

WisdomTree Emerging Markets Corporate Bond Fund seeks to provide a high level of total return consisting of both income and capital appreciation through investments in the debt of emerging markets corporate issuers.

The Fund generated a net return of 5.69% during the third quarter. It outperformed its reference benchmark, the JPMorgan Corporate Emerging Markets Bond Index Broad by 77 basis points (5.69% NAV return versus 4.92%). Since inception (March 8th, 2012), the Fund has generated excess returns of 102 basis points when compared to its benchmark.

The Fund's overweight exposure to Venezuelan and Russian corporate issuers combined with its underweight to companies domiciled in Singapore and Malaysia boosted performance relative to the index during the quarter. Smaller exposures to China and Argentina and larger exposures to Indonesia detracted from relative performance. Sector tilts away from Banks and towards Telecom in Russia added to relative performance, whereas our positions in Utilities, specifically those in Brazil, disappointed. Security selection was a big driver of excess return for the quarter. At the security level, top performers included several Russian Issuers such as Vimpelcom (Telecom), TNK-BP (Oil & Gas), and Lukoil (Oil & Gas). Noble Group (Hong Kong) and Qtel International (Qatar) also posted strong returns over the quarter.

In the absence of lasting, structural solutions to global macroeconomic issues, namely - the Euro zone debt crisis, Chinese growth concerns, and the U.S. recovery, the emerging world would continue to see divergent performances at the country level. With that said, a premium should be attributed to a country's financial flexibility and resiliency when considering its ability to achieve a relatively high level of economic growth.

As many Emerging Market central banks have already reduced official interest rates to impart a greater emphasis on weak global growth, the expectation is for them to maintain a cautious stance with respect to monetary and exchange rate policy over the coming quarter. Although inflation has been at very manageable levels, supporting growth without fueling inflation will remain a challenge given heightened global liquidity and geopolitical risk.

Oil and gas and metals and mining remain favored sectors, with many top-tier Emerging Market oil and gas names representing corporate credit investment stories and less cyclical exposure to the broad market. Select telecom and utility companies in Brazil, Colombia, Indonesia, Mexico and Russia remain overweights. In addition, banking and finance sectors remain heavy underweights on the back of growing asset quality concerns and generally weaker global economic conditions.

The chart below displays the Fund's performance relative to its benchmark during the third quarter of 2012 for various selection criteria.

### Quarterly Performance Attribution as of 9/30/2012

3Q12: +77 basis points (bps)

Sector	Performance Relative to Index
Country Selection	0.10%
Sector Selection	0.07%
Security Selection	0.60%
<b>Portfolio Outperformance</b>	<b>0.77%</b>
<b>Slippage*</b>	<b>0.00%</b>
<b>Net Portfolio Outperformance</b>	<b>0.77%</b>

### EMCB Average Annual Total Returns as of 9/30/2012

Expense Ratio: .60%

	Returns (%)		
	1-Mo.	3-Mo.	Since Fund Inception (3/08/12)
WisdomTree Emerging Markets Corporate Bond Fund - NAV	1.62%	5.69%	7.35%
WisdomTree Emerging Markets Corporate Bond Fund - Market	1.56%	6.24%	7.70%
JPMorgan Corporate Emerging Markets Bond Index Broad	1.38%	4.92%	6.33%

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [www.wisdomtree.com](http://www.wisdomtree.com).**

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

\*Slippage in calculation comes from timing, treatment of accruals as well as compounding mathematical issues which cannot be perfectly calculated.

Read the prospectus carefully before you invest.**

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effects of varied economic conditions.

Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. Unlike typical exchange-traded funds, there is no index that the Fund attempts to track or replicate. Thus, the ability of the Fund to achieve its objective will depend on the effectiveness of the portfolio manager. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

You cannot invest directly in an index.

WisdomTree Funds are distributed by ALPS Distributors, Inc.

The JPMorgan Corporate Emerging Markets Bond Index Broad is a market capitalization weighted index consisting of US dollar-denominated Emerging Market corporate bonds. The index serves as a global corporate benchmark representing Asia, Latin America, Europe and Middle East / Africa. US dollar-denominated corporate issues from index-eligible countries are narrowed further by only including issues with more than \$300m current face outstanding and at least five years to maturity (at the time of inclusion into the index). A basis point is defined as one one-hundredth of a percent.
