

Europe's defence after the 'peace headlines': policy over price

Published August 29, 2025

Key Takeaways

- Recent talks yielded no binding deal; markets overpriced a quick settlement and underpriced the cost of credible deterrence and possible European peacekeeping.
- NATO 5% by 2035 (>3.5% core defence) and the EU's €150bn SAFE programme hard-wire multi-year budgets.
- Readiness 2030 and EDIS/EDIP drive single market integration, industrial capacity build-out, and dual-use innovation in AI, drones and space.
- August's sell-off looks like a valuation reset; the structural outlay path remains intact.

European defence companies were among the market's standout themes in the first half of 2025. The defence companies rallied as Europe moved from rhetoric to action on rearmament. The August wobble, sparked by headlines about potential US–Russia diplomacy and a mooted Ukraine ceasefire, has led some to ask whether the thesis has run its course. Our view remains that the setback is cyclical while the drivers are structural. Put simply: the pullback is not the story, the commitment is.

Markets have latched on to 'deal' headlines, in our view overpricing the probability of a near-term settlement and underpricing the cost of deterrence even if one is struck. Even with an agreement, a credible ceasefire with robust security guarantees implies a sustained European military presence on the ground, together with stockpile rebuilds and higher readiness along NATO1. News reporting also discusses a potential European peace force, which would be expensive in its own right, with multi-year procurement and sustainment needs. In short, deterrence is capital-intensive; the recent de-rating looks like sentiment, not a change to the structural outlay path.

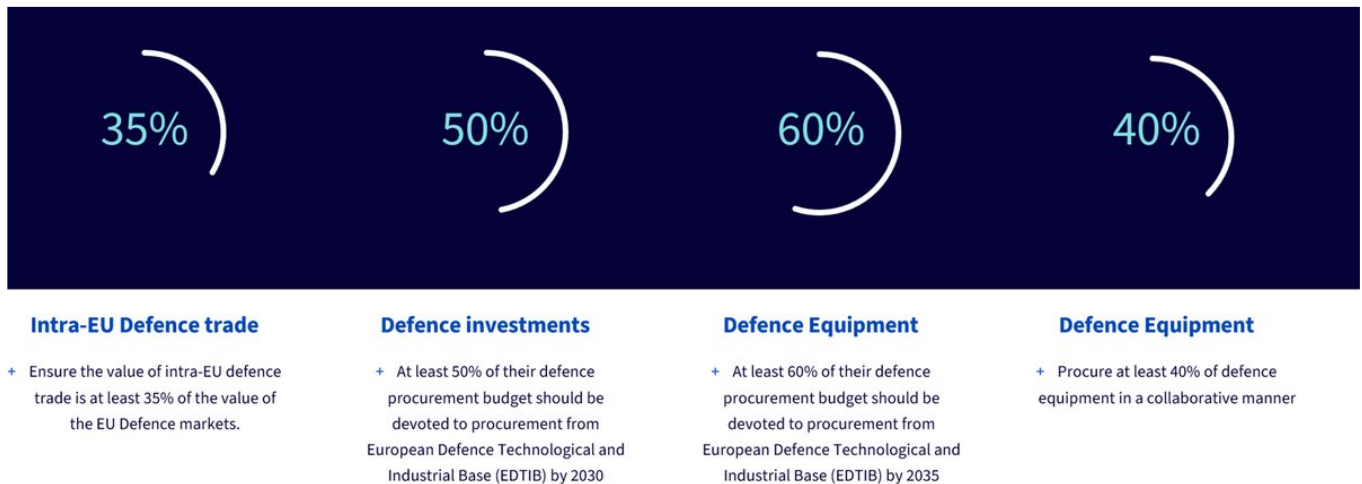

Structural commitments: what changed in 2025 is policy, not sentiment

Europe's defence trajectory is now codified in treaty-level and EU-level frameworks. At NATO's Hague Summit on 24–25 June 2025, allies set a new framework to lift outlays to 5% of GDP² by 2035, including at least 3.5% for core defence³. This is a step change from the long-standing 2% yardstick and anchors a multi-year glidepath for budgets rather than a one-season spike.

Brussels has built financing and industrial scaffolding to match the ambition. On 27 May 2025, the Council formally adopted the Security Action for Europe (SAFE) instrument — providing up to €150 billion⁴ in EU-backed loans to co-finance joint procurement and scale priority capabilities, from air and missile defence to munitions and drones. The intent is to overcome fragmentation and to give prime contractors and their supply chains the predictable demand needed to invest at scale.

Crucially, the ramp begins from a higher base. EU members' defence outlays reached an estimated €326 billion in 2024, about 1.9% of GDP and more than 30% above 2021, evidence that rearmament has already moved from rhetoric to budgets⁵. Alongside the money, the European Defence Industrial Strategy (EDIS) and the associated European Defence Industry Programme (EDIP) set clear direction for a genuine single market in defence, with explicit targets to raise intra-EU procurement and collaborative buying by 2030 and to progress towards at least 60% of procurement within the EU by 2035⁶.

