

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com.

You cannot invest directly in an index. Index performance does not represent actual fund or portfolio performance. A fund or portfolio may differ significantly from the securities included in the index. Index performance assumes reinvestment of dividends but does not reflect any management fees, transaction costs or other expenses that would be incurred by a portfolio or fund, or brokerage commissions on transactions in fund shares. Such fees, expenses and commissions could reduce returns. WisdomTree, its affiliates and their independent providers are not liable for any informational errors, incompleteness or delays or for any actions taken in reliance on information contained herein.

Additional Index information is available at www.wisdomtree.com.

Investors should read the prospectus carefully before investing.

1 Performance of one year or less is cumulative.

Important Information

Each WisdomTree Digital Fund (each, a “Digital Fund”) invests at least 80% of its assets in either fixed income securities (e.g., U.S. Treasuries) or equity securities (e.g., U.S. listed stocks) as further described in each Digital Fund’s prospectus. Reference to “blockchain enabled” is meant to reflect the fact that each Digital Fund uses blockchain technology. The Digital Funds will not directly or indirectly invest in any assets that rely on blockchain technology, such as cryptocurrencies.

A blockchain is an open, distributed ledger that digitally records transactions in a verifiable and immutable (i.e., permanent) way using cryptography. A distributed ledger is a database in which data is stored in a decentralized manner. Cryptography is a method of storing and transmitting data in a particular form so that only those for whom it is intended can read and process it. A blockchain stores transaction data in “blocks” that are linked together to form a “chain”, and hence the name blockchain.

There are risks associated with investing, including possible loss of principal. Because each Digital Fund is new, it has no performance history. Blockchain technology is a relatively new and untested technology, with little regulation. Blockchain systems could be vulnerable to fraud, particularly if a significant minority of participants colluded to defraud the rest. Potential risks also include vulnerability to theft, or inaccessibility, and future regulatory developments could affect its viability. For the Digital Funds investing in U.S. Treasury obligations, such obligations may provide relatively lower returns than those of other securities. Changes to the financial condition or credit rating of the U.S. government may cause the value to decline. Fixed income securities are subject interest rate, credit, inflation, and reinvestment risks. As interest rates rise, the value of fixed-income securities fall. For the Digital Funds investing in U.S. equity securities, the trading prices of U.S. equity securities fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The types of U.S. equity securities in which an applicable Digital Fund may provide relatively lower returns than those of other securities.

Cybersecurity attacks affecting a Digital Fund’s third-party service providers, the mobile phone application used to transact in Digital Fund shares, blockchain network, or the issuers of securities in which the Digital Fund invests may subject the Digital Fund to many of the same risks associated with direct cybersecurity breaches.

WisdomTree Digital Funds are distributed by Foreside Fund Services, LLC. Foreside is not affiliated with WisdomTree, nor any entity mentioned.

WTSYX The Solactive U.S. 1-3 Year Treasury Bond Index is a rules-based, market value weighted index designed to track the performance of USD-denominated bonds issued by the U.S. Treasury that have at least 1 year until maturity but less than 3 years from the selection date.
