

The Bloomberg U.S. Short Aggregate Enhanced Yield Index (“Short Agg Enhanced Yield”) is designed to achieve a higher yield than the 1-5-year segment of the Bloomberg U.S. Aggregate Index (“Short Agg”) while broadly retaining similar risk characteristics. The weights of the components in the Short Agg Enhanced Yield are rebalanced monthly. The new index projected weights took effect after the close on March 31, 2024.

#### KEY REBALANCE HIGHLIGHTS

- The Short Agg Enhanced Yield is yielding 30 bps<sup>1</sup> more than the Short Agg (approx. 5.04% vs. 4.74%) with slightly lower duration (2.51 vs. 2.76 years) after rebalancing.
- Relative to last month, the Short Agg Enhanced Yield Index...
  - decreased exposure to MBS conventional 15 year by 1.5%.
  - increased exposure to 1-5 year ABS by 2.2%.
- The Short Agg Enhanced Yield’s largest overweights to the Short Agg are in 1-3 year Baa-rated corporate credit (+13.4%) and 1-3 year A-rated corporate credit (+9.9%).
- Its largest underweights are in 3-5-year Treasuries (-15.3%) and 1-3-year Treasuries (-15.1%).

---

**Glossary:**

**Yield to Worst (YTW)** is the lowest potential yield that can be received on a bond without the issuer actually defaulting. When a bond is callable, the yield to worst is the lower yield of yield to maturity and yield to call.

**Duration** is a measure of the sensitivity of the price (the value of principal) of a fixed income investment to a change in interest rates. Effective duration is a calculation used to approximate the actual, modified duration of a callable bond. It takes into account that future interest rate changes will affect the expected cash flows for a callable bond.

**Credit Quality** is the underlying credit worthiness of a bond, reflecting its risk of default. Credit quality is typically represented by the credit ratings of a bond that are assigned by rating agencies such as Moody's or Standard & Poor's. *The highest rating is Aaa, and the lowest is D. Securities with credit ratings of Bbb and above are considered investment grade.*

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. For a prospectus or, if available, the summary prospectus containing this and other important information about the fund, call 866.909.9473 or visit [WisdomTree.com/investments](https://www.wisdomtree.com/investments). Read the prospectus or, if available, the summary prospectus carefully before investing.

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. High-yield or "junk" bonds have lower credit ratings and involve a greater risk to principal. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund June change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. Please read the Fund's prospectus for specific details regarding the Fund's risk profile
