WisdomTree ETF Monthly Performance Report

As of January 31, 2011

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Fund's that focus its investments in one country increase the impact of events and developments associated with the region which can adversely affect performance. Fund's focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than developed markets and are subject to additional risks, such as of adverse governmental regulation and intervention or political developments. Investments in currency involve additional special risks, such as credit risk, interest rate fluctuations, derivative investment risk which can be volatile and may be less liquid than other securities and the effect of varied economic conditions. As these Fund's can have a high concentration in some issuers the Fund's can be adversely impacted by changes affecting issuers. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise.

In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. An investment in the Managed Futures Strategy Fund (WDTI) is speculative, involves a substantial degree of risk, and should not constitute an investor's entire portfolio. One of the risks associated with the WDTI Fund is the complexity of the different factors which contribute to the Fund's performance, as well as its correlation (or non-correlation) to other asset classes. These factors include use of long and short positions in commodity futures contracts, currency forward contracts, swaps and other derivatives. The WDTI Fund should not be used as a proxy for taking long only (or short only) positions in commodities or currencies. In markets without sustained price trends or markets that quickly reverse or "whipsaw" the WDTI Fund may suffer significant losses.

Unlike typical exchange-traded funds, there are no indexes that the Currency Fund's, the Emerging Markets Local Debt Fund or WDTI attempt to track or replicate. Thus, the ability of these Fund's to achieve their objectives will depend on the effectiveness of the portfolio manager. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.
