

WisdomTree ETF Monthly Performance Report

As of October 31, 2011

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

WisdomTree ETF Monthly Performance Report

As of October 31, 2011

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Fund's that focus its investments in one country increase the impact of events and developments associated with the region which can adversely affect performance. Fund's focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than developed markets and are subject to additional risks, such as of adverse governmental regulation and intervention or political developments. Investments in currency involve additional special risks, such as credit risk, interest rate fluctuations, derivative investment risk which can be volatile and may be less liquid than other securities and the effect of varied economic conditions. As these Fund's can have a high concentration in some issuers the Fund's can be adversely impacted by changes affecting issuers. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. An investment in the Managed Futures Strategy Fund (WDTI) is speculative, involves a substantial degree of risk, and should not constitute an investor's entire portfolio. One of the risks associated with the WDTI Fund is the complexity of the different factors which contribute to the Funds performance, as well as its correlation (or non-correlation) to other asset classes. These factors include use of long and short positions in commodity futures contracts, currency forward contracts, swaps and other derivatives. The WDTI Fund should not be used as a proxy for taking long only (or short only) positions in commodities or currencies. In markets without sustained price trends or markets that quickly reverse or "whipsaw" the WDTI Fund may suffer significant losses.

Unlike typical exchange-traded funds, there are no indexes that the Currency Funds, Fixed Income Funds or WDTI attempt to track or replicate. Thus, the ability of these Funds to achieve their objectives will depend on the effectiveness of the portfolio manager. Please read the Funds' prospectus for specific details regarding the Funds' risk profile.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

The index is calculated using the same methodology as its corresponding MSCI EAFE Index in U.S. dollars, with the key difference being the currency the securities are quoted in. The price used for each security in the local currency index is the local price, on the primary exchange on which a security is traded, with no conversion into U.S. dollars. The MSCI Japan Local Currency Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Japan. The index is calculated using the same methodology as its corresponding MSCI Japan Index in U.S. dollars, with the key difference being the currency the securities are quoted in. The price used for each security in the local currency index is the local price, on the primary exchange on which a security is traded, with no conversion into U.S. dollars.

WisdomTree ETF Monthly Performance Report

As of October 31, 2011

The MSCI Pacific ex-Japan Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Australia, Hong Kong, Singapore, and New Zealand. The MSCI Pacific ex-Japan Value Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance of value stocks in Australia, Hong Kong, Singapore, and New Zealand. The MSCI AC World Index is a free float-adjusted market capitalization index that is designed to measure the performance of the world stock market indexes covered by MSCI. The MSCI AC World ex USA Growth Index is a subset of the MSCI AC World ex USA Index and is composed only of the MSCI AC World ex USA Index stocks which are categorized as growth stocks.

The Dow Jones Global ex-U.S. Select Real Estate Securities Index is a float-adjusted market capitalization weighted index that defines and measures the investable universe of publicly traded real estate securities in countries outside the U.S. The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure emerging markets equity performance. The MSCI Emerging Markets Small Cap Index is a free float-adjusted market capitalization index that is designed to measure the performance of small capitalization equities in the emerging markets. The MSCI India Index is a free float-adjusted market capitalization index that is designed to measure the performance of stocks in India. The MSCI Arabian Markets ex Saudi Arabia Index is a free float-adjusted market capitalization index that is designed to measure the performance of stocks in the Gulf Cooperation Council (GCC) countries and the neighboring region: the United Arab Emirates, Kuwait, Qatar, Bahrain, Oman, Egypt, Jordan, and Morocco. S&P Developed Ex-U.S. BMI Sector Indexes are indexes that track specific sectors of developed global markets outside the United States.

