WisdomTree International Hedged Quality Dividend Growth Fund (IHDG)

Our Philosophy

- ▶ Pricing Errors & Return Premiums Exist
- ▶ Fundamentals Matter
- ▶ The Concept of Relative Value is Important

Why We Focus on Quality

- + Higher operating profitability (i.e., higher quality) has outpaced lower quality over time.
- + A quality factor is designed to ensure companies in the portfolio are healthy and can deliver results over time.
- + Our proprietary methodology identifies forward-looking dividend growth potential as a way of defining quality.

Historically, Investing in Higher-Quality Companies Enhanced Returns

Source: Kenneth French Data Library, with data as of 12/31/25. Period based on availability of annual operating profitability returns sorted into quintiles, which begins June 30, 1963. Market is the value-weight return of all CRSP firms incorporated in the U.S. and listed on the NYSE, AMEX, or NASDAQ that meet specified criteria. **Past performance is not indicative of future results.**

Why Currency Hedge Developed International?

Exposure to currency (FX) risk can add or detract from developed international returns

- + Over 30+ years, currency risk increased returns 56% of the time
- + For strategic investors, this implies a 44% chance of being wrong and destroying value in any given year

If expected returns from FX are approximately 0%, why bear the risk?

- + Owning developed international unhedged has historically increased volatility vs. hedged strategies
- + Higher interest rates in the U.S. vs. abroad means you receive positive carry by hedging

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 p.m. EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. You cannot invest directly in an index.

Composite Risk Score (CRS)

- + **The Composite Risk Score uses Quality and Momentum scores to identify the riskiest companies**
- + **This aims to remove or limit the impact of such companies in indexes**

<p>Quality*</p>  <p>50%</p>	<p>Static:</p> <ul style="list-style-type: none">+ Last Return on Equity (ROE)+ Last Return on Assets (ROA)+ Last Gross Profits over Assets (GPOA)+ Last Cash Flows over Assets (CFOA) <p>Dynamic:</p> <ul style="list-style-type: none">+ ROE Trend+ ROA Trend+ GPOA Trend+ CFOA Trend	<p>Better quality stocks have tended to outperform</p> <p>Selecting stocks based on the last but also trailing 3-year ROE and ROA readings rewards companies that currently have good but also improving quality attributes inside each of the industry groups.</p>
<p>Momentum</p>  <p>50%</p>	<ul style="list-style-type: none">+ Average of Risk-adjusted total returns for the last 6m and last 12m+ Risk-adjusted total returns = Historical Return divided by Volatility	<p>Momentum has tended to outperform</p> <p>6-month and 12-month returns help capture medium- to long-term price trends. Adjusting returns for volatility avoids tilting towards stocks with high return but also high volatility.</p>

*Quality score is an equal weight of the 8 scores (6 data points (3 and 3) are needed per stocks to be included). Data is normalized with a cross sectorial Z Score in each industry groups. Trends are calculated as a 12 quarters historical Z Score in each industry groups.

Please see the [WisdomTree Glossary](#) for definitions of terms and indexes.

This information must be preceded or accompanied by a prospectus. Investors should carefully consider the investment objectives, risks, charges and expenses of the Funds before investing. This and other information can be obtained in the Fund's prospectus or, if available, the summary prospectus by visiting wisdomtree.com/investments. Read the prospectus or, if available, the summary prospectus carefully before you invest.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is likely to be impacted by the events or conditions affecting that country or region. Dividends are not guaranteed and a company currently paying dividends may cease paying dividends at any time. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As this Fund can have a high concentration in some issuers, the Fund can be adversely impacted by changes affecting those issuers. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit and the Fund does not attempt to outperform its Index. Due to the investment strategy of this Fund it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Dividends are not guaranteed, and a company currently paying dividends may cease paying dividends at any time.
