

WDRN

WisdomTree Physical AI, Humanoids, and Drones Fund

People sometimes think of AI as an abstract concept that lives on our computers, but the reality is that it is rapidly showing up in our "stuff." This is a drone world, a humanoid robot world, a driverless automobile world. We live in a system where AI is enveloping things that we can see and touch, where tangibility matters. When you picture an assembly line robot, or the systems that are making our automobiles get from Point A to Point B, or modern warfare, that's what we target in WDRN.

WDRN Offers the Potential To:

CAPITALIZE

on the technological evolutions that will affect our personal and professional lives

PARTICIPATE

in the evolution of tangible, interactable AI

IMPROVE

on international diversification with leaders and innovators across borders

Why WDRN Now?

- + Obtain physical AI exposure through investments in intelligent machines that can see, interact with, and respond to the physical world.
- + Capture intelligence beyond the NASDAQ with exposure to next-generation logistics, supply chain robotics, and specialized companies across industries such as healthcare and agriculture.
- + Gain pure-play access to a focused portfolio of humanoid robots, drones, autonomous systems, and next-generation factories rather than a broad technology index.

WDRN in a Portfolio:

- + A thematic satellite position within a core equity portfolio
- + Pure-play access to an innovative technology
- + Long-term growth exposure that may still be in early stages

WISDOMTREE MODERN ALPHA™

We don't believe investors should have to choose between cost efficiency and performance potential. Our Modern Alpha strategies combine the outperformance potential of active with all the structural advantages of passive to create ETFs that are built for performance.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. For a prospectus or, if available, the summary prospectus containing this and other important information about the fund, call 866.909.9473 or visit WisdomTree.com/investments. Read the prospectus or, if available, the summary prospectus carefully before investing.

There are risks associated with investing, including potential loss of principal. Companies engaged in Physical AI Activities are subject to unique regulatory, operational and technological risks, such as intense competition and potentially rapid product obsolescence. The regulation of such companies in the United States and other countries is diverse and rapidly evolving, which may inhibit or delay adoption. These companies are also heavily dependent on intellectual property rights and may be adversely affected by loss or impairment of those rights. Companies engaged in Physical AI Activities typically invest significant amounts of spending on research and development, and there is no guarantee that the products or services produced by these companies will be successful. Humanoid robotics companies are sensitive to trends in industrial production, capital-expenditure cycles, supply-chain conditions, and adoption rates of automation technologies across varied sectors including business and industrial end-users.

Humanoid robotics companies may have long and capital-intensive development timelines, highly uncertain paths to profitability and large-scale deployment, and limited product lines, markets, financial resources or personnel. Drone companies may be dependent on the U.S. Government and its agencies for a significant portion of their revenues, and the commercial and military adoption of drone technologies remains subject to extensive and evolving governmental oversight, including aviation safety standards, airworthiness certification requirements, export controls, and national security reviews. A fund that has a portfolio that is concentrated in the securities of issuers in a particular industry or group of related industries, may be adversely affected by the performance of those securities, and more susceptible to adverse economic, market, political, or regulatory occurrences affecting that industry or group of related industries.

Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, foreign securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit and the Fund does not attempt to outperform its Index. The composition of the Index is governed by an Index Committee and the Index may not perform as intended.

Please read the Fund's prospectus for specific details regarding the Fund's risk profile.
