Emerging Markets ex-State-Owned Enterprises Fund

XSOE

All Data As of 03/31/2026

Fund Overview

The WisdomTree Emerging Markets ex-State-Owned Enterprises Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Emerging Markets ex-State-Owned Enterprises Index.

Why XSOE?

- Gain exposure to targeted emerging market equity from companies excluding state-owned enterprises which is defined as government ownership of more than 20%
- Use to complement emerging market exposure while neutralizing companies potentially influenced by government decisions

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in emerging or offshore markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Funds focusing their investments on certain sectors and/or regions increase their vulnerability to any single economic or regulatory development. This may result in greater share price volatility. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit and the Fund does not attempt to outperform its Index. Please read the Fund’s prospectus for specific details regarding the Fund’s risk profile.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure emerging markets equity performance.

The WisdomTree Emerging Markets ex-State-Owned Enterprises Index measures the performance of emerging markets stocks that are not state-owned enterprises.
