Dividends in Inflationary Environment

10-Year U.S. TIPS Yields

+ TIPS are typically used by investors as an inflation-hedge for fixed-income allocations

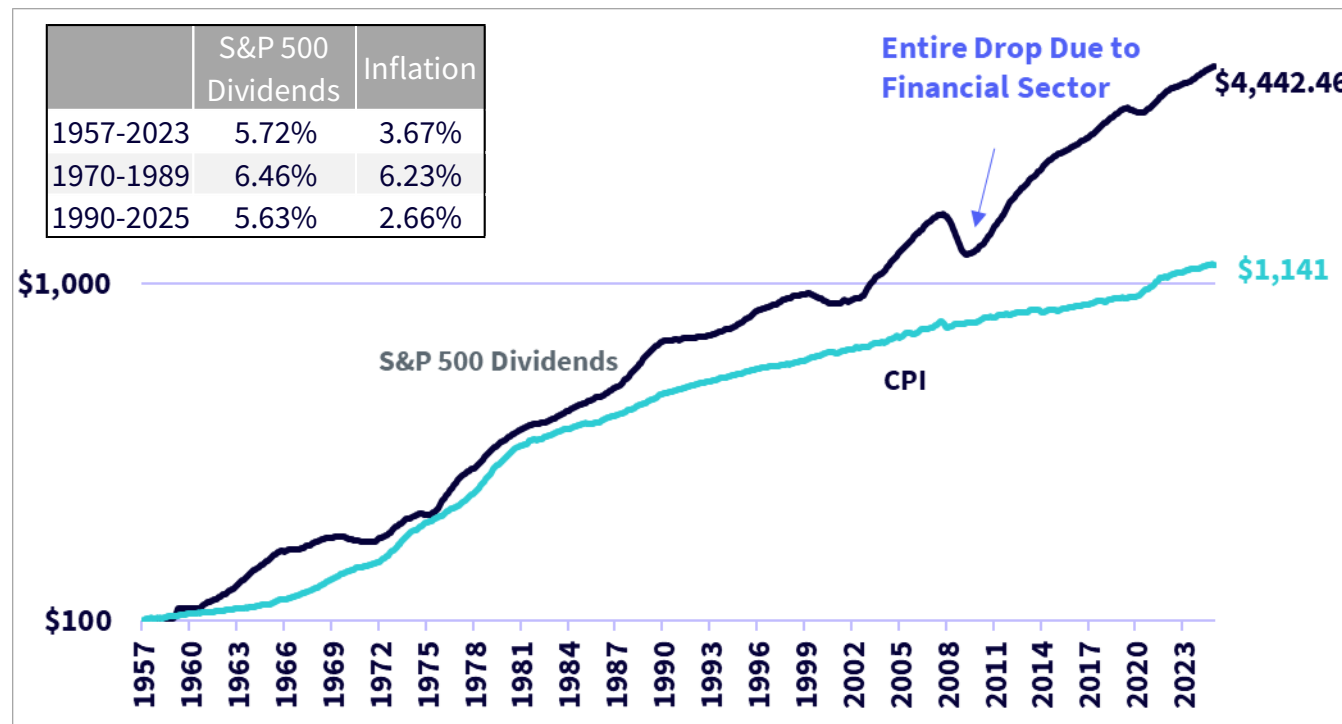

Source: Bloomberg, FRED. Past performance is not indicative of future results. Treasury inflation-protected securities (TIPS), issued by the U.S. government, are Treasury securities indexed to inflation whose principal value is periodically adjusted according to the rate of inflation. Repayment upon maturity of the adjusted principal value of TIPS is guaranteed by the U.S. government. TIPS decline in value when real interest rates rise.

Dividends Have Steadily Outgrown Inflation

- + Since 1957, dividends have grown by an average of 5.7% per year—more than 2% above the rate of inflation (represented as CPI in the chart below)
- + That characteristic is why Professor Jeremy Siegel refers to stocks as “Super TIPS”—stocks can provide long-term inflation protection, but with real growth to boot
- + This was true during high inflation periods (the '70s and '80s), when inflation averaged more than 6%. It’s also been true during low-inflation periods, such as the last three decades

