

Q1-2026

# WisdomTree International MidCap Dividend Fund (DIM)

# WisdomTree Company Overview

## + **Who We Are**

WisdomTree is a global financial innovator, empowering investors to shape their future and supporting financial professionals to better serve their clients and grow their businesses.

## + **WisdomTree Solutions**

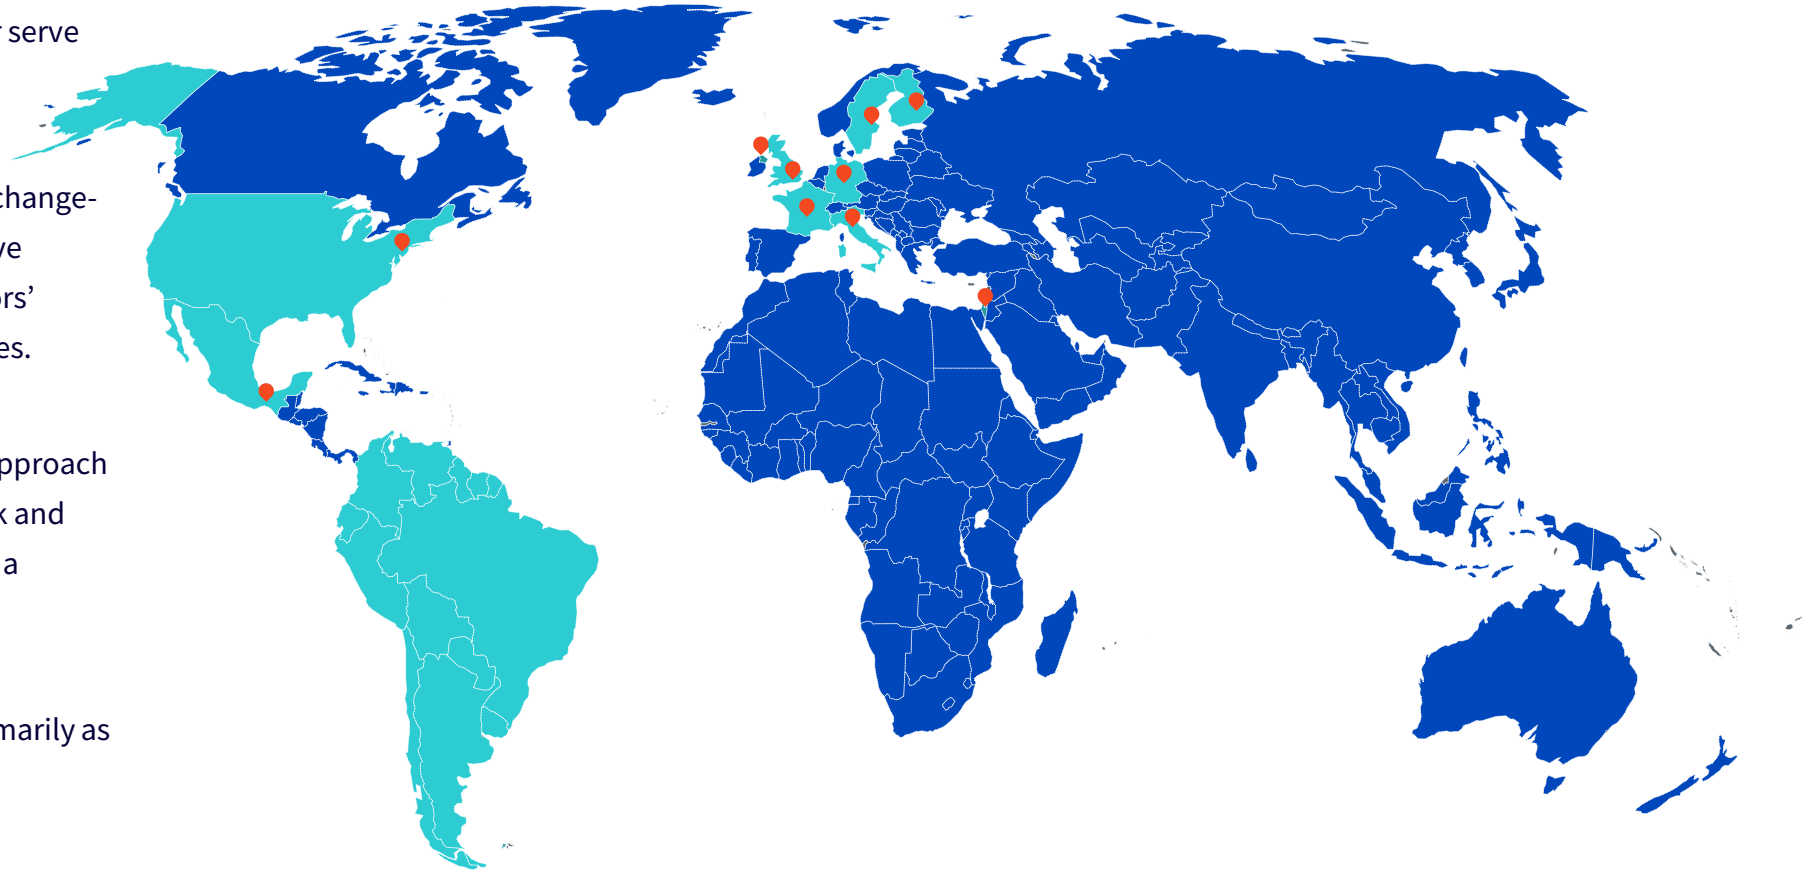

WisdomTree manages \$150.6 billion\* in exchange-traded products globally, through innovative solutions that are designed to meet investors' needs across asset classes and market cycles.

## + **Investment Philosophy & Approach**

Our belief that a fundamentally weighted approach can produce attractive returns with less risk and expense than active management made us a pioneer in factor-based investing.

## + **What We Can Deliver**

Our investment strategies are available primarily as ETFs which can provide intra-day liquidity, transparency, and tax efficiency.

