The total return based on NAV is calculated using the Fund’s daily 4.00 p.m. Eastern time NAV. The total return based on market price is calculated using the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. The NAV and market price returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than original cost. Performance data for the most recent month-end is available at www.wisdomtree.com.

WisdomTree ETFs MONTHLY PERFORMANCE REPORT [as of January 31, 2018]

There are risks involved with investing, including possible loss of principal. Foreign investing involves currency, political and economic risk. Funds focusing on a single country, sector and/or funds that emphasize investments in smaller companies may experience greater price volatility. Investments in emerging markets, currency, fixed income and alternative investments include additional risks.

An investment in the GCC Fund is speculative, involves a substantial degree of risk, and should not constitute an investor’s entire portfolio. One of the risks associated with GCC is the use of commodity futures contracts. Derivatives can be volatile and may be less liquid than other securities and more sensitive to the effects of varied economic conditions. Investments in commodities may be affected by overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes and international economic and political developments. GCC is not an Investment Company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to the regulations thereunder.

Please see prospectus for discussion of risks. Commodities and futures are generally volatile and are not suitable for all investors.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4 p.m. Eastern time net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

1 Performance of one year or less is cumulative.

AGGY The Fund’s net expense ratio of 0.12% (the amount charged to shareholders) reflects a contractual waiver of 0.08% through December 31, 2018.
AGGY Formerly known as “WisdomTree Barclays U.S. Aggregate Bond Enhanced Yield Fund” through December 29, 2016.

The Fund’s net expense ratio of 0.43% (the amount charged to shareholders) reflects a contractual waiver of 0.15% through July 31, 2018.

The Dow Jones U.S. Select Dividend Index and the Dow Jones Global ex-U.S. Select Real Estate Securities Index are both designed to measure the equity market performance of the Dow Jones U.S. and Dow Jones Global Indexes. The Dow Jones U.S. Select Dividend Index, which includes a selection of stocks that have a history of increasing dividends for at least ten consecutive years, is a capitalization weighted index that reflects the performance of the leading industries in the U.S. economy.

The Russell 3000 Index is a float-adjusted market capitalization index that is designed to represent the combined equity market performance of developed and emerging market countries excluding the United States.

The Russell 2000 Index is a capitalization weighted index that measures the performance of U.S. common stocks that have a history of increasing dividends for at least ten consecutive years.

The S&P MidCap 400 Index is a capitalization-weighted index of 400 stocks ranked 1001-3000 by market capitalization from the Russell 3000 Index. The Russell 2000 Value Index is a capitalization weighted index that measures the small-cap value segment of the U.S. equity universe, selecting from the Russell 3000 Index.

The Russell 3000 Value Index is a capitalization weighted index that measures the performance of the 3,000 largest U.S. companies based on total market capitalization. The Russell 3000 Value Index is a capitalization weighted index that measures the performance of the value sector of the Dow Jones U.S. equity market, selecting from the Russell 3000 Index.

The Russell Midcap Value Index is a capitalization weighted index that measures the midcap value segment of the U.S. equity universe, selecting from the Russell Midcap Index.

The Nasdaq U.S. Dividend Achievers Select Index is a capitalization weighted index that measures the performance of U.S. common stocks that have a history of increasing dividends for at least ten consecutive years.

The MSCI Australia Index is a capitalization-weighted index that seeks to measure the performance of the Australian equity market and aims to capture 85% of the publicly available total market capitalization. The MSCI AC Asia Pacific ex Japan Index is a capitalization weighted index that is designed to measure the equity market performance of the Asia Pacific region excluding Japan. The Index consists of 12 countries: Australia, China, Hong Kong, India, Indonesia, Korea, Malaysia, New Zealand, Philippines, Singapore, Taiwan and Thailand.

The MSCI Pacific ex-Japan Local Currency Spliced Index is a capitalization weighted index that measures the performance of U.S. common stocks that have a history of increasing dividends for at least ten consecutive years.

The MSCI Pacific ex-Japan Value Index is a capitalization weighted index that measures the performance of U.S. common stocks that have a history of increasing dividends for at least ten consecutive years.

A country-specific index is a capitalization-weighted index of 500 stocks selected by the Standard & Poor’s Index Committee designed to represent the performance of the leading industries in the U.S. economy. The S&P MidCap 400 Index is a capitalization-weighted index of 400 stocks that belong to the S&P 500 Index. The S&P 600 Index is a capitalization-weighted index of 600 stocks that belong to the S&P 500 Index.
WisdomTree ETFs
MONTHLY PERFORMANCE REPORT
[as of January 31, 2018]

selected by the Standard & Poor’s Index Committee designed to represent the performance of the midcap segment of the market.

The Dow Jones U.S. Select Dividend Index measures the performance of 100 U.S. dividend-paying companies. The S&P 500 Equal Weight Index is the equal-weight version of the S&P 500 Index. The Index includes the same constituents as the capitalization weighted S&P 500 Index, but each company in the S&P 500 Equal Weight Index is allocated a fixed weight or 0.2% of the index total at each quarterly rebalance.

The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance, excluding the US & Canada. The MSCI EAFE Small Cap Index is a free float-adjusted market capitalization index that is designed to measure the performance of small-cap stocks within the developed markets excluding the US & Canada. The MSCI EAFE Value Index is a free float-adjusted market capitalization index that is designed to measure the performance of value stocks within the developed market equity performance, excluding the US & Canada. The MSCI Europe Index is a free float-adjusted market capitalization index that is designed to measure the performance of “small” stocks within Japan.

