Performance of less than one year is cumulative. You cannot invest directly in an index.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [wisdomtree.com/investments](http://wisdomtree.com/investments).**

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

There are risks associated with investing, including potential loss of principal. Foreign investing involves specific risks, such as risk of loss from currency fluctuation or political or economic uncertainty. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is likely to be impacted by the events or conditions affecting that country or region. The Fund invests primarily in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. The Fund invests in the securities included in, or representative of, its Index. The Index may not perform as intended. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Dividends are not guaranteed, and a company currently paying dividends may cease paying dividends at any time.

The MSCI EAFE Index is a market cap-weighted index composed of companies representative of the developed market structure of developed countries in Europe, Australasia and Japan.

The MSCI EAFE Value Index is a free float-adjusted market capitalization index that is designed to measure the performance of "value" stocks within the developed equity market, excluding the US & Canada.

The WisdomTree True Developed International Index is a fundamentally weighted index that measures the performance of the large-capitalization segment of the dividend-paying market in the industrialized world outside the U.S. and Canada.
