

What's Hot: US-China Trade Talks Highlight Strategic Value of Rare Earths

Published 16 June 2025

Baoqi Zhu

Associate Director, Quantitative Research & Multi Asset Solutions

Key Takeaways

- China's dominant share of rare earth output and reserves enables it to wield export controls as a geopolitical instrument.
- Developing viable alternative supply chains requires overcoming significant investment, regulatory and environmental challenges.
- Potential US support under the Defence Production Act could accelerate domestic rare earth mining and processing capacity.
- The positive market momentum of non-Chinese rare earth miners underscores growing investor confidence in the sector.

The recent US-China trade talks held in London in June 2025 have once again thrust rare earth elements (REEs) into the spotlight. As negotiations concluded, China agreed to ease its export restrictions on rare earth metals, demonstrating clearly how Beijing uses these essential commodities strategically—much like the US employs tech export controls—to advance geopolitical interests. This strategic move highlights an increasingly clear truth: rare earths have become potent geopolitical tools.

Why Rare Earths Can Be Weaponised

Rare earth elements are crucial to the functioning of high-tech industries and defence sectors globally. They are fundamental components of advanced technologies, from radar systems used in defence and aviation, to precision-guided munitions, and even essential elements in semiconductor manufacturing.

China's overwhelming dominance in rare earth production provides it with a unique geopolitical lever. Accounting for nearly 70% of global rare earth output, according to the latest US Geological Survey (USGS) figures, and holding approximately half of the world's known reserves, China's position grants significant influence over global supply chains. The ease with which Beijing can adjust export quotas or enforce export bans means rare earths are easily weaponised to counterbalance geopolitical pressure from Washington.

In recent years, China has strategically utilised rare earth exports as leverage during geopolitical tensions, notably during trade disputes. This control not only provides direct economic advantages but also significant indirect geopolitical influence, placing pressure on high-tech industries in competitor nations reliant on these materials. Such dependence exposes vulnerabilities, making it difficult for nations like the US and its allies to effectively challenge China's manoeuvres without risking substantial economic disruption.

Can the US Find Alternatives?

The US is increasingly aware of the vulnerability inherent in relying heavily on Chinese rare earth supplies. Efforts to develop domestic or allied alternative supply chains are gaining momentum but are fraught with complexity. MP Materials Corp's Mountain Pass mine in California and Lynas Rare Earths Ltd's operations in Australia and Malaysia represent notable non-Chinese producers. Yet, despite their promising production capacities, these firms face significant hurdles.

Firstly, rare earth extraction and processing require significant capital investment and advanced technology. Building and scaling these facilities swiftly enough to reduce reliance on China poses substantial financial and supply chain challenges. Additionally, environmental concerns and stringent regulations

in Western countries can slow project approvals, further complicating the rapid scaling of alternative production facilities.

Opportunities on the Horizon

Nevertheless, recent developments hint at significant opportunities in the rare earth sector, driven by both governmental backing and favourable market sentiment.

The Trump administration is currently considering invoking the Defence Production Act—historically a Cold War-era tool—to provide robust financial backing, loan guarantees, and direct investments for rare earth projects across mining, processing, and downstream technologies. While the precise details and timelines remain uncertain, the move signals potentially substantial government investment to bolster America's strategic autonomy.

From a market perspective, investor sentiment toward companies positioned in the rare earths supply chain has been exceptionally positive in 2025. Shares of Lynas Rare Earths and MP Materials have soared significantly year-to-date, reflecting investor optimism and anticipation of further strategic moves and investments by the US government.

Furthermore, the broader strategic metals sector—encompassing not only rare earths but also lithium, cobalt, and other critical minerals—presents additional growth opportunities. With electric vehicle production accelerating and advanced technological manufacturing expanding, demand for these essential elements is expected to remain robust.

Conclusion

The geopolitical tensions underscored by recent US-China trade talks provide a compelling narrative for the growing strategic importance of rare earth elements. China's dominance in global rare earth production highlights both the risks of reliance and the imperative for the US and its allies to build alternative supply chains.

For investors, rare earth mining and processing sectors appear increasingly attractive, supported by strong government signals of substantial financial backing and buoyant market sentiment. While challenges in environmental management, regulatory approval, and capital intensity remain, the opportunities for significant returns in this strategic sector appear tangible. Thus, the rare earths and broader strategic metals sectors merit close attention from investors looking to navigate the geopolitical complexities shaping today's global markets.

What WisdomTree Offer

The [WisdomTree Strategic Metals and Rare Earths Miners UCITS ETF](#) (Ticker: RARE) offers investors targeted exposure to the Energy Transition Metals and Rare Earth Miners Index. This index identifies globally listed companies across both developed and emerging markets that participate in the Energy Transition Metals Value Chain (ETMVC). Firms within the ETMVC are classified into ten metal categories—aluminum, cobalt, copper, lithium, nickel, platinum, silver, tin, zinc, and rare earth elements—spanning mining, refining, smelting, chemicals, conversions, and industrial applications. As tariffs on semiconductors and steel have contributed to volatility in broader equity markets, rare earth and strategic metals miners have quietly demonstrated significant potential. RARE provides a diversified, professionally managed vehicle to capture this growth in those strategic sectors without needing to select individual names.

WisdomTree Issuer ICAV

The products discussed in this document are issued by WisdomTree Issuer ICAV (“WT Issuer”). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland (“CBI”). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) under the laws of Ireland and shall issue a separate class of shares (“Shares”) representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer (“WT Prospectus”). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the Shares.

The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe’s website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

Notice to Investors in Switzerland – Qualified Investors

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus and the key investor information documents (KIID) are available from WisdomTree's website: <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports>

Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA shall be distributed exclusively to qualified investors, as defined in the Swiss Federal Act on Collective Investment Schemes or its implementing ordinance (each, as amended from time to time). The representative and paying agent of the sub-funds in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent.

For Investors in France:

The information in this document is intended exclusively for professional investors (as defined under the MiFID) investing for their own account and this material may not in any way be distributed to the public. The distribution of the Prospectus and the offering, sale and delivery of Shares in other jurisdictions may be restricted by law. WT Issuer is a UCITS governed by Irish legislation, and approved by the Financial Regulatory as UCITS compliant with European regulations although may not have to comply with the same rules as those applicable to a similar product approved in France. The Fund has been registered for marketing in France by the Financial Markets Authority (Autorité des Marchés Financiers) and may be distributed to investors in France. Copies of all documents (i.e. the Prospectus, the Key Investor Information Document, any supplements or addenda thereto, the latest annual reports and the memorandum of incorporation and articles of association) are available in France, free of charge at the French centralizing agent, Societe Generale at 29, Boulevard Haussmann, 75009, Paris, France. Any subscription for Shares of the Fund will be made on the basis of the terms of the prospectus and any supplements or addenda thereto.

For Investors in Malta: This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the

Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

For Investors in Monaco: This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.
