

How do you identify growth stocks?

A few common measures include trailing sales and earnings growth, future sales and earnings growth estimates, and relative valuations like price-to-earnings, price-to-sales, and price-to-book ratios.

Because earnings-based measures of growth may be undefined for loss-making growth companies, growth strategies may ignore profitability considerations in favor of metrics like price-to-sales and price-to-book as proxies for growth.

At times growth investors become enamored with more narrow non-earnings growth measures like “eye-balls” during the internet craze of the early 2000s or “subscriber-growth” in recent years as it relates to streaming platforms and social media companies.

This can lead to an approach to growth that over-weights highly speculative, or junky, growth names.

Alternatively, some investors have been considering focusing on quality stocks—companies with higher profitability—to implicitly tilt towards profitable growth stocks. But ignoring explicit growth signals can lead to excluding some of the fastest growing companies, diluting the intended growth exposure.

The WisdomTree U.S. Quality Growth Index aims to identify stocks that have both quality and growth characteristics to avoid having to sacrifice on either factor.

Why Quality?

Investors are familiar with the standard value, blend, and growth styles. So why blend quality with growth?

Higher operating profitability (higher quality) has outpaced lower quality over time. And that outperformance has been most pronounced in the higher growth (less value) segments of the market.

In the below table the highest profitability quintile (1st quintile) outperformed the broad market controlling for valuation (price-to-book). When looking at the 5th quintile on price-to-book (the least value/most growth quintile), there was a spread of 8.38% annualized between the highest profitability quintile and the lowest profitability quintile.

These historical returns suggest investing in growth stocks can be a losing game over the long run. We believe investors should instead consider investing in **high quality growth stocks**.

Price-to-Book and Profitability Quintiles

		Operating Profitability Quintiles					1st vs. 5th
		5th (Lowest)	4th	3rd	2nd	1st (Highest)	
Price-to-Book Quintiles	5th (Highest)	3.08%	8.74%	8.97%	10.48%	11.47%	8.38%
	4th	6.34%	8.83%	10.92%	11.83%	11.48%	5.14%
	3rd	7.03%	10.63%	11.31%	13.77%	13.66%	6.63%
	2nd	10.10%	10.81%	13.86%	12.73%	14.37%	4.28%
	1st (Lowest)	12.14%	12.98%	15.06%	15.97%	12.07%	-0.08%
Total Market Return: 10.71%							

Source: Kenneth French Data Library, 6/30/63-2/28/26. Period based on availability of annual operating profitability returns sorted into quintiles, which begins 6/30/1963. Market is U.S.-listed equities grouped on the basis of operating profitability and price-to-book. Returns are annualized. Past performance is not indicative of future results.

The WisdomTree U.S. Quality Growth Index

The WisdomTree U.S. Quality Growth Index is a market-cap weighted index that consists of companies with quality and growth characteristics. The top 500 U.S. companies by market capitalization are ranked on a composite score of two fundamental factors: growth and quality, which are equally weighted.

The Index is comprised of the 100 U.S. companies (the 1st quintile) with the highest composite scores.

Growth Factor: The growth factor is determined by a company's ranking based on a 50% weight in its median analyst earnings growth forecast, a 25% weight in its trailing 5-year EBITDA (i.e., earnings before interest, taxes, depreciation and amortization) growth and a 25% weight in its trailing 5-year sales growth.

Quality Factor: The quality factor is determined by a company's ranking based on a 50% weight to each of its trailing 3-year average return on equity and trailing 3-year average return on assets.

Investment Process

Rebalance Frequency / Weighting / Caps

Semi-annual rebalance (June and December)

Market-cap weighted

Individual Security Caps (15%)

The Index is intended to be a high-conviction, relatively concentrated growth portfolio aimed at overweighting the largest quality growth companies. As a result, the Index has a high percentage of its weight (~60%) in the top 10 holdings.