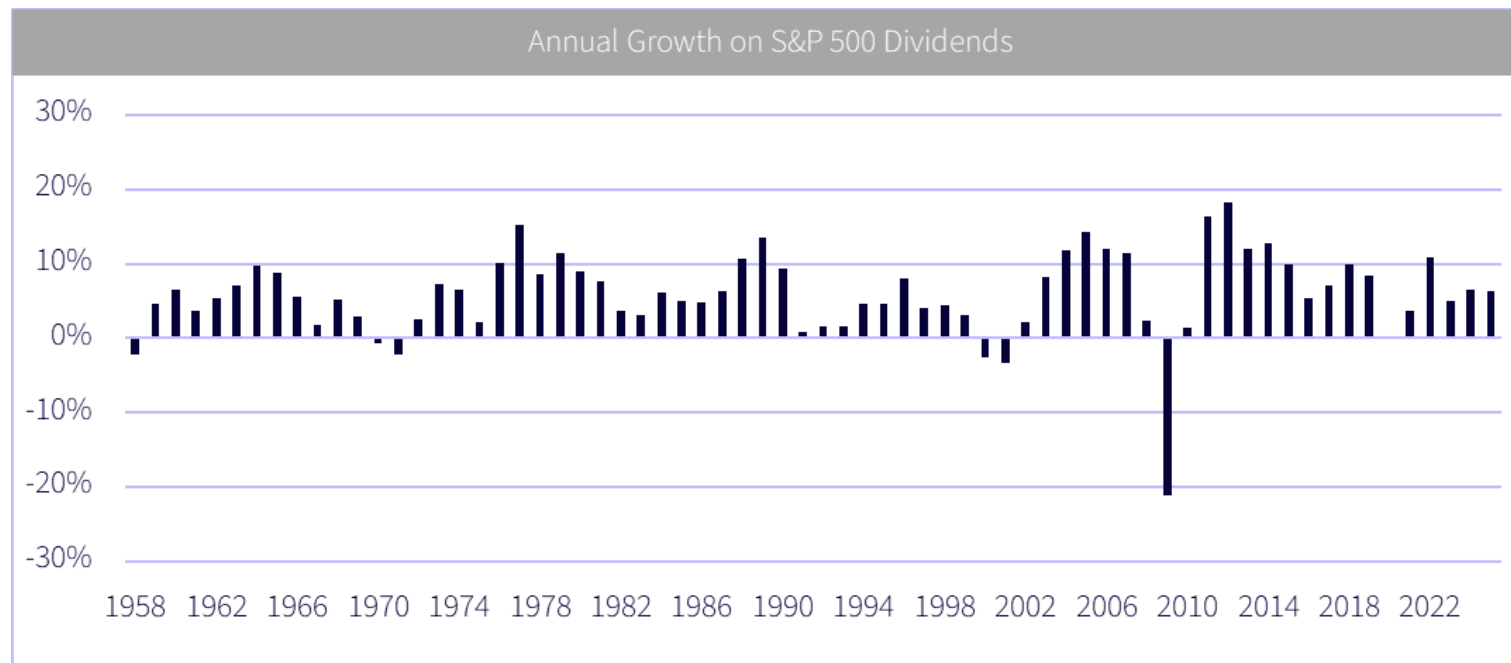

Source: Bob Shiller, <http://www.econ.yale.edu/~shiller/data.htm>. Data from 12/31/1957 to 12/31/2025. CPI: Consumer Price Index. Past performance is not indicative of futures results. You cannot invest directly in an index.

Dividends are Much Less Volatile than Stock Prices

- + In the last 68 years, there were only six years where dividend levels declined, and only one where they fell more than 5%
- + By contrast, during those same 68 years, stock prices fell in 18 years, with a worst calendar-year decline of over 40% and an average decline of more than 11%
- + Stock prices were over two times more volatile than their underlying dividend cash flows, as sentiment drives short-term prices more than the cash flow volatility, which drives long-term value¹

