WisdomTree Launches Space Economy Fund (WSPC)

New exchange-traded fund ("ETF") provides exposure to companies across the global space economy

NEW YORK – July 9, 2026 (Business Wire) – WisdomTree, Inc. ("WisdomTree") (NYSE: WT), a global financial innovator, today announced the launch of the WisdomTree Space Economy Fund (WSPC), listed on The Nasdaq Stock Market LLC, with an expense ratio of 0.75%. The launch of WSPC expands WisdomTree's thematic ETF lineup, providing investors with targeted exposure to companies across the rapidly evolving space economy value chain at a time when falling launch costs, accelerating commercial innovation, and rising government investment are reshaping the global space economy.

WSPC is designed to provide targeted exposure to global companies across the full space economy value chain, including launch vehicles and orbital, and deep space infrastructure, satellite broadband, Earth observation intelligence, defense space systems, and emerging technologies, offering investors access to the ongoing buildout of the global space economy.

"Space has been evolving from a government-monopolized domain to a multi-layer commercial economy for some time, but we believe that transition has now reached a point where the enabling conditions are clearly in place," said Christopher Gannatti, Global Head of Research at WisdomTree. "The cost revolution in launch has already happened. Data monetization models are proving their worth, and defense procurement is accelerating as governments treat space as a contested domain rather than a scientific endeavor. What makes this moment distinct is that those drivers are compounding across layers simultaneously, not sequentially. WSPC is designed to follow the full stack through targeted exposure, from the companies providing access to orbit to the ones turning that access into intelligence, connectivity, and national security infrastructure."

WSPC: What's Under the Hood?

- **Launches & Infrastructure:** Provides exposure to launch vehicle operators, spacecraft manufacturers, propulsion systems, and materials suppliers that enable access to and operations in orbit.
- **Commercial Space:** Invests across satellite broadband, Earth observation, precision timing and navigation, and the analytics platforms transforming orbital data into commercial intelligence.
- **Defense Space:** Includes companies supporting sovereign launch capabilities, satellite communications, missile warning, GPS resilience, and space situational awareness systems serving national security priorities.
- **Emerging Technologies:** Provides exposure to next-generation capabilities, including on-orbit servicing, debris removal, proliferated small satellite manufacturing, and other technologies that could shape the next phase of the space economy.

The launch of WSPC reflects WisdomTree's continued focus on delivering differentiated investment solutions that provide investors with targeted access to long-term structural growth themes through thoughtfully designed ETF strategies.

Read the prospectus or, if available, the summary prospectus carefully before investing.

WisdomTree Space Economy Fund (WSPC)
There are risks associated with investing, including possible loss of principal. The Fund invests primarily in equity securities that provide exposure to global companies involved in activities that form the space economy ("Space Economy Companies"), which are subject to significant technological complexity, high capital requirements, extended development cycles, and uncertainty regarding the commercial adoption of space-based products and services. These companies face intense competition, rapid technological change, and evolving domestic and international regulatory requirements, which may adversely affect their operations and financial performance. The Fund's exposure to certain sectors may increase its vulnerability to any single economic or regulatory development related to such sector. As this Fund can have a high concentration in some issuers, the Fund can be adversely impacted by changes affecting those issuers.

The Fund concentrates its investments in the Capital Goods and Technology Hardware & Equipment groups of industries and expects to have significant exposure to the Industrials, Information Technology, and Communication Services sectors, making it more susceptible to developments affecting those industries and sectors.

Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, foreign securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets.

While the Fund is actively managed, the Fund's investment process is heavily dependent on quantitative models, including artificial intelligence-based models, and the models may not perform as intended.

Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

WisdomTree Funds are distributed in the U.S. by Foreside Fund Services, LLC. Foreside Fund Services, LLC, is not affiliated with the other entities mentioned.
