bond Index	-0.78%	-0.78%	N/A	N/A	N/A	N/A	-0.08%

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Yields

Yield To Maturity	4.46%
Embedded Income Yield	4.46%
SEC 30 Day Yield	3.27%
SEC 30 Day Yield Unsubsidized	3.24%
Distribution Yield	1.13%

Fund Credit Profile	Weight
A	9.84%
Aa	74.33%
Baa	15.04%
Ba or below	0.79%

Quality ratings reflect the credit quality of the underlying securities in the Fund's portfolio and not that of the fund itself. Quality ratings are subject to change. Moody's assigns a rating of Aaa as the highest to C as the lowest credit quality rating.

All Data As of 03/31/2024

Fund Information

Ticker Symbol	WTBN
Inception Date	12/20/2023
Gross Expense Ratio	0.57%
Net Expense Ratio	0.54%
CUSIP	97717Y451
Stock Exchange	NASDAQ
Net Assets (\$mm)	\$3.96
Number of Security Holdings	11
Effective Duration	5.39

The expense ratio includes 0.07% of Acquired Fund Fees and Expenses ("AFFEs") per annum. AFFEs are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies. AFFEs reflect an estimated amount for the current fiscal year and are subject to change annually. The Fund's net expense ratio of 0.54% (the amount charged to shareholders) reflects a contractual waiver of 0.03% through December 31, 2024.

Time To Maturity

Fund Maturity Structure	Weight
0-1 Years	12.40%
1-3 Years	19.94%
3-5 Years	13.64%
5-7 Years	9.42%
7-10 Years	23.15%
10+ Years	21.45%

Top Fund Holdings	Weight	Asset Group Weights	Weight	Top Fund Country Breakdown	Weight
iShares MBS ETF	23.35%	Exchange Traded Fund	99.95%	United States	100.00%
Ishares 0-5 Year Tips Bond E	19.94%	Cash	0.05%	Percentages for some of the charts on this page may not total 100 due to rounding. Country allocations subject to change without notice.	
Vanguard Long-Term Corp Bond	8.22%	Asset Group weights are subject to change without notice.			
WisdomTree Floating Rate Treasury Fund	7.91%				
Vanguard S/T Corp Bond Etf	7.21%				
Schwab Long-Term Us Treasury	7.07%				
Vanguard Int-Term Corporate	6.43%				
Schwab Short-Term Us Treas	5.87%				
Ishares 7-10 Year Treasury B	5.51%				
Ishares Bbb Rate Corp Bond	5.01%				

Holdings are subject to change without notice.

Disclosures

This information must be preceded or accompanied by a prospectus or, if available, the summary prospectus. We advise you to consider the Fund's objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contains this and other important information about the Fund. Read the prospectus or, if available, the summary prospectus carefully before you invest. Call 866.909.WISE (9473) or go to WisdomTree.com/investments for more information.

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit, and the Fund does not attempt to outperform its Index or take defensive positions in declining markets. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

The Bianco Research Fixed Income Total Return Index is developed by Bianco Research Advisors LLC to provide exposure to factors that can provide the potential for outperformance relative to a market cap weighted universe exposure of U.S. Dollar-denominated investment grade debt.

The Bloomberg U.S. Aggregate Bond Index measures the performance of the U.S. investment-grade bond market.

Effective Duration is a measure of the sensitivity of the Fund's price to changes in interest rate changes and is calculated as the weighted average of the individual bond durations. For each bond, it also addresses that interest rate changes can alter expected bond future cash flows through embedded options. The calculation is also expanded to incorporate the contribution of derivatives to the overall interest rate risk sensitivity to the portfolio.

Embedded Income Yield:The annualized rate of return generated by a Fund's investment in both fixed income securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the following year given current holdings and market conditions. The embedded income yield will differ from the portfolio's yield to maturity, due to the incorporation of derivatives in the embedded income yield. Embedded income yield and portfolio yield to maturity may differ from a Funds actual distribution and SEC yield and do not reflect Fund expenses.

Credit ratings apply to the underlying holdings of the Fund, not to the Fund itself. Standard & Poor's and Moody's study the financial condition of an entity to ascertain its creditworthiness. The credit ratings reflect the rating agency's opinion of the holdings' financial condition and histories. The ratings displayed are based on the highest of each portfolio constituent as currently rated by Standard & Poor's and Moody's. Long-term ratings are generally measured on a scale ranging from AAA (highest) to D (lowest), while short-term ratings are generally measured on a scale ranging from A-1 to C.

Fund Distribution Yield:is calculated by annualizing the most recent Fund distribution and dividing by the Fund's current NAV. The yield represents a single distribution from the Fund and does not represent the total returns of the Fund.

SEC 30-Day Yield:reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses. This is also referred to as the "standardized yield." It is calculated by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. **Unsubsidized SEC-30 day yield** does not reflect fee waivers in effect.

Yield To Maturity: Portfolio Yield to Maturity represents the weighted average yield to maturity of a Fund's investments in money market securities and short-term fixed income securities as of a specified date. Yield to maturity is the rate of return generated on a fixed income instrument assuming interest payments and capital gains or losses as if the instrument is held to maturity. The weighted average yield is calculated based on the market value of each fixed-income investment. The calculation does not incorporate yield from any currency forward contracts that might be part of the Fund's investments.