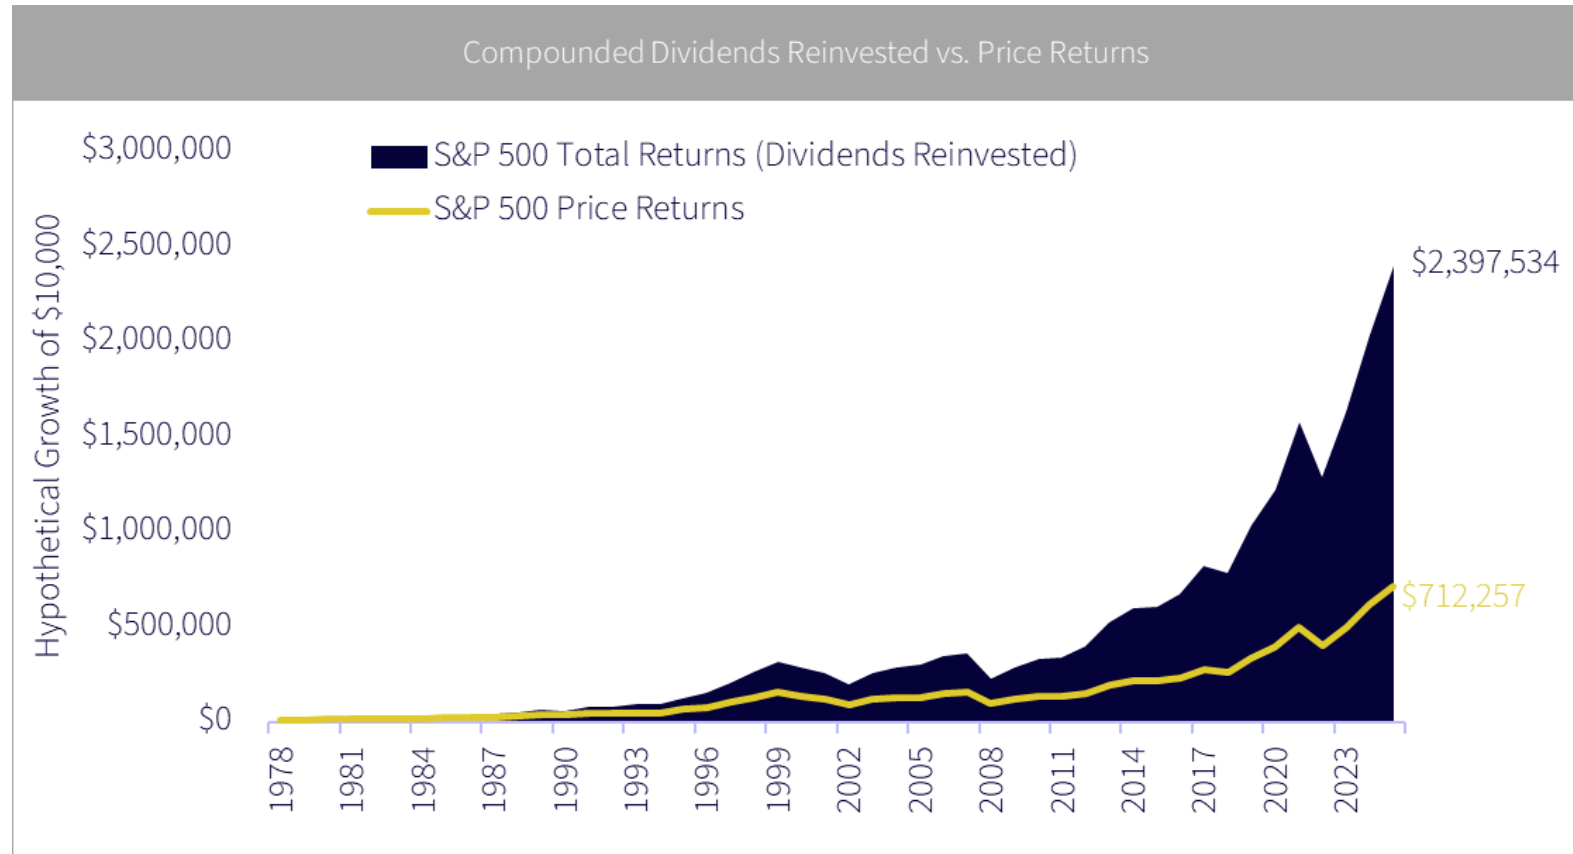

Source: Bob Shiller, <http://www.econ.yale.edu/~shiller/data.htm>. Data from 12/31/1957 to 12/31/2025. Past performance is not indicative of futures results. You cannot invest directly in an index. 1 Based on the standard deviation of annual dividend changes and price changes on the S&P 500.

