

The WisdomTree Emerging Markets Corporate Bond Fund seeks to provide a high level of total return consisting of both income and capital appreciation through investments in the debt of emerging markets corporate issuers.

The Fund generated a net return of -0.40% on net asset value (NAV) during the first quarter. The Fund underperformed its reference benchmark, the JPMorgan Corporate Emerging Markets Bond Index Broad by 94 basis points (-0.40% versus 0.54%). Since inception (March 8, 2012), the Fund has generated an absolute return of 9.81% and excess returns of 0.40% when compared to its benchmark.

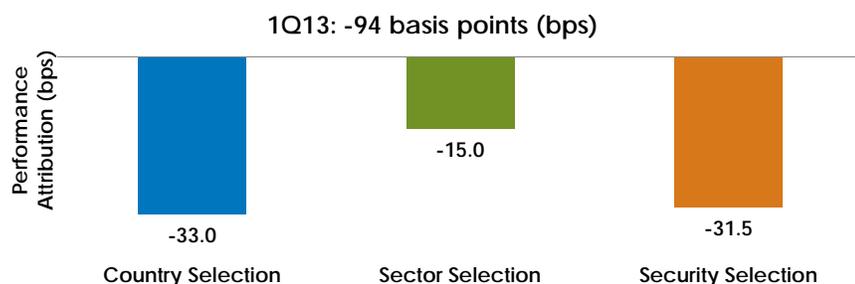

The Fund's overweight exposure to Brazilian and Mexican corporate issuers at the expense of companies domiciled in China and Indonesia detracted from performance relative to the index during the quarter. Sector tilts away from Mexican Telecom boosted relative performance. In terms of security selection, positions in Hutchison Whampoa (Hong Kong Industrial) and Southern Copper (Mexican Metals & Mining) detracted from performance. Issue selection in Brazil's Oil & Gas as well as Metals & Mining sectors also underperformed last quarter.

Emerging markets continue to exhibit strong fundamentals. While growth prospects have generally been revised downward, they remain compelling on an absolute and relative basis versus developed market countries. Corporations from the developing world should increasingly rise in prominence on a global scale. We continue to believe their debt to be an attractive means of expressing a favorable view in emerging market countries.

Oil & Gas and Metals & Mining remain favored sectors, with many top-tier emerging market companies representing less cyclical exposure to the broad market. Select Telecom and Utility companies in Brazil, Colombia, Indonesia, Mexico and Russia remain overweights. We expect to continue to run a large underweight to the Banking & Finance sector on the back of growing asset quality concerns and uncertain economic conditions.

The chart below displays the Fund's performance relative to its benchmark during the first quarter of 2013 for various selection criteria.

Quarterly Performance Attribution as of 3/31/2013

Sector	Relative Performance
Country Selection	-0.33%
Sector Selection	-0.15%
Security Selection	-0.32%
Portfolio Outperformance	-0.80%
Slippage*	0.01%
Expense Ratio	0.15%
Net Portfolio Outperformance	-0.94%

EMCB Average Annual Total Returns as of 3/31/2013

Expense Ratio: .60%

	Returns (%)			
	1-Mo.	3-Mo.	1-Yr.	Since Fund Inception (3/08/12)
WisdomTree Emerging Markets Corporate Bond Fund - NAV	0.12%	-0.40%	10.64%	9.81%
WisdomTree Emerging Markets Corporate Bond Fund - Market	-0.04%	-0.64%	10.90%	10.07%
JPMorgan Corporate Emerging Markets Bond Index Broad	-0.07%	0.54%	10.05%	9.41%

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, maybe be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

*Slippage in calculation comes from timing, treatment of accruals as well as compounding mathematical issues which cannot be perfectly calculated.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. To obtain a prospectus containing this and other important information, call 1-866-909-WISE (9473) or visit wisdomtree.com. Read the prospectus carefully before you invest.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effects of varied economic conditions.

Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. Unlike typical exchange-traded funds, there is no index that the Fund attempts to track or replicate. Thus, the ability of the Fund to achieve its objective will depend on the effectiveness of the portfolio manager. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

You cannot invest directly in an index.

WisdomTree Funds are distributed by ALPS Distributors, Inc.

The JPMorgan Corporate Emerging Markets Bond Index Broad is a market capitalization weighted index consisting of US dollar-denominated Emerging Market corporate bonds. The index serves as a global corporate benchmark representing Asia, Latin America, Europe and Middle East / Africa. US dollar-denominated corporate issues from index-eligible countries are narrowed further by only including issues with more than \$300m current face outstanding and at least five years to maturity (at the time of inclusion into the index). A basis point is defined as one one-hundredth of a percent.
