MONTHLY PERFORMANCE REPORT [as of January 31, 2012]

The Total Return NAV is calculated based on net asset value on ex-dividend date. The ex-dividend date is the day on which all shares bought and sold no longer come attached with the right to be paid the most recently declared dividend. It is also on this date that an amount roughly equal to the dividend paid is removed from the Fund's net asset value once declared. Total Return Market Price is calculated based on midpoint of the bidask spread on payable date. The payable date is the date the dividend is paid to the holders of record. For the current performance reporting period, the ex-dividend date occurred prior to the reporting period and the payable occurred during the reporting period.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

There are risks involved with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, currency, fixed income and alternative investments include additional risks. Please see prospectus for discussion of risks.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

The Diversified Trends Indicator is a long/short rules-based index constructed of 24 liquid commodity and financial futures contracts comprised of 17 sectors. These are the approximate market sectors and sector weightings included in the DTI Index as of the beginning of each year (assuming the Energy sector is long). Each month the DTI Index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials when energy is long and approximately 39.5% commodities and 60.5% financials when energy is flat. The sectors are positioned either long or short depending on the current market environment. The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index are subject to change at any time.

The BofA Merrill Lynch Global Diversified Inflation-Linked Index tracks the total return performance of a broad, capped market value weighted index designed to measure the performance of inflation-linked sovereign debt publicly issued and denominated in the issuer's own domestic market and currency. Constituent securities for selected countries are rebalanced monthly. The HSBC Asian Local Bond Index tracks the total return performance of liquid bonds denominated in the local currencies in China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, and Thailand. Country weightings are driven by market capitalization, liquidity, accessibility, and market development, while security weightings within the countries are based on market capitalization.

The Asia Pacific ex-Japan Local Debt Composite tracks an equal-weighted exposure to the local currency sovereign bond markets of the Fund's constituent countries. Currently, the composite tracks the returns from the following sovereign bond markets: Australia, China, Hong Kong, Indonesia, India, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, and Thailand. Performance for South Korean, Taiwanese, and Philippine government bonds is proxied by the total returns of the respective BofA Merrill Lynch Global Sovereign country subindex. Performance for the remaining bond markets is proxied by the JPMorgan Government Bond index for each country. Country exposures are rebalanced back to equal-weighting quarterly. Constituent changes are made at the end of the month following the annual review unless otherwise noted.