Dividends Have a Significant Impact on Long-Run Stock Returns

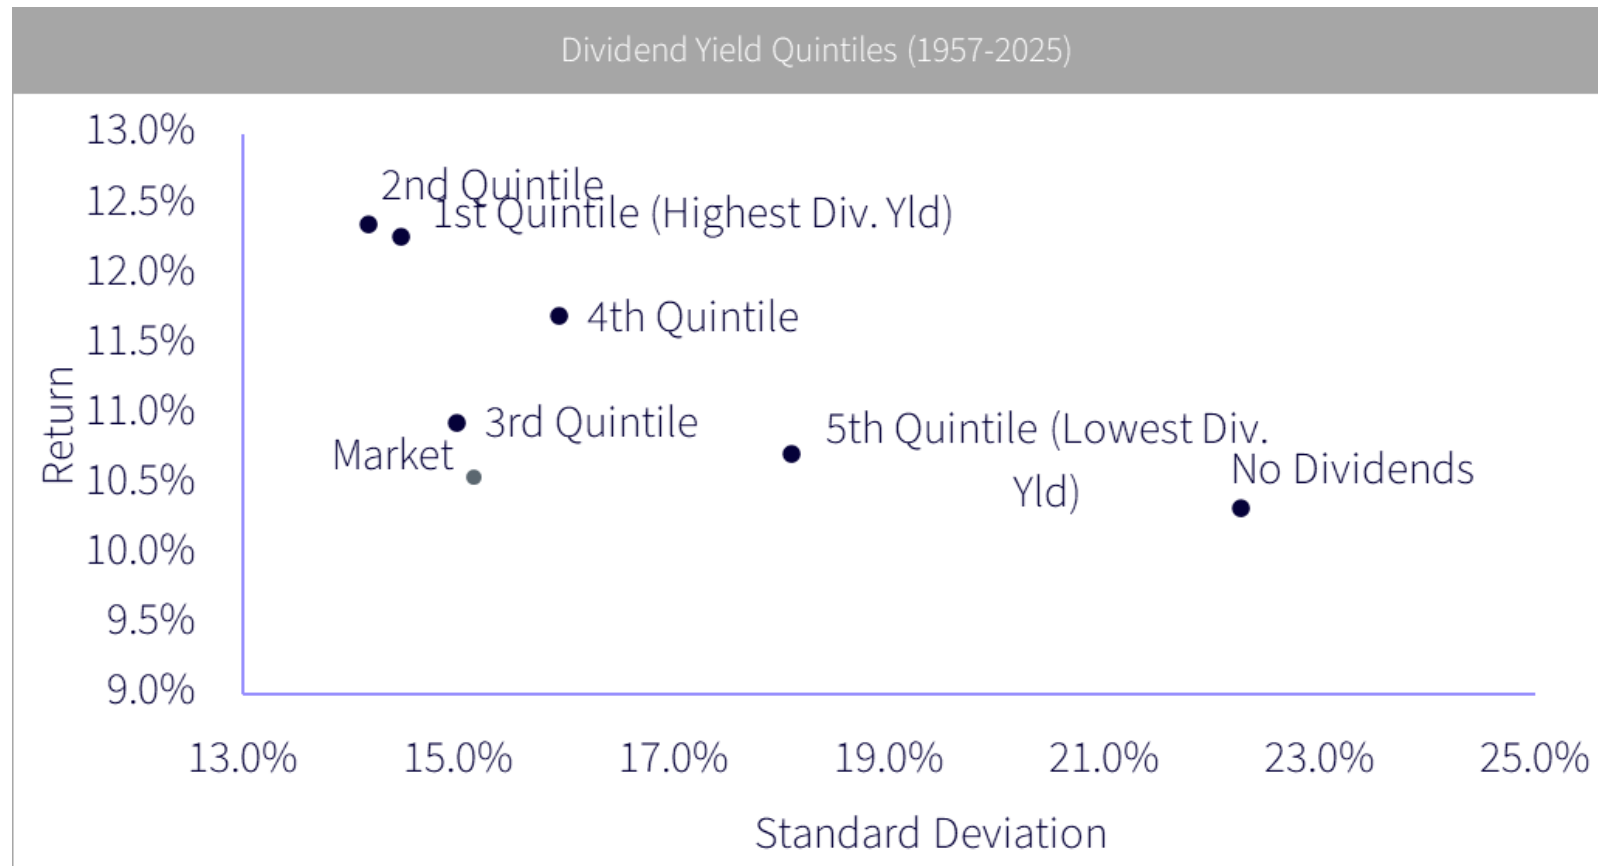

- + Since 1978, dividends and reinvested dividends have contributed 70% of the U.S. stock market's return, helping a \$10,000 investment grow to over \$2.0 million

Source: WisdomTree, Zephyr StyleAdvisor, 12/31/1978-12/31/2025. Past performance is not indicative of future results. You cannot invest directly in an index.