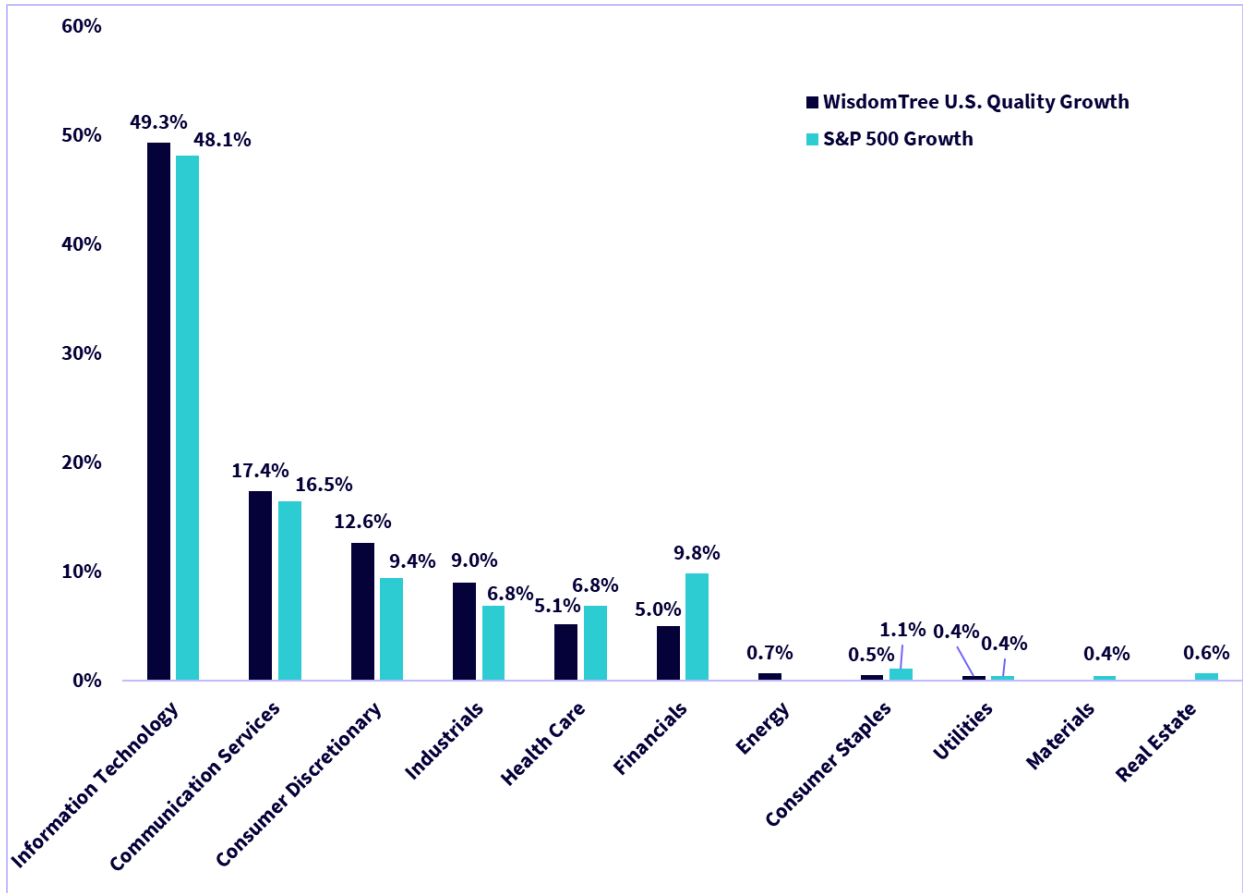

Index Top Holdings

Name	Sector	Weight
Apple Inc.	Information Technology	11.35%
NVIDIA Corporation	Information Technology	10.76%
Microsoft Corporation	Information Technology	9.33%
Alphabet Inc. Class A	Communication Services	6.20%
Amazon.com, Inc.	Consumer Discretionary	5.61%
Meta Platforms Inc Class A	Communication Services	4.22%
Broadcom Inc.	Information Technology	4.22%
Tesla, Inc.	Consumer Discretionary	3.81%
Eli Lilly and Company	Health Care	2.88%
Visa Inc. Class A	Financials	2.64%
Total		61.0%

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. For a prospectus or, if available, the summary prospectus containing this and other important information about the fund, call 866.909.9473 or visit WisdomTree.com/investments. Read the prospectus or, if available, the summary prospectus carefully before investing.

Important Fund Information

There are risks associated with investing, including possible loss of principal. Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks. The Fund is non-diversified, as a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets and the Index may not perform as intended. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.