The JP Morgan Emerging Local Markets Index Plus (ELMI+) and its underlying country and regional sub-indexes track the total returns for local-currency denominated money market instruments in emerging market countries. The Brazil, China, India and South Africa sub-indexes use a weighted basket of 1-mo, 2-mo, and 3-mo months currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in the local-currency money market instruments. The returns are reported in U.S. dollar terms. Equal-Weighted Emerging Currency Composite: An equal-weighted composite calculated by WisdomTree that tracks the returns of the currencies within the fund using the total returns of the respective country sub-indices of the JP Morgan Emerging Local Markets Index Plus (ELMI+). Merrill Lynch EUR and Japanese Yen 1-Month LIBID Constant Maturity Indexes: Merrill Lynch Currency, One-month constant maturity LIBID Index tracks a consistent investment in 1-mo. appropriate currency-denominated bank deposits. LIBID is the London Interbank Bid Rate, or the rate at which banks are willing to borrow.

The BofA Merrill Lynch Euro Government Index (EG00) tracks the performance of EUR denominated sovereign debt publicly issued by Euro member countries in either the eurobond market or the issuer's own domestic market and rated investment grade (based on an average of Moody's, S&P and Fitch).

The BofA Merrill Lynch Euro Government Excluding Greece, Ireland, Italy, Portugal & Spain Index (NCLR) is a subset of The BofA Merrill Lynch Euro Government Index excluding all securities with Greece, Ireland, Italy, Portugal and Spain as the country of risk.

The composite tracks an 80% / 20% weighted exposure to the local currency bond markets of Australia and New Zealand, respectively. Performance for Australia is proxied by the total returns of the Citigroup Australian Broad Investment-Grade (AusBIG) Index. Performance for the New Zealand bond market is proxied by the JPMorgan New Zealand Government Bond Index. Country exposures are rebalanced back to target weighting quarterly. The Citigroup Australian Broad Investment-Grade (AusBIG) Index is a market capitalization weighted index designed to represent the Australian fixed-coupon bond market, including government, semi-government, and investment grade credit markets (including supranational issuers). The JPMorgan New Zealand Government Bond Index is a market capitalization weighted index of locally denominated, fixed rate government debt.

The JP Morgan GBI-EM Global Diversified Index tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base. The index incorporates a constrained market-capitalization methodology in which individual issuer exposures are capped at 10%, (with the excess distributed to smaller issuers) to greater diversification among issuing governments. New Zealand Dollar; South African Rand; Brazilian Real; EURO; Japanese Yen: Currency return calculated by WisdomTree as the percentage difference between the end of quarter spot rate and the beginning of the quarter spot rate. Source: WM Reuters London closing rates. Chinese Yuan; Indian Rupee: Currency return calculated by WisdomTree as the percentage difference between the end of quarter spot rate and the beginning of the quarter spot rate. Source: Tullett Prepon Singapore closing rates.

The Diversified Trends Indicator is a long/short rules-based index constructed of 24 liquid commodity and financial futures contracts comprised of 17 sectors. These are the approximate market sectors and sector weightings included in the DTI Index as of the beginning of each year (assuming the Energy sector is long). Each month the DTI Index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials when energy is long and approximately 39.5% commodities and 60.5% financials when energy is flat. The sectors are positioned either long or short depending on the current market environment. The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index are subject to change at any time.

The HSBC Asian Local Bond Index tracks the total return performance of liquid bonds denominated in the local currencies in China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, and Thailand. Country weightings are driven by market capitalization, liquidity, accessibility, and market development, while security weightings within the countries are based on market capitalization.

The Asia Pacific ex-Japan Local Debt Composite tracks an equal-weighted exposure to the local currency sovereign bond markets of the Fund's constituent countries. Currently, the composite tracks the returns from the following sovereign bond markets: Australia, China, Hong Kong, Indonesia, India, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, and Thailand. Performance for South Korean, Taiwanese, and Philippine government bonds is proxied by the total returns of the respective Bank of America Merrill Lynch Global Sovereign country subindex. Performance for the remaining bond markets is proxied by the JPMorgan Government Bond index for each country. Country exposures are rebalanced back to equal-weighting quarterly. Constituent changes are made at the end of the month following the annual review unless otherwise noted.