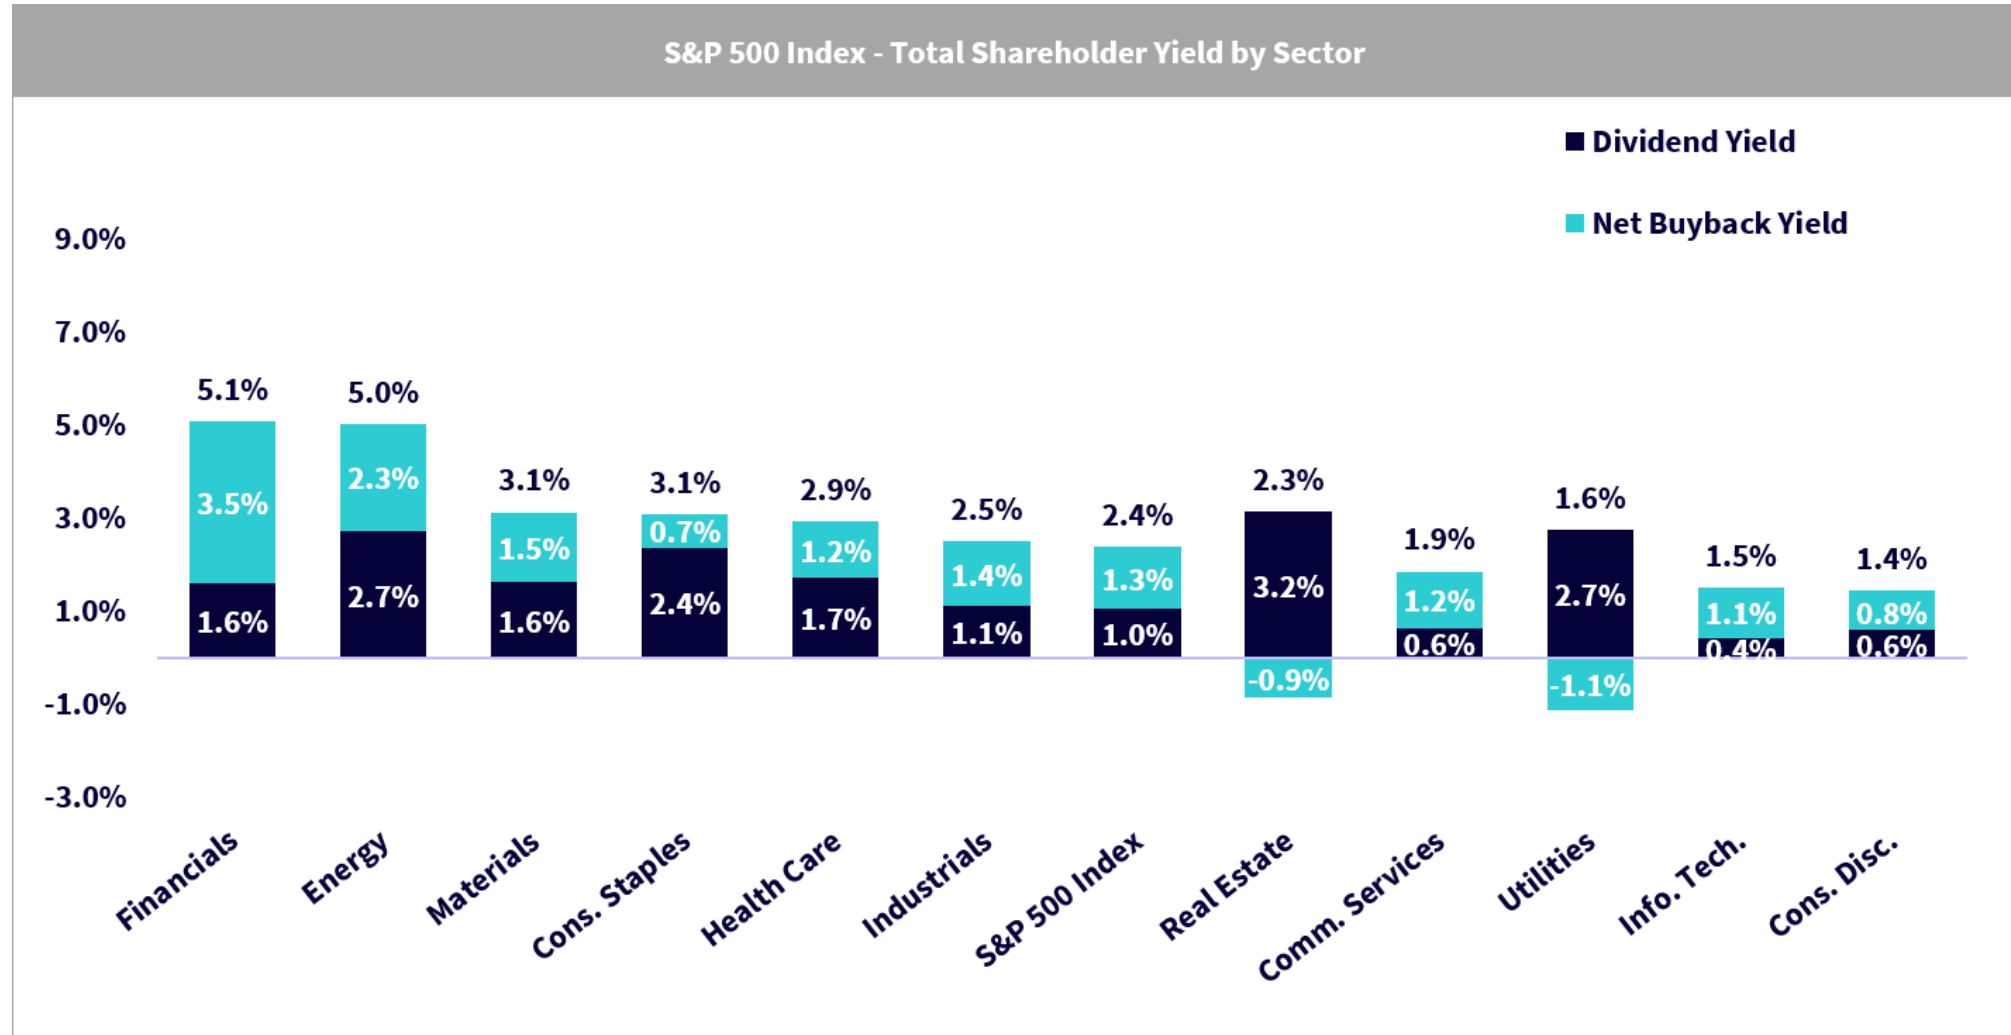

Fama-French Research on Dividend Yield Quintiles

- + Each of the first four Dividend Yield Quintiles outperformed the market, with the No Dividends portfolio a clear underperformer
- + 2nd Quintile had the best Sharpe Ratio, with the 1st Quintile the next best

Source: Fama-French Data Library, 12/31/1957-12/31/2025.

