

What's Hot: What if Greenland risks were to re-escalate?

Published 23 January 2026

Head of Commodities and Macroeconomic Research, WisdomTree Europe

Key Takeaways

- Markets see de-escalation as a pause, not resolution: Greenland tensions have eased, but investors are focused on negotiations ahead rather than the avoidance of immediate tariffs or force.
- Escalation often initiates talks: History shows US pressure tactics are used to open negotiations on favourable terms, reducing tail risks without eliminating them.
- Asset implications are becoming clearer: Ongoing uncertainty is pressuring the US dollar, supporting gold and silver as hedges, and underpinning European defence stocks amid questions over long-term security autonomy.
- Re-escalation risk remains asymmetric: Even renewed tariff threats—short of confrontation—could revive volatility, deepen USD weakness, and favour European equities with limited US exposure.
- Legal uncertainty adds a wildcard: A pending Supreme Court ruling on US tariff powers could either sustain negotiation leverage or act as a circuit breaker limiting future market disruption.

Markets look through de-escalation — for now

Recent headlines around Greenland and US–Europe tensions initially injected volatility into markets. While President Trump has since stepped back from immediate tariff action and ruled out the use of force, investors are increasingly focused on what comes next rather than what has just been avoided.

As ever in geopolitics, the immediate noise can obscure the more important question for markets: is this episode now resolved, or merely entering a different phase?

Escalation often opens negotiations — not closes them

Greenland has featured in US strategic thinking for years. What changed recently was not the underlying issue, but the intensity of the rhetoric. That escalation now appears to have eased, following discussions

between President Trump and NATO Secretary General Mark Rutte around a potential “framework” for cooperation.

Markets recognise that this framework is unlikely to represent a finalised agreement. Instead, it looks more like the opening stage of a negotiation process — one that reduces near-term tail risks, but does not eliminate them.

This pattern is familiar. In previous episodes:

- Threats to reduce US commitment to NATO ultimately led to higher European defence spending.
- Tariff threats against allies created urgency, but were later softened or re-negotiated.
- Pressure tactics were used to shape talks, rather than dictate end outcomes.

History suggests escalation is often a means of forcing negotiations onto US terms — not the final destination.

The risk: volatility during the negotiation phase

While the immediate risk of abrupt escalation has diminished, markets are conscious that negotiations themselves can be messy. Threats that have been paused can re-emerge if talks stall, domestic political incentives change, or leverage is reapplied.

This helps explain why markets have stabilised rather than fully reversed recent moves.

- The US dollar remains under pressure as investors price ongoing policy uncertainty.
- Gold and silver continue to attract demand as portfolio hedges.
- European defence stocks remain well supported amid questions over long-term security autonomy.

Crucially, this still does not resemble a full-scale risk-off episode. Instead, markets appear to be pricing a prolonged period of uncertainty rather than an outright breakdown in US–European relations.

A framework is not an endpoint

The historical precedent suggests that US strategic objectives in the Arctic do not require a transfer of sovereignty. Past agreements between the US and Denmark already demonstrate that security, access, and influence can be achieved within existing territorial arrangements.

A modernised framework — expanding US operational presence while preserving European territorial integrity — would offer a face-saving outcome for all sides. But markets understand that getting from framework to final agreement takes time, and that the negotiation process itself carries risks.

What if the situation re-escalates?

While markets have welcomed the recent step back from immediate tariffs and the explicit ruling out of force, investors are not treating this as resolution. The “framework” discussed with NATO Secretary General Mark Rutte is widely seen as the opening phase of negotiations rather than a finalised agreement.

Negotiation processes of this kind are inherently fragile. If talks stall, domestic political incentives shift, or leverage is reapplied, many of the threats that have been paused could quickly re-emerge.

Importantly, re-escalation would not need to take the form of outright confrontation. Even the renewed use of tariff threats or economic pressure could be sufficient to revive volatility and reinforce recent market trends.

