

**Fund Overview**

The WisdomTree U.S. Corporate Bond Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Quality Corporate Bond Index.

**Why QIG?**

- Gain core exposure to U.S. investment grade corporate debt
- Use as a complement or substitute for existing investment grade bond exposures
- Use as an alternative to market capitalization-weighted or actively-managed strategies

**All Data As of 03/31/2026**

**Fund Information**

Ticker Symbol	QIG
Inception Date	04/27/2016
Gross Expense Ratio	0.18%
Net Expense Ratio	0.18%
CUSIP	97717X198
Stock Exchange	Cboe
Net Assets (\$mm)	\$17.72
Number of Security Holdings	489
Effective Duration	6.31

**Performance**

**Average Annual Total Returns as of 03/31/2026**

Name	QTR	YTD	1-Year	3-Year	5-Year	10-Year	Since Fund Inception
QIG NAV Returns	-0.47%	-0.47%	4.79%	4.71%	0.83%	N/A	2.42%
QIG Market Price Returns	-0.41%	-0.41%	4.91%	4.71%	0.84%	N/A	2.42%
WisdomTree U.S. Quality Corporate Bond Index	-0.56%	-0.56%	4.91%	4.99%	1.08%	N/A	2.73%

Bloomberg U.S. Aggregate Bond Index	-0.05%	-0.05%	4.35%	3.63%	0.31%	N/A	1.70%

Performance of less than one year is cumulative. You cannot invest directly in an index.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [wisdomtree.com/investments](http://wisdomtree.com/investments).**

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

**Yields**

Yield To Maturity	5.18%
Embedded Income Yield	5.18%
SEC 30 Day Yield	4.94%
SEC 30 Day Yield Unsubsidized	4.94%
Distribution Yield	5.42%

**Time To Maturity**

Fund Maturity Structure	Weight
0-2 Years	12.36%
2-3 Years	6.96%
3-5 Years	19.06%
5-10 Years	29.24%
10 Years +	32.38%

There are risks associated with investing, including possible loss of principal. Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. While the Fund attempts to limit credit and counterparty exposure, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

The ICE BofA Merrill Lynch U.S. Corporate Index tracks the performance of U.S. dollar denominated investment grade corporate debt securities issued in the U.S.

The Bloomberg U.S. Aggregate Bond Index measures the performance of the U.S. investment-grade bond market.

The WisdomTree U.S. Quality Corporate Bond Index is a rule-based alternatively weighted Index designed to capture the performance of selected issuers in the U.S. investment-grade corporate bond market that are deemed to have attractive fundamental and income characteristics. The Index employs a multi-step process, which screens on fundamentals to identify bonds with favorable characteristics and then tilts to those which offer attractive income characteristics. The Index is comprised of US corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, debt securities must have fixed coupons with at least \$350 million in par amount outstanding and a remaining maturity of at least one year. Component securities must be rated investment grade.

**Credit ratings** apply to the underlying holdings of the Fund, not to the Fund itself. Standard & Poor's and Moody's study the financial condition of an entity to ascertain its creditworthiness. The credit ratings reflect the rating agency's opinion of the holdings' financial condition and histories. The ratings displayed are based on the highest of each portfolio constituent as currently rated by Standard & Poor's and Moody's. Long-term ratings are generally measured on a scale ranging from AAA (highest) to D (lowest), while short-term ratings are generally measured on a scale ranging from A-1 to C.

**Effective Duration** is a measure of the sensitivity of the Fund's price to changes in interest rate changes and is calculated as the weighted average of the individual bond durations. For each bond, it also addresses that interest rate changes can alter expected bond future cash flows through embedded options. The calculation is also expanded to incorporate the contribution of derivatives to the overall interest rate risk sensitivity to the portfolio.

**Embedded Income Yield:**The annualized rate of return generated by a Fund's investment in both fixed income securities and derivatives exclusive of interest rate changes and movement in foreign exchange spot rates. The calculation is intended to capture the Fund's potential to earn income return over the following year given current holdings and market conditions. The embedded income yield will differ from the portfolio's yield to maturity, due to the incorporation of derivatives in the embedded income yield. Embedded income yield and portfolio yield to maturity may differ from a Funds actual distribution and SEC yield and do not reflect Fund expenses.

**Fund Distribution Yield:**is calculated by annualizing the most recent Fund distribution and dividing by the Fund's current NAV. The yield represents a single distribution from the Fund and does not represent the total returns of the Fund.

**SEC 30-Day Yield:**reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses. This is also referred to as the "standardized yield." **Unsubsidized SEC-30 day yield** does not reflect fee waivers in effect.

**Yield To Maturity:** Portfolio Yield to Maturity represents the weighted average yield to maturity of a Fund's investments in money market securities and short-term fixed income securities as of a specified date. Yield to maturity is the rate of return generated on a fixed income instrument assuming interest payments and capital gains or losses as if the instrument is held to maturity. The weighted average yield is calculated based on the market value of each fixed-income investment. The calculation does not incorporate yield from any currency forward contracts that might be part of the Fund's investments.

**Effective Duration** is a statistic provides a measure of the sensitivity of the Fund's price to changes in interest rates and is calculated as the weighted average of the individual bond effective durations. Effective duration recognizes that changes in interest rates may also change the expected cash flows generated by any underlying bonds with embedded options. The calculation is expanded to incorporate the contribution of derivatives to the overall interest rate risk sensitivity to the portfolio.