Income—Both Dividends and Buybacks—Can Be Found Across Sectors

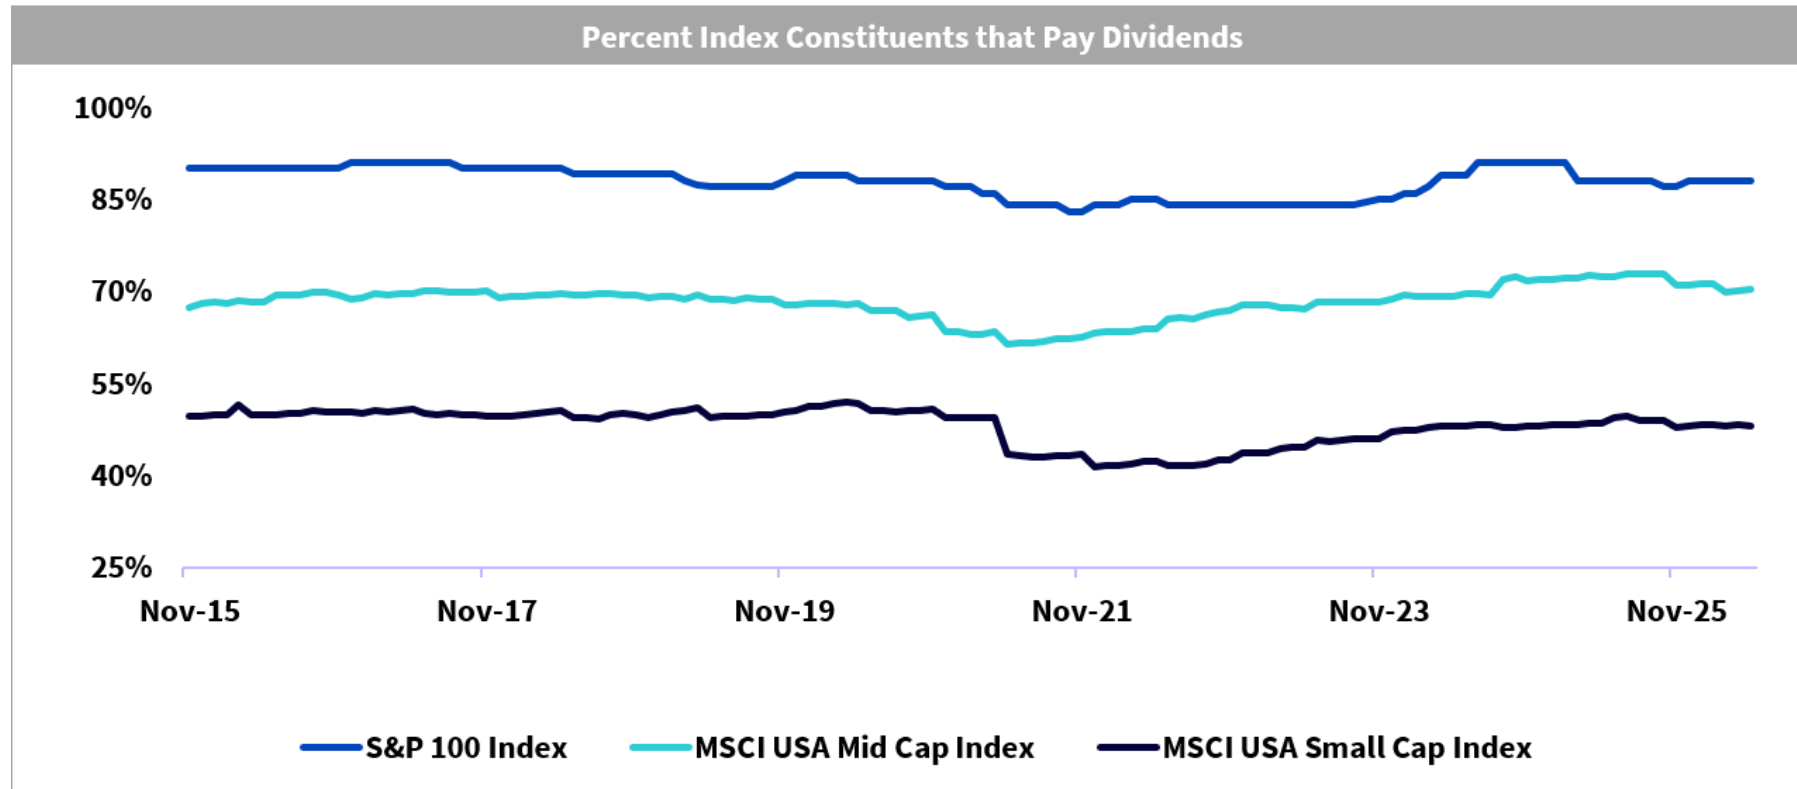

Source: WisdomTree, FactSet, as of 5/29/2026. Past performance is not indicative of future results. You cannot invest directly in an index.

Dividends More Prevalent Among Larger Companies, but Not Limited to Large-Caps

- + About 80% of the S&P 100 paid dividends
- + About 70% of companies in the MSCI USA Mid Cap Index and about 50% of companies in the MSCI USA Small Cap Index pay dividends

Sources: WisdomTree, FactSet, 12/31/1994–5/29/2026. Past performance is not indicative of future results. You cannot invest directly in an index.

Global and Emerging Dividend Index Trailing 12-Month Dividend Yields

Source: WisdomTree, FactSet. Data as of 5/29/2026. You cannot invest directly in an index.

Dividend yield: A financial ratio that shows how much a company pays out in dividends each year relative to its share price.

Value: Characterized by lower price levels relative to fundamentals, such as earnings or dividends. Prices are lower because investors are less certain of the performance of these fundamentals in the future. This term is also related to the Value Factor, which associates these stock characteristics with excess returns vs the market over time.

Dividend growth: The growth in trailing 12-month dividends for the specified universe.

Small-Capitalization (Small-Caps): new or relatively young companies that typically have a market capitalization between \$200 million to \$2 billion.

Volatility: A measure of the dispersion of actual returns around a particular average level.

Quality: Characterized by higher efficiency and profitability. Typical measures include earnings, return on equity, return on assets, operating profitability as well as others.

Momentum: Characterized by assets with recent price increase trends over time. This term is also associated with the Momentum Factor which associates these stock characteristics with excess return vs the market over time.

Growth: Characterized by higher price levels relative to fundamentals, such as dividends or earnings. Price levels are higher because investors are willing to pay more due to their expectations of future improvements in these fundamentals.

Inflation: Characterized by rising price levels.

TIPS: Treasury Inflation Protected Securities.

Treasury: Debt obligation issued by the U.S. government with payments of principal and interest backed by the full faith and credit of the U.S. government.

Cash flows: a measure of how much cash a business generates after taking into account all the necessary expenses, including net capital expenditures.

Sharpe ratio: Measure of risk-adjusted return. Higher values indicate greater return per unit of risk, specifically standard deviation, which is viewed as being desirable.

Buyback: When a company uses its own cash to purchase its own outstanding shares; may positively impact the share price.

Large-Capitalization (Large-Cap): A term used by the investment community to refer to companies with a market capitalization value of more than \$10 billion. Large cap is an abbreviation of the term “large market capitalization”. Market capitalization is calculated by multiplying the number of a company’s shares outstanding by its stock price per share.

Market Capitalization: Market cap = share prices x number of shares outstanding. Firms with the highest values receive the highest weights in approaches designed to weight firms by market cap.

