Premium Discount Report

Oct 1, 2019 To Dec 31, 2019

The below chart presents information about differences between the per share net asset value ("NAV") of each Fund and the market trading price of shares of each Fund. For these purposes, the "market price" is the midpoint of the highest bid and lowest offer for Fund shares as of close of trading on the exchange where Fund shares are listed. The term "premium" is sometimes used to describe a market price in excess of NAV and the term "discount" is sometimes used to describe a market price below NAV. The chart represents information about the size and frequency of premiums or discounts. As with other exchange traded funds, the market price of Fund shares is typically slightly higher or lower than the Fund's per share NAV. Factors that contribute to the differences between market price and NAV include the supply and demand for Fund shares and investors' assessments of the underlying value of a Fund's portfolio securities. Differences between the closing times of the U.S. and non-U.S. markets may contribute to differences between the NAV and market price of Funds that invest in non-U.S. close of the U.S. securities exchanges. Developments after the close of such markets as a result of ongoing price discovery may be reflected in a Fund's market price but not in its NAV (or vice versa).

*Basis point (bps), is a unit that is equal to 1/100th of 1%.

Important Information: Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. Please see prospectus for discussion of risks. To obtain a prospectus and other important information, please call 1-866-909-WISE (9473) or download a prospectus online at WisdomTree.com. There are risks involved with investing including the possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, real estate, currency, fixed income and alternative investments include additional risks. Past performance does not guarantee future results.