Beyond Ukraine: durable demand

The Commission's Readiness 2030 framing is blunt: "the moment has come for Europe to re-arm" and to deliver a "once-in-a-generation surge" aimed at rebuilding deterrence, supporting Ukraine and constructing a resilient industrial base. It also characterises Ukraine as "the world's leading defence and technology innovation laboratory," reflecting an intention to integrate Ukraine into Europe's defence ecosystem over time. That logic holds even if the fighting pauses. After the largest land war on the continent since 1945, the objective is credible European force by 2030, whether the battlefield falls quiet in 2026 or 2027. Budgets built around deterrence are sticky; they are tied to treaty obligations, geopolitical necessity and an industrial strategy that will take years to deliver.

The mooted security-guarantee track reinforces the point. The April counterproposal⁷ seeks robust, U.S.-backed guarantees with Article-5-like features and envisages no talks on territorial concessions until a full ceasefire is in place. If such a framework were agreed, Europe would by design sit at the centre of day-to-day implementation. That implies force generation, persistent presence and sustained readiness, drivers of demand rather than a reason to retrench. Separate reporting describes European planning for potential peacekeeping contingents and a U.S. ‘backstop’ of air and enablers, consistent with Washington’s reluctance to deploy ground forces.

Industrial upswing and technological innovation

Europe’s defence turn is industrial policy as much as military policy. Longer, predictable order books are catalysing capex⁸, hiring and supply-chain expansion, drawing in legacy sectors such as steel, chemicals and automotive and beginning to address the historic ‘scale problem’ of a fragmented market. A visible case is Rheinmetall’s view that Volkswagen’s Osnabrück plant would be “very suitable” for conversion to defence production⁹ — contingent on large, sustained orders such as serial Lynx infantry-fighting-vehicle runs. That is exactly the sort of predictability a NATO 5%/3.5% pathway and the EU’s SAFE loans are designed to create.

The technology dimension is equally important. Defence investment spills into AI¹⁰, robotics, space and advanced electronics — dual-use domains where Europe seeks resilience and strategic autonomy. Readiness 2030 explicitly links outlay to these frontier areas. Sustained, multi-year procurement enables the kind of capital deepening Europe’s fragmented ecosystem has lacked, improving scale and competitiveness.

Prices are cyclical, policy is sticky

Markets move faster than policy. By the time Brussels announces a new initiative, investors often price it instantly; when shares 'run double in a matter of months,' the potential stage was set for pullbacks when sentiment wavers. The mistake is to read price action as policy reversal. Prices are cyclical; the budgets beneath them are durable, locked in by treaty commitments and industrial strategy. Europe's timeline is still at the beginning: Readiness 203011 implies capacity building through the end of the decade. In that framing, August's sell-off is turbulence on the runway, not the plane turning around.

Recent diplomacy strengthens a baseline scenario in which Europe assumes more of the security burden, consistent with Washington signalling a more limited U.S. role in any long-term guarantees and with NATO's new spending architecture. Various reports have even discussed a European peacekeeping presence under a ceasefire framework (still at the exploratory stage and far from agreed), which would not reduce equipment or readiness requirements.

Conclusion

The news cycle has been dynamic; the policy architecture is not. NATO's 5%-by-2035 framework, with a 3.5% core-defence floor, signals rising budgets into the next decade. The EU's SAFE instrument backs that with up to €150 billion for joint procurement and capacity expansion, while EDIS/EDIP aim to turn a patchwork of national programmes into a functioning European market for defence equipment. All of this builds on a spending base already at €326 billion, more than a third above 2021. And the most plausible settlement contours, in which Washington provides air power and enablers while Europeans shoulder an on-the-ground role under robust guarantees, suggest that even a ceasefire would sustain, not sap, demand. This remains a policy-led, long-duration theme rooted in deterrence, industrial readiness and technological spillovers. The recent pullback does not invalidate that logic; if anything, it improves entry points into an industrial and capability build-out designed to endure.

What WisdomTree offer

Investors seeking turnkey exposure can look to the [WisdomTree Europe Defence UCITS ETF \(WDEF\)](#). Tracking the WisdomTree Europe Defence UCITS Index, WDEF applies the revenue exposure score framework, liquidity screens and capping rules to offer a themed basket tilted toward the companies most leveraged to Europe's re-armament. UCITS compliance, semi-annual rebalancing and a single-trade solution make it a practical way to capture the region's structural defence upswing.

WisdomTree Issuer ICAV

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares.

The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

Notice to Investors in Switzerland – Qualified Investors

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus and the key investor information documents (KIID) are available from WisdomTree's website: <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports>

Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

For Investors in France:

The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public. The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

For Investors in Malta: This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this

document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

For Investors in Monaco: This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.
