The Fund's shares began trading at their post-split price on June 10, 2021. See share split announcement attached.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The 2-for-1 share split was a non-taxable transaction. WisdomTree Announces ETF Share Splits

New York, NY – (GlobeNewswire) – May 27, 2021 – WisdomTree (NASDAQ: WETF), an exchange-traded product (“ETP”) sponsor and asset manager, today announced forward share splits on the WisdomTree U.S. Quality Shareholder Yield Fund (QSY) and the WisdomTree Global ex-U.S. Quality Dividend Growth Fund (DNL). Forward splits increase the number of shares outstanding and decrease the price per share. The splits will not change the total value of a shareholder’s investment.

The stock splits will apply to shareholders of record as of the close of the markets on June 7, 2021, payable after the close of the markets on June 9, 2021. Shares will trade at their post-split price on June 10, 2021.

Ticker	Fund Name	NAV per Share (as of 5/26/2021)	Split Ratio
QSY	WisdomTree U.S. Quality Shareholder Yield Fund	\$118.82	2:1
DNL	WisdomTree Global ex-U.S. Quality Dividend Growth Fund	\$82.37	2:1

The following table illustrates the effect of a hypothetical 2-for-1 forward share split:

Period	Number of Shares Owned	Hypothetical Price per Share	Total Value of Shares
Pre-Split	100	\$100.00	\$10,000
Post-Split	200	\$50.00	\$10,000

The WisdomTree Capital Markets team is continually evaluating the suite of WisdomTree funds for potential operational or other changes that seek to benefit investors, with particular focus on ETF trading.

Anita Rausch, WisdomTree Head of Capital Markets, said, “As QSY and DNL continue to gain traction and interest from investors, splitting the funds’ price 2:1 has the potential to result in tighter bid/ask spreads for the benefit of all investors. Furthermore, the lower price point of the funds allow for a smaller minimum investment, as well as further ease when rebalancing ETF portfolios, among other potential benefits.”

There are risks associated with investing, including the possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in emerging or offshore markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental

regulation and intervention or political developments. The Fund's exposure to certain sectors may increase its vulnerability to any single economic or regulatory development related to such sector. As this Fund can have a high concentration in some issuers, the Fund can be adversely impacted by changes affecting those issuers. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.
