

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Performance data for the most recent month-end is available at [www.wisdomtree.com](http://www.wisdomtree.com).

The **Fund Distribution Yield** is the annual yield a Fund investor would receive in distributions if the most recent Fund distributions for the quarter stayed consistent going forward. It is calculated by annualizing the most recent quarter's Fund distributions and dividing by the current Fund NAV. The yield represents annualized distributions from the Fund for the most recent quarter and does not represent the total returns of the Fund. Due to the seasonality and timing of the dividend income received from the underlying securities held by the equity Funds, the equity Funds' annualized distribution yield based on the most recent quarter's income distribution may not be representative of the distribution yield over the course of a full year.

The **SEC Standardized Yield** is a standard yield calculation developed and required by the Securities and Exchange Commission (SEC). It is based on the most recent 30-day period covered by the Fund's filings with the SEC. The yield reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses. This is also referred to as the "Standardized Yield." Unsubsidized yield reflects what the SEC Standardized Yield would have been had no fee waivers been in effect during the 30-day period. Without fee waivers, the SEC Standardized Yield would be reduced.

The **Trailing 12-Month Distribution Yield** is calculated by using the sum of all Fund distributions paid over the last four quarters and dividing by the Fund's NAV as of 6/30/2019. This measure represents the yield over the prior twelve months if the investor had purchased the Fund and held it for a year, assuming no change in NAV. It may not be an accurate reflection of the actual return an investor may have received because the Fund's NAV is constantly changing due to market factors.

There are risks involved with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, currency, fixed income and alternative investments include additional risks.

An investment in the GCC Fund is speculative, involves a substantial degree of risk, and should not constitute an investor's entire portfolio. One of the risks associated with GCC is the use of commodity futures contracts. Derivatives can be volatile and may be less liquid than other securities and more sensitive to the effects of varied economic conditions. Investments in commodities may be affected by overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes and international economic and political developments. GCC is not an Investment Company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to the regulations thereunder.

**Please see prospectus for discussion of risks. Commodities and futures are generally volatile and are not suitable for all investors.**

Please read the prospectus carefully before you invest.***

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. Eastern time net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. In computing the market price total returns for GCC, the inputs for dates on or after January 1, 2016 reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed, and the inputs for dates prior to January 1, 2016 reflect the last price as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

Performance less than one year is cumulative.
