The total return based on the NAV using the Fund’s daily 4:00 p.m. NAV. The total return based on market price is calculated using the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. The NAV and market price returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than original cost.

Performance data for the most recent month-end is available at www.wisdomtree.com.
Please refer to the list of Fund tickers beginning on page 7 for applicable expense ratio and important Fund information.

Past performance is not indicative of future results.

Past performance is not indicative of future results.

WisdomTree Funds are distributed by Foreside Fund Services, LLC, in the U.S. only. © 2017 WisdomTree Investments, Inc.
There are risks involved with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, currency, fixed income and alternative investments include additional risks. An investment in the GCC Fund is speculative, involves a substantial degree of risk, and should not constitute an investor’s entire portfolio. One of the risks associated with GCC is the use of commodity futures contracts. Derivatives can be volatile and may be less liquid than other securities and more sensitive to the effects of varied economic conditions. Investments in commodities may be affected by overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes and international economic and political developments. GCC is not an Investment Company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to the regulations thereunder.

Please see prospectus for discussion of risks. Commodities and futures are generally volatile and are not suitable for all investors. Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.
The MSCI EMU Small Cap Local Currency Index difference being the currency the securities are quoted in. The price used for each security in the local currency index is the local price, on the primary exchange on which a security is traded, with no conversion into U.S. dollars.

The MSCI EAFE Index selected by the Standard & Poor's Index Committee designed to represent the performance of the midcap segment of the market.

The MSCI Australia Index is a float-adjusted market capitalization index that is designed to measure the combined equity market performance of developed and emerging market countries excluding the United States. The MSCI Europe Value Index is a free float-adjusted market capitalization index that is designed to measure the performance of the value sector of the broad U.S. equity market, selecting from the Russell 3000 Index. The Russell 1000 Value Index is a capitalization weighted index that measures the large-cap value segment of the U.S. equity universe, selecting from the Russell 3000 Index. The Russell 2000 Value Index is a capitalization weighted index that measures the small-cap value segment of the U.S. equity universe, selecting from the Russell 2000 Index. The Russell Midcap Value Index is a capitalization weighted index that measures the midcap value segment of the U.S. equity universe, selecting from the Russell Midcap Index. The MSCI EMU Small Cap Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of small-cap stocks within the developed equity market, excluding the U.S. and Canada, and calculated in local currency.

The Russell 2000 Value Index is a capitalization weighted index that measures the midcap value segment of the U.S. equity universe, selecting from the Russell 2000 Index. The Russell Midcap Value Index is a capitalization weighted index that measures the midcap value segment of the U.S. equity universe, selecting from the Russell Midcap Index. The MSCI EMU Small Cap Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of small-cap stocks within the developed equity market, excluding the U.S. and Canada, and calculated in local currency.

The Russell 1000 Value Index is a capitalization weighted index that measures the large-cap value segment of the U.S. equity universe, selecting from the Russell 3000 Index.