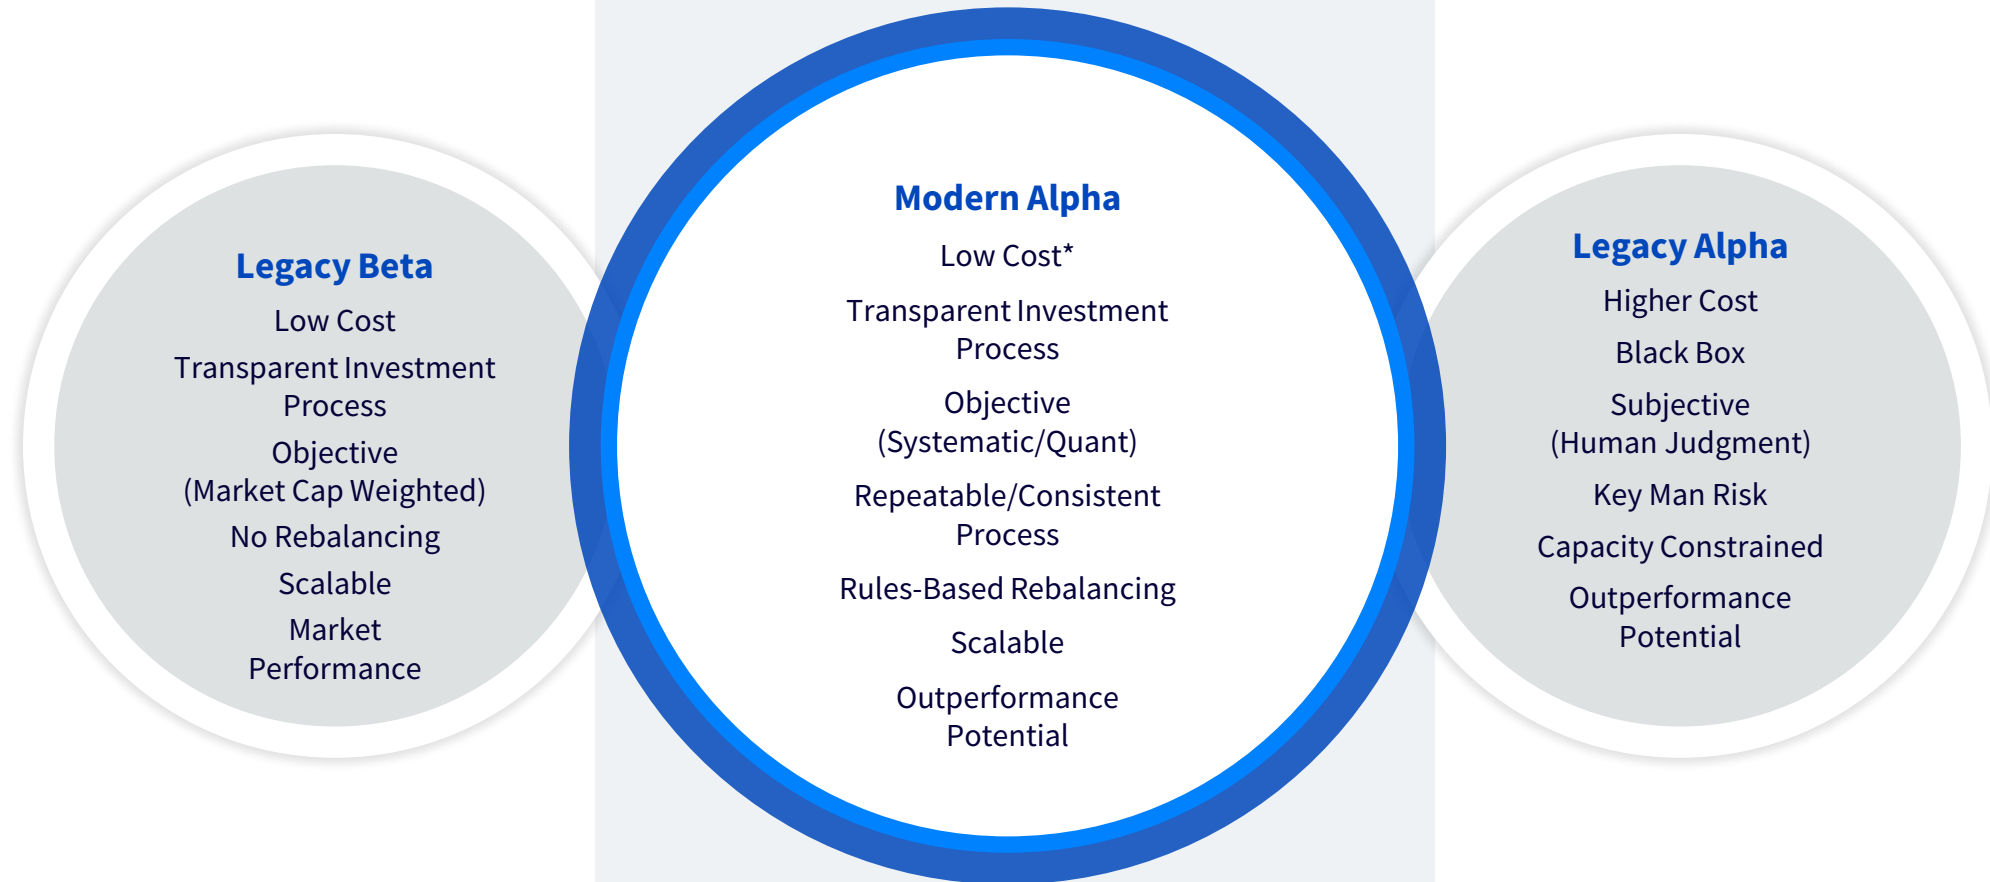

\*As of March 31, 2026

# WisdomTree Modern Alpha<sup>®</sup>

Modern Alpha combines the outperformance potential of active with the benefits of passive— to offer investors strategies that are built to perform.

\* Ordinary brokerage commissions apply.

# WisdomTree Research Team

Globally integrated research team  
focused on all major asset classes  
including equities, fixed income,  
commodities, and alternatives.

**Professor Jeremy Siegel, PhD**

Senior Economist to WisdomTree  
and Emeritus Professor of Finance,  
The Wharton School of the  
University of Pennsylvania

# WisdomTree International MidCap Dividend Fund (DIM)

# Our Philosophy

- ▶ Pricing Errors & Return Premiums Exist
- ▶ Fundamentals Matter
- ▶ The Concept of Relative Value is Important