In such a scenario:

- **US dollar weakness could become more entrenched**, as renewed trade uncertainty amplifies doubts around policy coherence and institutional predictability. While any diversification away from the dollar is likely to be gradual, even marginal shifts in global capital allocation can have meaningful currency implications.
- **Gold and silver would likely receive further support**, both as portfolio hedges and as alternative reserve assets, particularly as emerging market central banks observe how economic leverage is deployed against close allies.
- **European defence stocks could extend their outperformance**, as renewed uncertainty reinforces the case for strategic autonomy and sustained increases in defence spending.
- **European equities with limited US exposure may be favoured**, benefiting from relative insulation from trade frictions and policy volatility.

From a portfolio perspective, this argues for treating recent de-escalation as a pause rather than a conclusion.

Top picks

Tariffs, negotiation leverage and the Supreme Court constraint

An important — and underappreciated — dimension of this risk is the unresolved legal status of US tariff powers.

The US Supreme Court has not yet issued a final ruling on the legality of the current tariff regime, having delayed a decision several times. While the Court is not adjudicating on any specific geopolitical dispute, it is weighing a much broader question: whether Congress has delegated excessive unilateral economic authority to the executive branch.

This matters because tariffs sit at the heart of the negotiation toolkit. If talks around Greenland or broader US–European relations were to re-escalate, tariff threats would likely re-emerge as a primary source of leverage. However, their credibility increasingly depends on how the Court ultimately defines the limits of executive power.

Highly visible episodes of economic coercion — whether through tariffs, sanctions, or diplomatic pressure — can sharpen the institutional stakes for justices assessing where constitutional boundaries should lie. In that sense, geopolitical pressure tactics may indirectly influence how the Court views the risks of unconstrained executive authority.

A potential circuit breaker for markets

Markets are therefore navigating two overlapping uncertainties:

- **Negotiation risk**, where tariff threats reappear as talks progress.
- **Institutional constraint risk**, where the Supreme Court may ultimately curtail the executive's ability to deploy tariffs unilaterally.

If the Court were to uphold broad tariff powers, tariff threats would retain their potency as a negotiation tool, increasing the risk of renewed volatility during talks.

By contrast, a ruling that meaningfully constrains tariff authority would act as a circuit breaker. Even if rhetoric were to escalate, investors could take comfort in the presence of institutional guardrails limiting how far trade tensions can realistically go.

Such an outcome would likely support US and global equities, favour growth over value in the US, ease pressure on the dollar, and reduce — though not eliminate — the geopolitical risk premium embedded in gold and silver.

Until that legal clarity emerges, markets are likely to remain sensitive to renewed pressure tactics, even in a world where force has been ruled out and negotiations are formally underway.

Jersey Issuers

The products discussed in this document are issued by WisdomTree Hedged Metal Securities Limited and WisdomTree Foreign Exchange Limited (the "Issuer"). The Issuer is regulated by the Jersey Financial Services Commission. Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled »Risk Factors¼ for further details of risks associated with an investment in the securities offered by the Issuer.

WisdomTree Hedged Metal Securities Limited

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Morgan Stanley & Co International plc, Morgan Stanley & Co. LLC and JP Morgan Chase Bank, N.A. any of their affiliates or anyone else or any of their affiliates. Each of Morgan Stanley & Co International plc, Morgan Stanley & Co. LLC and JP Morgan Chase Bank, N.A. disclaims all and any liability whether arising in tort, contract or otherwise which it might have in respect of this document or its contents otherwise arising in connection herewith.

The Morgan Stanley Indices are the exclusive property of Morgan Stanley & Co. LLC ("Morgan Stanley"). Morgan Stanley and the Morgan Stanley index names are service mark(s) of Morgan Stanley or its affiliates and have been licensed for use for certain purposes by WisdomTree Management Jersey Limited in respect of the securities issued by the Issuer. The securities issued by the Issuer are not sponsored, endorsed, or promoted by Morgan Stanley, and Morgan Stanley bears no liability with respect to any such financial securities. The prospectus of the Issuer contains a more detailed description of the limited relationship Morgan Stanley has with the Issuer and any related financial securities. No purchaser, seller

or holder of securities issued by the Issuer, or any other person or entity, should use or refer to any Morgan Stanley trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting Morgan Stanley to determine whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.