- MSCI AC World ex-US Index:** Measures the performance of companies incorporated in both emerging markets and developed markets, excluding the United States. Index weighting is by market cap.
- MSCI All Country World Index:** A broad global equity benchmark that represents large and mid-cap equity performance across 23 developed and emerging market countries.
- MSCI EAFE IMI Index:** A free float adjusted market cap-weighted index composed of companies representative of the developed market structure of developed countries in Europe, Australasia and Japan, covering the large-cap, mid-cap and small-cap segments of the capitalization spectrum.
- MSCI EAFE Index:** A market cap-weighted index composed of companies representative of the developed market structure of developed countries in Europe, Australasia and Japan.
- MSCI EAFE Mid Cap Index:** A free float-adjusted market capitalization equity index that captures mid-cap representation across developed market countries around the world, excluding the U.S. and Canada.
- MSCI EAFE Mid Cap Value Index:** A free float-adjusted market capitalization-weighted equity index that captures mid-cap representation across developed markets around the world, excluding the U.S. and Canada, focusing on those with higher book value-to-market value ratios.
- MSCI EAFE Small Cap Index:** A free float-adjusted market capitalization equity index that captures small-cap representation across developed market countries around the world, excluding the U.S. and Canada.
- MSCI EAFE Small Cap Value Index:** A free float-adjusted market capitalization-weighted equity index that captures small-cap representation across developed market countries around the world, excluding the U.S. and Canada, focusing on those with higher book value-to-market value ratios.
- MSCI EAFE Value Index:** A market capitalization-weighted subset of stocks within the MSCI EAFE Index that have lower share prices relative to their earnings or dividends per share.
- MSCI Emerging Markets IMI Index:** Captures large, mid and small cap representation across 25 Emerging Markets countries*. With 3,206 constituents, the index covers approximately 99% of the free float-adjusted market capitalization in each country.
- MSCI Emerging Markets Index:** A broad market cap-weighted Index showing performance of equities across 23 emerging market countries defined as “emerging markets” by MSCI.
- MSCI Emerging Markets Small Cap Index:** Includes small cap representation across 21 Emerging Markets countries. The small cap segment tends to capture more local economic and sector characteristics relative to larger Emerging Markets capitalization segments.
- MSCI Emerging Markets Value Index:** A market capitalization-weighted subset of stocks in the MSCI Emerging Markets Index that have lower share prices relative to their earnings per share, dividends per share, or lower prices relative to other financial metrics.
- MSCI USA IMI Index:** An all-cap market-capitalization weighted Index of US companies with an emphasis on index liquidity, investability and replicability.
- MSCI USA Minimum Volatility Index:** Aims to reflect the performance characteristics of a minimum variance strategy applied to the large and mid cap USA equity universe.
- MSCI USA Momentum Index:** Designed to reflect the performance of an equity momentum strategy by emphasizing stocks with high price momentum, while maintaining reasonably high trading liquidity, investment capacity and moderate index turnover.

MSCI USA Sector Neutral Quality Index: Refers to the MSCI USA Quality Index which is a large and mid cap US equity index aiming to capture the performance of quality growth stock. The Index screens its parent index, the MSCI USA Index for ROE, stable year-over-year earnings growth, and low financial leverage. Seeks to match the sector exposures the MSCI USA Index.

NASDAQ US Dividend Achievers Select Index: Designed to track the performance of dividend-paying companies in the U.S. that have increased their annual dividend payments for the last 10 or more consecutive years.

Russell 1000 Growth Index: A measure of the large-cap growth segment of the U.S. equity universe, selecting from the Russell 1000 Index.

Russell 1000 Index: A measure of the performance of the 1,000 largest companies by market capitalization in the Russell 3000 Index.

Russell 1000 Value Index: A measure of the large-cap value segment of the U.S. equity universe, selecting from the Russell 1000 Index.

Russell 2000 Index: Measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership.

Russell 2000 Value Index: Measures the performance of small-cap value segment of the U.S. equity universe. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth values.

Russell 3000 Index: Measures the performance of the 3,000 largest U.S. companies based on total market capitalization.

Russell 3000 Value Index: Measures the performance of the Russell 3000 Index constituents with value characteristics.

Russell Midcap Index: Measures the performance of the mid-cap segment of the U.S. equity universe. The Russell Midcap is a subset of the Russell 1000 Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership.

Russell MidCap Value Index: Measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap Index companies with lower price-to-book ratios and lower forecasted growth values.

Russell Top 200 Index: Measures the performance of the 200 largest companies in the Russell 1000 index.

S&P 500 Index: A market capitalization-weighted benchmark of 500 stocks selected by the Standard and Poor's Index Committee designed to represent the performance of the leading industries in the United States economy.

WisdomTree U.S. Dividend Index: A fundamentally-weighted index that defines the dividend-paying portion of the U.S. equity market. The Index measures the performance of U.S. companies, listed on a U.S. stock exchange, that pay regular cash dividends and meet other liquidity and capitalization requirements established by WisdomTree.

WisdomTree U.S. LargeCap Dividend Index: A fundamentally weighted index that measures the performance of the large-capitalization segment of the U.S. dividend-paying market. The Index is comprised of the 300 largest companies ranked by market capitalization from the WisdomTree U.S. Dividend Index. The index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share.

WisdomTree U.S. MidCap Dividend Index: A fundamentally weighted index that measures the performance of the mid-capitalization segment of the US dividend-paying market. The Index is comprised of the companies that compose the top 75% of the market capitalization of the WisdomTree U.S. Dividend Index after the 300 largest companies have been removed.