# Why Dividends for Value?

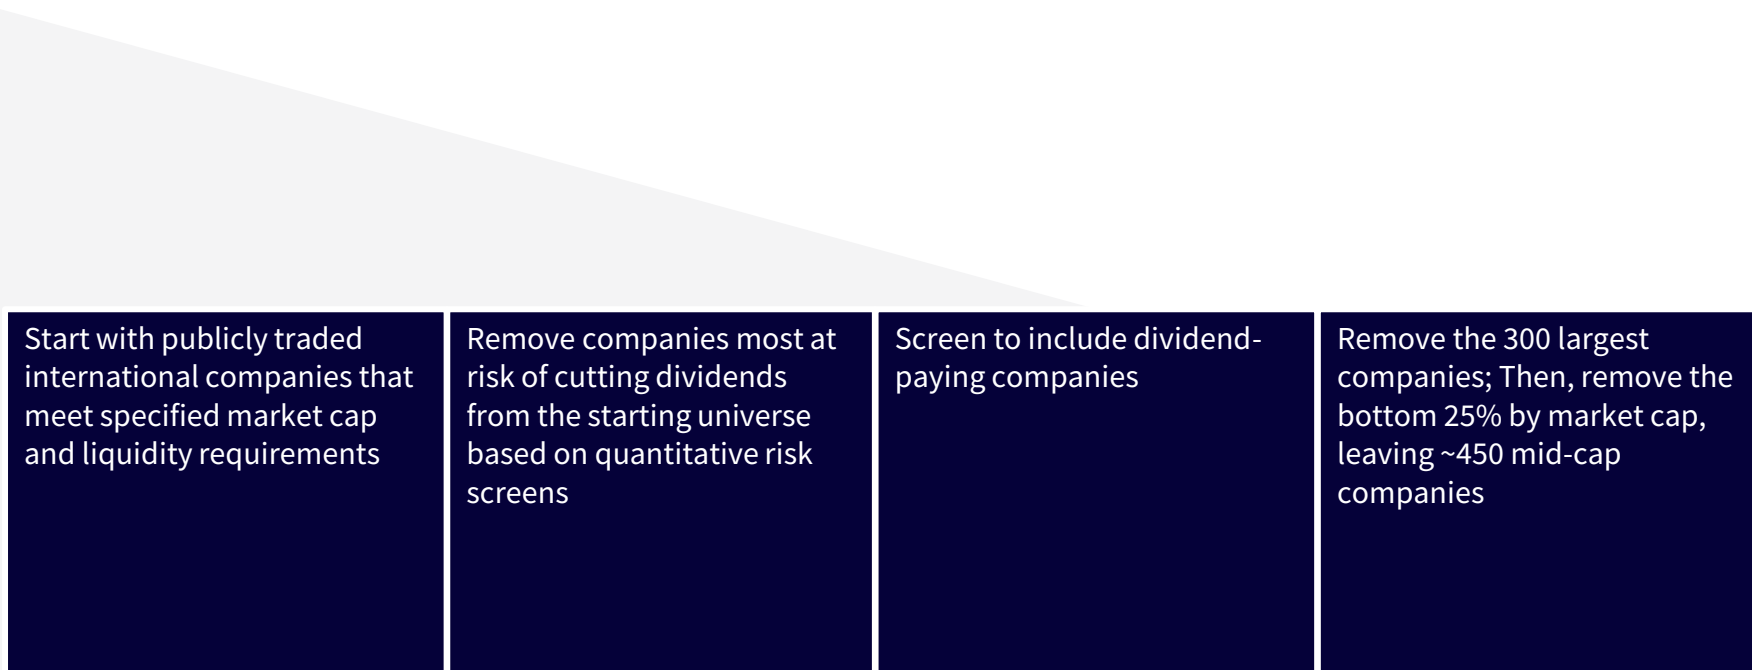

- + Dividends have provided the majority of the stock market's real return over time
- + Dividends can help mitigate downside risk during market bubbles
- + Dividends are an unambiguous objective measure, cannot be restated and can be applied globally

Source: Professor Jeremy Siegel, *The Future for Investors* (2005), source updated for 2025 data. Uses the S&P 500 universe as of 12/31/25. Average annual total returns, 1957–2025. Each stock in S&P 500 is ranked from highest to lowest by dividend yield on December 31 of every year and placed into “quintiles,” baskets of stocks, with 100 stocks in each basket. The stocks in the quintiles are weighted by their market capitalization. Top and bottom quintiles are shown for simplicity. The dividend yield is defined as each stock's annual dividends per share divided by its stock price as of December 31 of that year. p.a.=per annum. **Past performance is not indicative of future results. You cannot invest directly in an index. Index performance does not represent actual fund or portfolio performance. A fund or portfolio may differ significantly from the securities included in the index. Index performance assumes reinvestment of dividends but does not reflect any management fees, transaction costs or other expenses that would be incurred by a portfolio or fund, or brokerage commissions on transactions in fund shares. Such fees, expenses and commissions could reduce returns.**

# Investment Process: International Mid Cap Dividends

The following constraints are applied:

Sectors: 25% weight constraint for all sectors, except for Real Estate, which is constrained at 15% of total weight.

Countries: 25% constraint applied to all countries

Fund Details				
Name	Ticker	Inception Date	Gross Expense Ratio	Net Expense Ratio
WisdomTree International MidCap Dividend Fund	DIM	06/16/2006	0.58%	0.58%

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [wisdomtree.com/investments](http://wisdomtree.com/investments). WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. You cannot invest directly in an index.

