

The Total Return NAV is calculated based on net asset value on ex-dividend date. The ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to be paid the most recently declared dividend. It is also on this date that an amount roughly equal to the dividend paid is removed from the Fund's net asset value once declared. Total Return Market Price is calculated based on the midpoint of the bid/ask spread on payable date. The payable date is the date the dividend is paid to the holders of record. For the current performance reporting period, the ex-dividend date occurred prior to the reporting period and the payable occurred during the reporting period.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

There are risks involved with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, currency, fixed income and alternative investments include additional risks. Please see prospectus for discussion of risks.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.