WisdomTree U.S. SmallCap Dividend Index: A fundamentally weighted index measuring the performance of the small-capitalization segment of the US dividend-paying market. The Index is comprised of the companies that compose the bottom 25% of the market capitalization of the WisdomTree U.S. Dividend Index after the 300 largest companies have been removed.

WisdomTree U.S. Quality Dividend Growth Index: A fundamentally weighted index that consists of dividend-paying stocks with growth characteristics. The primary starting screening universe for this index is the constituents of the WisdomTree U.S. Dividend Index with market capitalization of at least \$2 billion. The Index is comprised of the 300 companies in the WisdomTree U.S. Dividend Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share.

WisdomTree U.S. SmallCap Quality Dividend Growth Index: A fundamentally weighted index that consists of the small-capitalization segment of dividend-paying stocks with growth characteristics. The primary starting screening universe for this index is the constituents of the WisdomTree U.S. SmallCap Dividend Index, or the bottom 25% of the market capitalization of the WisdomTree U.S. Dividend Index after the 300 largest companies have been removed. From this primary universe, the Index is comprised of the top 50% of companies with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share.

WisdomTree U.S. High Dividend Index: A fundamentally weighted index that measures the performance of companies with high dividend yields selected from the WisdomTree U.S. Dividend Index. The index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share and adjusted for a company's composite risk score. Composite risk score is an average of three factors: value, quality and momentum. Companies that score favorably on the composite risk score will have an increase in weights and companies that rank poorly will have a reduction in weights.

WisdomTree Global High Dividend Index: A fundamentally weighted index that measures the performance of high-dividend-yielding companies selected from the WisdomTree Global Dividend Index, which measures the performance of dividend-paying companies in the U.S., developed and emerging markets. At the index measurement date, companies with market capitalizations of at least \$2 billion are ranked by dividend yield, and those companies in the top 30% by dividend yield within each region are selected for inclusion.

WisdomTree Global ex-U.S. Dividend Growth Index: Designed to measure the performance of dividend-paying companies outside the United States with what WisdomTree believes to be potential for future dividend increases. Weighting is by dividend stream.

WisdomTree International Equity Index: A fundamentally weighted index that measures the performance of dividend-paying companies in the industrialized world, excluding Canada and the United States, that pay regular cash dividends and that meet other liquidity and capitalization requirements. It comprises companies incorporated in 15 developed European countries, Japan, Australia, New Zealand, Hong Kong and Singapore. Companies are weighted in the Index based on annual cash dividends paid.

WisdomTree International LargeCap Dividend Index: A fundamentally weighted index that measures the performance of the large-capitalization segment of the dividend-paying market in the industrialized world outside the U.S. and Canada. The Index comprises the 300 largest companies ranked by market capitalization from the WisdomTree DEFA Index. Companies are weighted in the Index based on annual cash dividends paid.

WisdomTree International MidCap Dividend Index: A fundamentally weighted index that measures the performance of the mid-capitalization segment of the US dividend-paying market. The Index is comprised of the companies that compose the top 75% of the market capitalization of the WisdomTree Dividend Index after the 300 largest companies have been removed. The index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share.

WisdomTree International SmallCap Dividend Index: A fundamentally weighted index measuring the performance of the small-capitalization segment of the US dividend-paying market. The Index is comprised of the companies that compose the bottom 25% of the market capitalization of the WisdomTree Dividend Index after the 300 largest companies have been removed. The index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share.

WisdomTree International High Dividend Index: A fundamentally weighted Index that measures the performance of companies with high dividend yields selected from the WisdomTree International Equity Index. At the index measurement date, companies within the WisdomTree International Equity Index with market capitalizations of at least \$200 million and average daily trading volumes of at least \$200,000 for the prior three months are ranked by dividend yield. Securities ranking in the highest 30% by dividend yield are selected for inclusion. Companies are weighted in the Index based on annual cash dividends paid.

WisdomTree International Quality Dividend Growth Index: A fundamentally weighted Index designed to provide exposure to dividend paying developed market companies. The Index is comprised of the top 300 companies from the WisdomTree International Equity Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets.

WisdomTree Emerging Markets High Dividend Index: A fundamentally weighted index that measures the performance of the highest dividend yielding stocks selected from the WisdomTree Emerging Markets Dividend Index. At the index measurement date, companies within the WisdomTree Emerging Markets Dividend Index are ranked by dividend yield. Securities ranking in the highest 30% by dividend yield are selected for inclusion. Companies are weighted in the Index based on annual cash dividends paid.

WisdomTree Emerging Markets SmallCap Dividend Index: A fundamentally weighted index that measures the performance of primarily small cap stocks selected from the WisdomTree Emerging Markets Dividend Index. Companies included in the Index fall within the bottom 10% of total market capitalization of the WisdomTree Emerging Markets Dividend Index as of the annual index measurement date. Companies are weighted in the Index based on annual cash dividends paid.

Important Information

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. For a prospectus or, if available, the summary prospectus containing this and other important information about the fund, call 866.909.9473 or visit WisdomTree.com/investments. Read the prospectus or, if available, the summary prospectus carefully before investing.

There are risks associated with investing, including possible loss of principal. Funds focusing their investments on certain sectors and/or smaller companies increase their vulnerability to any single economic or regulatory development. This may result in greater share price volatility. Please read the Fund's prospectus for specific details regarding the Fund's risk profile. Dividends are not guaranteed and a company's future abilities to pay dividends may be limited. A company currently paying dividends may cease paying dividends at any time.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc.