The MSCI EM Local Currency Local Market Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance, excluding the US and Canada. The index is calculated using the same methodology as its corresponding MSCI EM Local Currency Broad Market Index.

The MSCI Japan Small Cap Local Currency Index is a free float-adjusted market capitalization index that captures small cap representation across 10 Developed Market countries in the EMU (European Economic and Monetary Union) and is calculated in local currency.

The MSCI EAFE Small Cap Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of small-cap stocks within the developed equity market, excluding the US and Canada, and calculated in local currency.

The MSCI Japan Small Cap Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of small-cap stocks within Japan and provides local currency returns, which are not translated back to U.S. dollars. The MSCI United Kingdom Local Currency Local Market Index is a capitalization-weighted index that measures the performance of the market and captures local currency returns.

The MSCI China Index is a free float-adjusted market capitalization index that is designed to measure the performance of the Chinese equity market. The FTSE China 50 Index represents the 50 largest and most liquid Chinese stocks listed and trading on the Hong Kong Stock Exchange. The index was formerly known as the FTSE China 25 Index; changed by FTSE after the close of trading on September 19, 2014.

The JP Morgan Emerging Local Markets Index Plus and its underlying country and regional sub-indices track the total returns for local-currency denominated money market instruments in emerging market countries. The Brazil and China sub-indices use a weighted basket of 1-2, 2-3, 3-5, and 5 plus year yields to represent the money market and short-term local currency returns.

The JP Morgan CEMBI Diversified Index is a subset of the CEMBI Broad Index with more stringent rules including caps on country exposure, higher issue-size threshold, and less concentration in individual issuers. The CEMBI Diversified is a commonly used index for institutional passive mandates and is the benchmark for Voya’s existing mandates. The index serves as a global corporate benchmark representing Asia, Latin America, Europe and Middle East & Africa. US dollar-denominated corporate issuers from index-eligible countries are narrowed further by only including those with more than $300m current face outstanding and at least 1 year to maturity at the time of inclusion into the index.

The JP Morgan GBI-EM Global Diversified Index is a free float-adjusted market capitalization index that is designed to measure the performance of government bonds in emerging market countries. The index was formerly known as the FTSE JPM Global Diversified Index and is rebalanced at month-end. The index uses a rules-based approach to reallocate across subcomponents in the Bloomberg Barclays US Aggregate Index to seek to enhance yield while maintaining a similar risk profile. The Bloomberg Barclays US Aggregate Index is a broad-based market bond index that provides a duration exposure of 6-8 years. Market value weights of long and short positions are rebalanced at month-end. The Bloomberg Barclays US Aggregate Index Index is a subset of the MSCI AC World ex USA Index and is composed of all the MSCI AC World ex USA Index stocks which are categorized as growth stocks.

The Dow Jones Global ex-U.S. Select Real Estate Securities Index is a free float-adjusted capitalization index that defines and measures the investable universe of publicly traded real estate securities in countries outside the U.S. The U.S.-hedged version of this index is designed to hedge against U.S. dollar risk. The Dow Jones Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure emerging markets equity performance. The MSCI Emerging Markets Small Cap Index is a free float-adjusted market capitalization index that is designed to measure small-cap performance in emerging markets. The MSCI India Index is a free float-adjusted market capitalization index that is designed to measure the performance of stocks in India. The MSCI Arabian Markets is a capitalization-weighted index that measures the performance of the Arab stock market and captures local currency returns.

The S&P 500 Inverse Daily Index is a rules-based index designed to be inversely correlated with the performance of the S&P 500 Index. The S&P 500 Inverse index is not a capitalization-weighted index, as it is designed to be inversely correlated with the S&P 500 Index. The S&P 500 Inverse index subtracts the return of the S&P 500 Index from 1.0, or 100%, and the result is expressed as a percentage.

The S&P 500 Inverse Daily Index is a rules-based index designed to be inversely correlated with the performance of the S&P 500 Index. The S&P 500 Inverse index is not a capitalization-weighted index, as it is designed to be inversely correlated with the S&P 500 Index. The S&P 500 Inverse index subtracts the return of the S&P 500 Index from 1.0, or 100%, and the result is expressed as a percentage.

The MSCI Germany Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of the German equity market. The MSCI Germany Local Currency Index is a free float-adjusted market capitalization index that is designed to measure the performance of the German equity market. The MSCI Japan Local Currency Local Market Index is a free float-adjusted market capitalization index that is designed to measure the performance of the Japanese equity market.
The ICE BofA Merrill Lynch 1-5 Year US Corporate Index is a subset of The BoA Merrill Lynch US Corporate Index including all securities with a remaining term to final maturity less than 5 years. The ICE BofA Merrill Lynch US High Yield Index tracks the performance of US dollar-denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of $100 million.

The ICE BofA Merrill Lynch 1-5 Year US High Yield Constrained Index tracks the performance of short-term US dollar-denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch).

The S&P China 500 Index comprises 500 of the largest, most liquid Chinese companies while approximating the sector composition of the broader Chinese equity market. All Chinese share classes including A-shares and offshore listings are eligible for inclusion. The MSCI China Index captures large and mid-cap representation across China H-shares, B-shares, red chips, P chips and foreign listings (e.g., ADRs). With 150 constituents, the index covers about 85% of this China equity universe.

The 60/40 MSCI AC World/Bloomberg Barclays U.S. Aggregate Index represents a 60% weight to the MSCI AC World Index and a 40% weight to the Bloomberg Barclays U.S. Aggregate Index.