WisdomTree Foreign Exchange Limited

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Morgan Stanley & Co International plc, Morgan Stanley & Co. Incorporated, any of their affiliates or anyone else or any of their affiliates. Each of Morgan Stanley & Co International plc and Morgan Stanley & Co. Incorporated disclaims all and any liability whether arising in tort, contract or otherwise (save as referred to above) which it might have in respect of this document or its contents otherwise arising in connection herewith.

The Morgan Stanley Indices are the exclusive property of Morgan Stanley & Co. Incorporated ("Morgan Stanley"). Morgan Stanley and the Morgan Stanley index names are service mark(s) of Morgan Stanley or its affiliates and have been licensed for use for certain purposes by WisdomTree Management Jersey Limited in respect of the securities issued by Issuer. The securities issued by Issuer are not sponsored, endorsed, or promoted by Morgan Stanley, and Morgan Stanley bears no liability with respect to any such financial securities. The prospectus of Issuer contains a more detailed description of the limited relationship Morgan Stanley has with Issuer and any related financial securities. No purchaser, seller or holder of securities issued by Issuer, or any other person or entity, should use or refer to any Morgan Stanley trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting Morgan Stanley to determine whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.

WisdomTree Issuer ICAV

The products discussed in this document are issued by WisdomTree Issuer ICAV ("WT Issuer"). WT Issuer is an umbrella investment company with variable capital having segregated liability between its funds organised under the laws of Ireland as an Irish Collective Asset-management Vehicle and authorised by the Central Bank of Ireland ("CBI"). WT Issuer is organised as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland and shall issue a separate class of shares ("Shares") representing each fund.

The Fund is described in a Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors, and the prospectus of WT Issuer ("WT Prospectus"). A copy of the WT Prospectus and the KID / KIID is available, for EEA/UK only, in English at www.wisdomtree.eu. Where required under national rules, the KID will also be available in the local language of the relevant EEA Member State. Investors should read the WT Prospectus before investing and should refer to the section of the WT Prospectus entitled »Risk Factors¹/₄ for further details of risks associated with an investment in the Shares.

The [summary of investor rights](#) associated with an investment in the fund is available in English on WisdomTree Europe's website. WisdomTree Management Limited may decide to terminate the arrangements made for the marketing of its collective investment undertakings. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the fund free of any charges or deductions for at least 30 working days from the date of such notification.

For Investors in Switzerland:

This document constitutes an advertisement of the financial product(s) mentioned herein.

The prospectus (in English only) and the key investor information documents (KID) (in German, French and Italian) are available from WisdomTree's website <https://www.wisdomtree.eu/en-ch/resource-library/prospectus-and-regulatory-reports>

For WisdomTree UCITS products only: the representative and paying agent of the ETPs in Switzerland is Société Générale Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich, Switzerland. The prospectus, the key investor information documents (KIID), the articles of association and the annual and semi-annual reports of the sub-funds are available free of charge from the representative and paying agent. As regards distribution in Switzerland, the place of jurisdiction and performance is at the registered seat of the representative and paying agent. Some of the sub-funds referred to in this document may not have been registered with the Swiss Financial Market Supervisory Authority ("FINMA"). In Switzerland, such sub-funds that have not been registered with FINMA may only be available to Qualified Investors.

For Investors in Malta: This document does not constitute or form part of any offer or invitation to the public to subscribe for or purchase shares in the Fund and shall not be construed as such and no person other than the person to whom this document has been addressed or delivered shall be eligible to subscribe for or purchase shares in the Fund. Shares in the Fund will not in any event be marketed to the public in Malta without the prior authorisation of the Maltese Financial Services Authority.

For Investors in Monaco: This communication is only intended for duly registered banks and/or licensed portfolio management companies in Monaco. This communication must not be sent to the public in Monaco.