# WisdomTree International MidCap Dividend Fund Factor Breakdown

Factor Calculation for July 31, 2006 to February 28, 2026

Name	Mkt-RF (Beta)	SMB (Size)	HML (Value)	RMW (Quality)	CMA (Investment)
WisdomTree International MidCap Dividend Fund	1.04	0.17	0.19	0.15	0.09
MSCI EAFE Mid Cap Index	1.06	0.18	-0.02	0.10	0.05

July 31, 2006 represents the beginning of the first full month of returns since the fund's inception.

**Beta (Mkt-RF)** refers to the sensitivity of each respective index to movements in the broad market.

**Size (SMB)** refers to small-minus-big and is the sensitivity or factor loading to small caps, with higher numbers indicating greater loading to small caps.

**Value (HML)** refers to high-minus-low and is the sensitivity or factor loading to value, specifically the book value-to-market value ratio, with higher meaning more loading toward value.

**Profitability (RMW)** refers to robust-minus-weak and is the sensitivity or factor loading to operating profitability.

**Investment (CMA)** premium associated with investing in companies that grow assets conservatively vs. those that grow them aggressively; a higher loading suggests a positive sensitivity with this premium, while a negative loading suggests the opposite.

**You cannot invest directly in an index. Past performance is not indicative of future results.**

Data chosen from latest available date.

# Appendix

# Composite Risk Score (CRS)

- + **The Composite Risk Score uses Quality and Momentum scores to identify the riskiest companies**
- + **This aims to remove or limit the impact of such companies in indexes**

<p><b>Quality*</b></p>  <p><b>50%</b></p>	<p><b>Static:</b></p> <ul style="list-style-type: none"><li>+ Last Return on Equity (ROE)</li><li>+ Last Return on Assets (ROA)</li><li>+ Last Gross Profits over Assets (GPOA)</li><li>+ Last Cash Flows over Assets (CFOA)</li></ul> <p><b>Dynamic:</b></p> <ul style="list-style-type: none"><li>+ ROE Trend</li><li>+ ROA Trend</li><li>+ GPOA Trend</li><li>+ CFOA Trend</li></ul>	<p><b>Better quality stocks have tended to outperform</b></p> <p>Selecting stocks based on the last but also trailing 3-year ROE and ROA readings rewards companies that currently have good but also improving quality attributes inside each of the industry groups.</p>
<p><b>Momentum</b></p>  <p><b>50%</b></p>	<ul style="list-style-type: none"><li>+ Average of Risk-adjusted total returns for the last 6m and last 12m</li><li>+ Risk-adjusted total returns = Historical Return divided by Volatility</li></ul>	<p><b>Momentum has tended to outperform</b></p> <p>6-month and 12-month returns help capture medium- to long-term price trends. Adjusting returns for volatility avoids tilting towards stocks with high return but also high volatility.</p>

\*Quality score is an equal weight of the 8 scores (6 data points (3 and 3) are needed per stocks to be included). Data is normalized with a cross sectorial Z Score in each industry groups. Trends are calculated as a 12 quarters historical Z Score in each industry groups.

# The Composite Risk Score: Filtering Out the Riskiest Dividend Payers and Rewarding Higher Quality Companies

High Quality  
High Momentum

Low Quality  
Low Momentum

High Quality  
High Momentum

Low Quality  
Low Momentum

- + The Composite Risk Score (CRS) is used to **create a list of riskier stocks**
- + All stocks (dividend payers or not) are ranked across 6 distinct universes → 3 regions (US, Developed International, and Emerging Markets) separated between large-/mid-cap and small-caps
- + In each universe:
  - + The stocks in the **bottom 10% of stocks ranked by CRS** are excluded
  - + The stocks in the **Top 5% by dividend yield and bottom half by CRS** are also excluded
- + CRS is also used to **create a list of “Good Stocks”, which is the 2 top deciles**
  - + In all strategies (except Quality Dividend Growth), **the good stocks are overweighted, the \$ dividend stream of those stocks is increased by 50%** to increase their weight

# Important Information

Please see the [WisdomTree Glossary](#) for definitions of terms and indexes.

**This information must be preceded or accompanied by a prospectus. Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. This and other information can be obtained in the Fund's prospectus or, if available, the summary prospectus by visiting [wisdomtree.com/investments](http://wisdomtree.com/investments). Read the prospectus or, if available, the summary prospectus carefully before you invest.**

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is likely to be impacted by the events or conditions affecting that country or region. The Fund invests primarily in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion. Dividends are not guaranteed, and a company currently paying dividends may cease paying dividends at any time. This may result in greater share price volatility. The Fund invests in the securities included in, or representative of, its Index. The Index may not perform as intended. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

**MSCI:** Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any such data.
